The Ethnography of Reading at Thirty Matthew Rosen,2023-11-23 This edited volume examines what the classic text *The Ethnography of Reading* (Boyarin ed., 1993), and the diverse ethnographies of reading it helped inspire, can offer

contemporary scholars interested in understanding the place of reading in social life. The *Ethnography of Reading at Thirty* brings together new research and critical reflections from an international and interdisciplinary group of scholars who have kept their ears tuned to the voices in and around the texts they encountered and constructed in the process of bringing the ethnography of reading into the twenty-first century. Rather than operating from universalist assumptions about how people interact with and make meaning from written texts, each of the present contributors draw in one way or another on the theoretical, methodological, and creative legacies of *The Ethnography of Reading*. Under the broad umbrella of ethnographic reader studies, they collectively explore new relations between texts, social imagination, and social action.

Purpose and a Paycheck Chris Farrell, 2019-02-05 *Purpose and a Paycheck* tells the compelling story of how a growing movement of older entrepreneurs and part-time workers are creating a stronger and more vibrant economy. People 65 and older will account for 20 percent of the population in 2030, up from 13 percent in 2000. Many prognosticators blame the aging population for the stagnating economy, citing that as more people retire, they will stop working as relatively fewer working people have to support growing numbers of dependent elderly. *Purpose and a Paycheck* debunks this line of thought by showing how a growing movement of elderly entrepreneurs and part time workers are creating conditions for a stronger economy. Growing numbers of Americans are no longer retiring in the traditional sense, and the numbers are striking such as: the labor force participation rate of men 60 years and over has risen nearly one-third from a low of 26 percent in 1996 to 35 percent in 2014, the comparable rate for women is from 15 percent to 25 percent, and 25.5 percent of new business ventures in 2016 were started by the 55-to-64-year-old age group, up from 14.8 percent in 1996. America's aging society and workforce is redefining work for all generations and is a strong force in shaping the U.S. economy and society, alongside globalization, automation, and climate change. Reframing aging will result in faster rates of economic growth and higher living standards for all of us in addition to a more fulfilling and financially secure second half of life for our aging population.

Money on the Table Melissa Greenwell, 2017-01-03 If our executive suites and boardrooms aren't gender-balanced, we're throwing money away! The shortage of women in boardrooms and executive suites means companies are missing out on the best solutions, products, and services—and on having the type of workplace that will attract the best workers. Gender imbalance is a serious problem in companies, and the cost is significant—but it is a problem we can solve. Melissa Greenwell challenges leaders in a no-blame, logical approach to bring more female talent into leadership positions for one simple reason: Their companies will make more money if they do. Leaders of gender-balanced companies profit from differences in the female brain responsible for questioning, debate, idea-generation, and problem solving, and those companies see increased performance and healthier strategies and tactics. Greenwell deftly demystifies gender imbalance, making it a topic we can discuss without fearing perceptions of favoritism or sexism. *Money on the Table* is destined to become the go-to book for CEOs and their leadership teams, boards of directors, and top HR leaders, with a clear place in talent acquisition and

engagement strategies as well. Greenwell supports her thesis with business cases, interviews with top business leaders, and the brain science that explains why women and men think, communicate, and problem-solve differently. Key insights, explanations, vocabulary, and action plans complete the book along with a compelling list of ten rules that women should abide by to fulfill their part of “getting a seat at the table.”

Understanding the Humanitarian World Daniel Maxwell, Kirsten Gelsdorf, 2019-04-17 Conflict and disaster have been part of human history for as long as it has been recorded. Over time, more mechanisms for responding to crises have developed and become more systematized. Today a large and complex ‘global humanitarian response system’ made up of a multitude of local, national and international actors carries out a wide variety of responses. Understanding this intricate system, and the forces that shape it, are the core focus of this book. Daniel G Maxwell and Kirsten Gelsdorf highlight the origins, growth, and specific challenges to, humanitarian action and examine why the contemporary system functions as it does. They outline the main actors, explore how they are organised and look at the ways they plan and carry out their operations. Interrogating major contemporary debates and controversies in the humanitarian system, and the reasons why actions undertaken in its name remain the subject of so much controversy, they provide an important overview of the contemporary humanitarian system and the ways it may develop in the future. This book offers a nuanced understanding of the way humanitarian action operates in the 21st century. It will be essential reading for anyone with an interest in international human rights law, disaster management and international relations. Immigration Policy and the Terrorist Threat in Canada and the United States Alexander Moens, Martin Collacott, 2008 In June 2007, the Fraser Institute held a conference in Toronto, Ontario, titled, Immigration Policy, Border Controls, and the Terrorist Threat In Canada and the United States. The chapters in this volume, which arose from this conference, raise fundamental questions about weaknesses in Canada's current immigration policies and procedures. The contributors to this volume identify serious threats and weaknesses in the immigration, asylum, and border regimes from both Canadian and American perspectives. The authors are not opposed to effectively managed immigration or allowing genuine refugees who pose no security threat to enter the country through a well-vetted system. All believe that the vast majority of immigrants pose no danger, but are simply seeking to improve their freedom and prosperity. Nevertheless given the stakes raised by terrorist attacks, the entry of even a small number of potentially dangerous individuals should warrant major attention and policy review.--BOOK JACKET.

