Actions Speak Louder than Words Celia Oyler,2012-03-22 How do educators engage students in community action projects without telling them what to think, how to think, or what to do? Is it possible to integrate social justice organizing into the curriculum without imposing one's political views on students? In *Actions Speak Louder than Words*, longtime activist and teacher educator Celia Oyler delves into such questions through firsthand accounts of social action projects. By moving beyond charity work or volunteerism, she shows how community activism projects offer fertile ground for practicing democratic engagement as part of classroom work. *Actions Speak Louder than Words* is a systematic, qualitative study offering in-depth and detailed portraits of teachers who design social action projects as part of the regular classroom curriculum. Each case forms a chapter organized as a narrative that includes excerpts from classroom dialogues, and interviews with students, teachers, and parents describing their social action projects with sufficient detail to give educators guidance for designing such projects for their own classrooms. The final chapter examines power, pedagogy, and learning outcomes across the cases, providing specific guidance to educators wishing to take up such projects and offering instructional and procedural advice as well as cautions. A fresh new example of taking up the challenge to teach toward equity and social justice, *Actions Speak Louder than Words* is an invaluable resource for educators who are passionate about the possibility of integrating activism and advocacy into curriculum as a means to engage in strong democracy.

Hence, Malcolm formulated *College Success Guaranteed 2.0: 5 Rules for Parents*, these five simple rules include: Make them pay... for something Wait for their call Step aside... and make way for new mentors Mantra — is this my issue? Conservative Political Communication Sharon E. Jarvis, 2021-04-14 Conservative Political Communication examines the evolution of appeals, media, and tactics in right-wing media and political communication, tracking trends and shifts from the early days of contemporary conservatism in the 1950s to the Trump administration. The chapters in this edited volume feature the work of senior and junior scholars from the fields of communication, journalism, and political science employing content analytic, experimental, survey, historical, and rhetorical research methodologies. Analyses of the rise of the 24-hour news cycle, the range of partisan news sources, and the role of social media algorithms in political campaigns yield insights for our media and information ecosystems. A key theme across these chapters is how right-wing channels and communications help and hinder partisan fragmentation, a condition whereby novice elected officials create personal conservative brands, appeal to the base through partisan media, and complicate senior leadership's ability to engage in bargaining, compromise, and deal-making. This volume interrogates conservative media and messaging to track where these processes came from, how they functioned in the 2016 U.S. presidential campaign, and where they may be going in the future. This book will interest scholars and upper-level students of political communication, media and politics, and political science, as well as readers invested in today's political media landscape in the United States.
