Vaughn—Steps from the Past Bobby J. Harlan, Donnie Vaughn, 2016-12-09 When starting a family history project, where do you begin? For me, the answer is simple: Genesis. Being a man, a man of science, I find that as I get older, science has proven more and more that the truth is very simple. In the opening statements of Genesis, God created the universe as we know it and also created the stars. How is such a thing possible? We are children of God. You know, children are like their creator, full of wonder. Wonder, why? Genesis states, In the beginning God created the heavens and the earth. The earth was without form and void and darkness was over the face of the deep. As we learn more on just how we got here, along comes a brilliant young scientist named Stephen Hawking. He explains in mathematical ways how the universe started with a big bang, started from nothing, and burst forth faster than the speed of light. Stars formed and gathered together to form galaxies then matter collected to form planets to circle around the stars. There was eternal darkness, and then there were the stars and light. As time passed, God planted the seeds of life. What is time? As we read the Bible, we were always in conflict with time. How do we feel comfortable with the evolution of life and the time frame of the Bible? Here, again, I find the answer is simple. Time, to us, is something we made up to understand what goes on around us; God is on his own time. I

like to use baking an apple pie as my example of time and what it takes. Here's the question I ask, how long does it take to bake an apple pie? The answer I get is about an hour. I reply with Oh, you can? So here is my response to the one-hour apple pie: Where did the apple come from? How long did the apples take to grow? Where did that variety of apple come from? How long did it take for the seed to grow into a tree? How did you get the apple? At a store? How did the store get there? How did the refrigeration and transportation come to be? What about the cinnamon and sugar you used, where did it come from? (Cinnamon comes from Indian dried tree bark.) What about the tin used to make the pan used to bake the pie? When was electricity harnessed to be used by man, the modern stove?

Our Humble Helpers: Familiar Talks on the Domestic Animals Jean-Henri Fabre,2022-08-21 In Our Humble Helpers: Familiar Talks on the Domestic Animals, Jean-Henri Fabre invites readers into an enthralling exploration of the intimate relationship between humans and domestic animals. Employing a conversational yet insightful literary style, Fabre unravels the multifaceted lives of familiar creatures such as dogs, cats, and horses, blending personal anecdotes with scientific observations. His work reflects the early foundations of ethology, drawing from contemporary scientific thought while embracing a poetic sensibility that reverberates with empathy and respect for animal life. Through clear prose and evocative descriptions, Fabre captures the unique roles these animals play in human existence, shining a light on their behaviors and contributions to domestic life. France's renowned entomologist and naturalist, Fabre's passion for the natural world is palpably evident throughout this work. His formative experiences in the rural landscapes of southern France, coupled with his reputation as an astute observer, guided him towards a profound appreciation for the undeterred resilience and intelligence found within domestic animals. Fabre's conversations reflect a deep-seated belief in the interconnectedness of life, as he draws parallels between animal and human experiences, urging readers to reconsider their perspectives. I wholeheartedly recommend Our Humble Helpers to anyone intrigued by the symbiotic relationship we maintain with domestic animals. Fabre's erudite yet accessible approach delivers not just a compendium of animal behaviors, but also a heartfelt tribute to the unspoken bonds that enrich our lives. Whether you are a seasoned naturalist or simply a curious reader, this book will resonate with the shared experiences that define our companionship with these humble helpers.

But for thousands of years, countless civilizations have survived on them. Civilizations tend to get rid of foods that are harmful, and that the dairy fats made it through these civilizations, conveys some truth in the matter.
