Non-Knowledge Risk and Bank-Company Management Vincenzo Formisano,2016-01-26 In the current economic scenario, the intangible assets contribute significantly to the construction of the competitive positioning of a company. It follows that this intangible information must be appropriately considered in the internal rating system (IRSSs). Currently key aspects of business risk and operational risk such as potential for growth, competitive capabilities, core competencies, role in the supply chain of membership, and governance are being considered as secondary in this system. Intangible factors such as the milieu of the company and the environment in which it operates, are not being appropriately considered. In this book, Vincenzo Formisano proposes new guidelines aimed to set desirable IRSSs in which the weight of intangible assets is appropriately and properly valued. He addresses practical rules for achieving a rating system capable of understanding and enhancing the intangible assets of a company and for the assessment of creditworthiness. The first part of the book focuses on existing practices; the second part exposes a general model for the classification and interpretation of intangibles. The third part provides practical guidelines designed to configure desirable rating models in which the weight of intangible assets is correctly considered. This book offers theoretical and practical insights and an easy-to-read approach which provides a valuable source of information for teachers and students in Finance. It is also a useful reference point for the Banking, Accounting and Finance managerial communities.

Business Strategies and Competitiveness in Times of Crisis Laura Gavinelli,2016-07-13 This book focuses on the relationship between business strategy and competition among Italian SMEs in the aftermath of the economic crisis. Analysing, Planning and Valuing Private Firms Federico Beltrame,Alex Sclip,2023-08-22 Corporate finance plays a

vital role in every business as it pertains to an array of financing and investment decisions. Where most corporate finance books provide tools for public companies, this book presents new approaches and methods for planning and valuing private firms. Chapters discuss how typical valuation methods may not be perfectly adaptable to private firms and their investment decisions: in particular showing how the widely used Capital Asset Pricing Model cannot be precisely applied for the estimation of cost of equity for private companies, and the limitations of market multiples which may not match individual company features. The book suggests new ways of financial forecasting that can be better tailored to private businesses, such as by exploiting the concept of financial breakeven based on debt serviceability that departs from the more traditionally used concept of the revenue-cost breakeven. Topics including financial planning, working capital management, the cost of capital, and valuation methods are all covered. This book will be of interest to consultants, analysts and accountants working in private firms, as well as academics and students who are interested in an empirical assessment of the role of corporate finance in private businesses versus larger public companies.

La gestione dell'azienda sanitaria. Innovazione e scelte strategiche per un nuovo scenario competitivo Silvia Bruzzi, 2006

Strategia aziendale: tempi, azioni, risorse Alberto Bubbio, Andrea Gueli, Alletti, Luca Agostini, Dario Gulino, 2015-06-11 È possibile gestire un'azienda senza avere una strategia? È questa una domanda che un numero crescente di studiosi di management si è posta. La risposta sembrerebbe essere no. Questo poiché già la decisione di avviare un'impresa è strategia. Si può poi avere una strategia non esplicita. Può essere esplicita, ma non chiara. Si può avere una strategia esplicita ma non condivisa. Si può elaborare una strategia flessibile, che si adatta ai mutamenti di ambiente esterno. In tutte queste situazioni una strategia c'è. Ma la strategia è il frutto di un complesso processo circolare che si caratterizza per tre momenti. Solo uno di questi è rappresentato dalla formulazione della strategia. Ed è proprio questo il tema affrontato e approfondito dal libro. Alla base vi è la convinzione che è molto difficile gestire un'azienda senza avere definito ed esplicitato una strategia; così come vi è la convinzione che uno strumento come il controllo di gestione possa diventare addirittura pericoloso se non è legato alla strategia. La strategia è come un viaggio per affrontare il quale è fondamentale aver fissato una meta, per poter poi scegliere di conseguenza tempi, mezzi e risorse. L'analisi degli autori si svolge descrivendo gli strumenti utili alla formulazione della strategia (come ad esempio la Road Map) e presentando quelli che sono ritenuti i principali contributi alla base della letteratura classica sull'argomento: I. Ansoff, K. Andrews e la Harvard Business School (M. Porter e R. Kaplan), H. Mintzberg, R. Normann e, nell'affollata Scuola di Economia Aziendale Italiana, V. Coda. STRUTTURA Make strategy: i tre momenti di riflessione strategica La Road Map: premessa per un efficace processo di formulazione della strategia Formulazione della strategia: la versione di Kaplan Formulazione della strategia: la versione di Porter Formulazione della strategia: la proposta di J. Brian Quinn e H. Mintzberg Formulazione della strategia: un percorso storico attraverso diverse scuole di pensiero Formulazione di una strategia: alcuni aspetti da non sottovalutare

Managing Globalization Stefano Andi,Matteo Rossi, Demetris Vrontis, 2016-05-11 Globalization stems from the verb “to globalize”, which embodies the concept of international interdependence and influence between various social and economic systems. In an increasingly globalized market environment, there is an impetus for many firms to look to foreign markets in order to maintain competitive advantage. Over recent years, it has been possible to see dramatic changes that have strong impacts on all businesses. Strategic process can provide an overall strategic direction to the management of an organization, and gives a specific direction to areas like financial strategy, marketing strategy, organizational development strategy and human resources strategy, in order to achieve success. Innovation is the foundation of economic growth and corporate prosperity. Finally, entrepreneurship provides all the necessary mobilization for this growth and prosperity. In this respect, this book provides scientific evidence and direction to businesses competing in the contemporary competitive and changing environment. As such, it is an essential reference source, building on the available literature in the field of globalization, strategic management and innovation use, while providing for further research opportunities in this dynamic field. The book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.