ISR and the Gulf The International Institute for Strategic Studies (IISS), 2020-04-22 Intelligence, surveillance and reconnaissance (ISR) is today a core capability for the modern military, in peacetime and in war. ISR is and will remain a key enabler in the Gulf region in ongoing conflicts. There is still a reliance on the United States, and its ISR systems deployed in

the Gulf, to facilitate ongoing operations and to provide situational awareness at the tactical, operational and strategic levels. However, even US ISR is finite, and there is growing demand for its resources in other regions. The Gulf Cooperation Council states have some ISR capacity, but this needs further development and improved exploitation to better address regional needs. Written by a team of IISS specialists, *ISR & the Gulf: An Assessment* considers the meaning of and requirement for intelligence, surveillance and reconnaissance in the context of the region. It examines the military needs and industrial aspirations of the Gulf Arab states regarding ISR, and the opportunities and risks these present. The report is a companion work to the Institute's *Missile-Defence Cooperation in the Gulf*, and is similarly intended to help provide the basis for informed decision-making to support improved security in the region.

Gender and Climate Change Joane Nagel, 2015-09-25 Does gender matter in global climate change? This timely and provocative book takes readers on a guided tour of basic climate science, then holds up a gender lens to find out what has been overlooked in popular discussion, research, and policy debates. We see that, around the world, more women than men die in climate-related natural disasters; the history of science and war are intimately interwoven masculine occupations and preoccupations; and conservative men and their interests drive the climate change denial machine. We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth, and an agenda that marginalizes the interests of women and developing economies. The book uses vivid case studies to highlight the sometimes surprising differential, gendered impacts of climate changes.

Think Like a Terrorist to Combat Terrorism and Radicalization in Prison William P. Sturgeon, Francesca Spina, 2022-07-20 *Think Like a Terrorist to Combat Terrorism and Radicalization in Prison* provides guidelines for hardening facilities, training staff, preparing for radicalized-terrorist inmates' incarceration, and monitoring these inmates after their release. The book combines practitioner experience with scholarly insights to offer practical suggestions bolstered by research. The authors offer suggestions for housing, programming, security, and staff training with the ultimate goal of keeping correctional facilities, staff, and other inmates, safe from radicalization and spreading terrorist doctrines and terrorist acts, which requires examining and potentially changing prison and correctional officer policies and procedures, hiring and training suitable staff, and ensuring technology is available. Correctional facilities can curtail the recruitment and radicalization of inmates by developing staff training, de-radicalization programs, management methods, techniques, and practices that address the recruitment issues associated with this threat. The need for understanding, and the role line correctional officers and first-line supervisors play in preventing radicalization, is critical in this process. It is also vital to connect with and maintain communication with appropriate security and intelligence agencies as needed. Key Features: • Outlines common terrorist and extremist activities in prison using relevant real-world examples • Instructs on how to detect and recognize such efforts as recruitment and radicalization and how to curtail and prevent such activity • Provides guidance on

establishing de-radicalization programs within prison facilities • Presents recommendations on collecting, analyzing, and disseminating intelligence to correctional, law-enforcement, and intelligence agencies on potential terrorist activities and recruitment efforts

Information Modelling and Knowledge Bases XXXII M. Tropmann-Frick, B. Thalheim, H. Jaakkola, 2021-01-04 Information modeling and knowledge bases are important technologies for academic and industrial research that goes beyond the traditional borders of information systems and computer science. The amount and complexity of information to be dealt with grows continually, as do the levels of abstraction and the size of databases. This book presents the proceedings of the 30th International Conference on Information Modelling and Knowledge Bases (EJC2020), due to be held in Hamburg, Germany on 8 and 9 June 2020, but instead held as a virtual conference on the same dates due to the Corona-virus pandemic restrictions. The conference provides a research forum for the exchange of scientific results and experiences, and brings together experts from different areas of computer science and other disciplines with a common interest in information modeling and knowledge bases. The subject touches on many disciplines, with philosophy and logic, cognitive science, knowledge management, linguistics and management science, as well as the emerging fields of data science and machine learning, all being relevant areas. The 23 reviewed, selected, and upgraded contributions included here are the result of presentations, comments, and discussions from the conference, and reflect the themes of the conference sessions: learning and linguistics; systems and processes; data and knowledge representation; models and interfaces; formalizations and reasoning; models and modeling; machine learning; models and programming; environment and predictions; modeling emotion; and social networks. The book provides an overview of current research and applications, and will be of interest to all those working in the field.

Alternative Models of Sports Development in America B. David Ridpath, 2018-01-16 In the United States, the entanglement of sports and education has persisted for over a century. Multimillion-dollar high school football stadiums, college coaches whose salaries are many times those of their institutions' presidents, psychological and educational tolls on student-athletes, and high-profile academic scandals are just symptoms of a system that has come under increasing fire. Institutions large and small face persistent quandaries: which do they value more, academic integrity or athletic success? Which takes precedence: prioritizing elite teams and athletes, or making it possible for all students to participate in sports? How do we create opportunities for academic—not just athletic—development for players? In *Alternative Models of Sports Development in America*, B. David Ridpath—a leading sports development researcher who has studied both the US system and the European club model—offers clear steps toward creating a new status quo. He lays out four possible alternative models that draw various elements from academic, athletic, and European approaches. His proposals will help increase access of all young people to the benefits of sports and exercise, allow athletes to also thrive as students, and improve

competitiveness. The result is a book that will resonate with sports development professionals, academic administrators, and parents.

A New Pathway to World Peace Ted Becker, Brian Polkinghorn, 2017-09-25 Horrific changes are descending upon humanity, most of them man-made, all of them threatening the survival of humankind on Mother Earth. Forever wars, the threat of nuclear destruction, the ecology collapsing worldwide, swelling waves of migrants, and unprecedented global inequality of wealth are upon us. The dominant, modern worldview prevailing for many centuries has produced all the above and needs swift and radical change. Central to this unfolding tragedy stands the United States, boasting its “exceptionality.” Alexis de Tocqueville’s *Democracy in America* coined and defined how America was an “exceptional” nation. However, the America he lauded in the early 1800s and what it has become today are as different as Antarctica and Hawai’i. This book is designed to pry open the eyes and minds of people everywhere about the true nature of the US as a spiritual and political (but not militaristic) nation, one to emulate and with whom to collaborate on helping resolve the violence and myopia plaguing humankind right now. It illuminates a new way to reshape American thinking, and that of the whole world, sensibly and with sensitivity to all humanity and the planet itself. But you must read to the last word to absorb the entire vision.

A Great Place to Work For All Michael C. Bush,, Great Place to Work, 2018-03-13 Greatness Redefined for the 21st Century Today’s business climate is defined by speed, social technologies, and people’s expectations of “values” besides value. As a result, leaders have to create an outstanding culture for all, no matter who they are or what they do for the organization. This groundbreaking book, from the creators of the gold-standard Fortune 100 Best Companies to Work For list, shows how it’s done. Through inspiring stories and compelling research, the authors demonstrate that great places to work for all benefit the individuals working there and contribute to a better global society—even as they outperform in the stock market and grow revenue three times faster than less-inclusive rivals. This is a call to lead so that organizations develop every ounce of human potential.

Tectonic Shifts Mark Schuller, Pablo Morales, 2012 The 7.0 magnitude earthquake that hit Haiti’s capital on January 12, 2010 will be remembered as one of the world’s deadliest disasters. The earthquake was a tragedy that gripped the nation-and the world. But as a disaster it also magnified the social ills that have beset this island nation that sits squarely in the United States’ diplomatic and geopolitical shadow. The quake exposed centuries of underdevelopment, misguided economic policies, and foreign aid interventions that have contributed to rampant inequality and social exclusion in Haiti. *Tectonic Shift* offers a diverse on-the-ground set of perspectives about Haiti’s cataclysmic earthquake and the aftermath that left more than 1.5 million individuals homeless. Following a critical analysis of Haiti’s heightened vulnerability as a result of centuries of foreign policy and most recently neoliberal economic policies, this book addresses a range of contemporary realities, foreign impositions, and political changes that occurred during the relief and reconstruction periods. Analysis of these realities offers

tools for engaged, principled reflection and action. Essays by scholars, journalists, activists, and Haitians still on the island and those in the Diaspora highlight the many struggles that the Haitian people face today, providing lessons not only for those impacted and involved in relief, but for people engaged in struggles for justice and transformation in other parts of the world.

The Performance and Poetry of Regina José Galindo Mark Eccles, 2025-07-10 This book presents an analysis of Regina José Galindo's performance and poetry within a highly developed theoretical framework. Eccles explores the connection between art, event, and the affects that permeate throughout each of Galindo's performances, channeling the foundations of Alain Badiou's philosophical writings, then mapping the convergence points between political theory, performance, and the social order. Through a scholarly focus on the event, Eccles utilizes Galindo's art to propose a new category within aesthetics: art as "evental." Through this, the author challenges interpretations of the communal understanding of reality, the limits of social space and temporality.

Do Babies Matter? Mary Ann Mason, Nicholas H. Wolfinger, Marc Goulden, 2013-06-13 The new generation of scholars differs in many ways from its predecessor of just a few decades ago. Academia once consisted largely of men in traditional single-earner families. Today, men and women fill the doctoral student ranks in nearly equal numbers and most will experience both the benefits and challenges of living in dual-income households. This generation also has new expectations and values, notably the desire for flexibility and balance between careers and other life goals. However, changes to the structure and culture of academia have not kept pace with young scholars' desires for work-family balance. *Do Babies Matter?* is the first comprehensive examination of the relationship between family formation and the academic careers of men and women. The book begins with graduate students and postdoctoral fellows, moves on to early and mid-career years, and ends with retirement. Individual chapters examine graduate school, how recent PhD recipients get into the academic game, the tenure process, and life after tenure. The authors explore the family sacrifices women often have to make to get ahead in academia and consider how gender and family interact to affect promotion to full professor, salaries, and retirement. Concrete strategies are suggested for transforming the university into a family-friendly environment at every career stage. The book draws on over a decade of research using unprecedented data resources, including the Survey of Doctorate Recipients, a nationally representative panel survey of PhDs in America, and multiple surveys of faculty and graduate students at the ten-campus University of California system..

John Ruskin and the Fabric of Architecture Anuradha Chatterjee, 2017-10-02 Through the theoretical lenses of dress studies, gender, science, and visual studies, this volume analyses the impact John Ruskin has had on architecture throughout the nineteenth and twentieth centuries. It explores Ruskin's different ideologies, such as the adorned wall veil, which were instrumental in bringing focus to structures that were previously unconsidered. *John Ruskin and the Fabric of Architecture*

examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface. The creative act in architecture, analogous to the divine act of creation, was viewed as a form of dressing. By adding highly aesthetic features to designs, taking inspiration from the 'veil' of women's clothing, Ruskin believed that buildings could be transformed into meaningful architecture. This volume discusses the importance of Ruskin's surface theory and the myth of feminine architecture, and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper's historicist perspective. This book would be beneficial to students and academics of architectural history and theory, gender studies and visual studies who wish to delve into Ruskin's theories and to further understand his capacity for thinking beyond the historical methods. The book will also be of interest to architectural practitioners, particularly Ruskin's theory of surface architecture.

Race and the Obama Phenomenon G. Reginald Daniel, Hettie V. Williams, 2014-07-17 The concept of a more perfect union remains a constant theme in the political rhetoric of Barack Obama. From his now historic race speech to his second victory speech delivered on November 7, 2012, that striving is evident. "Tonight, more than two hundred years after a former colony won the right to determine its own destiny, the task of perfecting our union moves forward," stated the forty-fourth president of the United States upon securing a second term in office after a hard-fought political contest. Obama borrows this rhetoric from the founding documents of the United States set forth in the US Constitution and in Abraham Lincoln's "Gettysburg Address." How naive or realistic is Obama's vision of a more perfect American union that brings together people across racial, class, and political lines? How can this vision of a more inclusive America be realized in a society that remains racist at its core? These essays seek answers to these complicated questions by examining the 2008 and 2012 elections as well as the events of President Obama's first term. Written by preeminent race scholars from multiple disciplines, the volume brings together competing perspectives on race, gender, and the historic significance of Obama's election and reelection. The president heralded in his November 2012, acceptance speech, "The idea that if you're willing to work hard, it doesn't matter who you are, or where you come from, or what you look like . . . whether you're black or white, Hispanic or Asian or Native American." These essayists argue the truth of that statement and assess whether America has made any progress toward that vision.
