**Yesterday's Monsters** Hadar Aviram, 2020-02-18 In 1969, the world was shocked by a series of murders committed by Charles Manson and his “family” of followers. Although the defendants were sentenced to death in 1971, their sentences were commuted to life with parole in 1972; since 1978, they have been regularly attending parole hearings. Today all of the living defendants remain behind bars. Relying on nearly fifty years of parole hearing transcripts, as well as interviews and archival materials, Hadar Aviram invites readers into the opaque world of the California parole process—a realm of almost unfettered administrative discretion, prison programming inadequacies, high-pitched emotions, and political pressures. *Yesterday's Monsters* offers a fresh longitudinal perspective on extreme punishment.

The Beatles Lyrics Hunter Davies, 2025-05-01 Rich with insider authenticity...Gives us a glimpse into genius: the definitive book of Beatles songs, shown as first written by their own hands and put into authoritative context ( Wall Street Journal). For the Beatles, writing songs was a process that could happen anytime — songs we all know by heart often began as a scribble on the back of an envelope or on hotel stationery. These original documents have ended up scattered across the world at museums and universities and with collectors and friends. Many have never been published before. More than 100 songs and lyrics are reproduced in *The Beatles Lyrics*, providing Hunter Davies a unique platform to tell the story of the music. The intimacy of these reproductions — there are sections crossed out and rewritten, and words tossed into the final recordings that were never written down — ensures that *The Beatles Lyrics* will be a treasure for musicians, scholars, and fans everywhere. A fascinating, intimate glimpse into the creative process behind some of the greatest pop songs ever written. — Christian Science Monitor

**Reading Song Lyrics** Glenn Fosbraey, 2025-08-05 This book will provide an exploration of how popular songs have been analysed in the past, before detailing how an interdisciplinary approach is necessary to appreciate the multimodal format of the medium. Beginning by examining what we can gain from staying 'inside' the song, it will explore the role the listener has in determining meaning within a song, before moving on to how, through their lyrics, songwriters can persuade their audience to react in the desired ways. Lyrical storytelling will also be analysed, in terms of the narratives we find within individual songs, but also through 'song sequences' where the story spans multiple songs across different projects, and also the 'concept album' format. As we move 'outside' the song, we see what can be offered in terms of cultural significance, the difference between real events and their lyrical representations, how the format we listen to music in influences our readings, and to what extent visual materials affect our relationships with songs.

**Resounding Pasts** Drago Momcilovic, 2020-05-15 The field of memory studies has long been preoccupied with the manner in which events from the past are commemorated, forgotten, re-fashioned, or worked through on both the individual and collective level. Yet in an age when various modes of artistic and cultural commemoration have begun to overlap with and respond to one another, the dynamics of cultural remembering and forgetting become bound up in an increasingly elaborate network of representations that operate both within and outside temporal, cultural, and national borders. As publicly circulating texts that straddle the line between cultural artifact and artistic object, both musical and literary works, both individually and often in conjunction with one another, help shape cultural memories and individual experiences of those events. Troping their cultural milieux through specific aesthetic and social forms, genres, and modes of dissemination, music and literature become part of a growing global panoply of raw materials upon which we might begin to pose questions regarding the way we remember, the consequences of sharing and passing on those memories, and the aesthetic and cultural pressures attendant upon the circulation and interpretation of texts that (re-)sound the past.

**The Encyclopedia of Popular Music** Colin Larkin, 2011-05-27 This text presents a comprehensive and up-to-date reference work on popular music, from the early 20th century to the present day.

**How to Write Lyrics** Rikky Rooksby, 2021-09-15 Lyrics sheds light on all aspects of writing lyrics for music and will make lyricists and songwriters feel more confident and creative when they tackle lyrics. It's perfect for all songwriters: those who don't like their own lyrics and find lyrics difficult to write, experienced writers looking for a creative edge, and those offering lyrics to set to music in a partnership. The book discusses channeling personal experiences into lyrics, overcoming writer's block, the right lyrics for a bridge, the separation between lyrics and poetry, exploring imagery and metaphor, avoiding clichés, and more. It also offers tips on the various styles of lyrics, from protests, spirituals, and confessionals to narratives and comic songs. New to this edition are artist and song references throughout to reflect musical history to date. Also, a new section provides examples of taking lyric ideas right through the drafting process, illustrating development and

re-drafting and using a handful of contrasting approaches.

**The Creativity Code** Marcus Du Sautoy, 2020-03-03 “A brilliant travel guide to the coming world of AI.” —Jeanette Winterson What does it mean to be creative? Can creativity be trained? Is it uniquely human, or could AI be considered creative? Mathematical genius and exuberant polymath Marcus du Sautoy plunges us into the world of artificial intelligence and algorithmic learning in this essential guide to the future of creativity. He considers the role of pattern and imitation in the creative process and sets out to investigate the programs and programmers—from Deep Mind and the Flow Machine to Botnik and WHIM—who are seeking to rival or surpass human innovation in gaming, music, art, and language. A thrilling tour of the landscape of invention, *The Creativity Code* explores the new face of creativity and the mysteries of the human code. “As machines outsmart us in ever more domains, we can at least comfort ourselves that one area will remain sacrosanct and uncomputable: human creativity. Or can we?...In his fascinating exploration of the nature of creativity, Marcus du Sautoy questions many of those assumptions.” —Financial Times “Fascinating...If all the experiences, hopes, dreams, visions, lusts, loves, and hatreds that shape the human imagination amount to nothing more than a ‘code,’ then sooner or later a machine will crack it. Indeed, du Sautoy assembles an eclectic array of evidence to show how that’s happening even now.” —The Times

*Arts and Humanities in Progress* Dario Martinelli, 2016-10-13 The book aims to introduce a research concept called Numanities, as one possible attempt to overcome the current scientific, social and institutional crisis of the humanities. Such crisis involves their impact on, and role within, society; their popularity among students and scholars; and their identity as producers and promoters of knowledge. The modern western world and its economic policies have been identified as the strongest cause of such a crisis. Creating the conditions for, but in fact encouraging it. However, a self-critical assessment of the situation is called for. Our primary fault as humanists was that of stubbornly thinking that the world’s changes could never really affect us, as – we felt – our identity was sacred. In the light of these approaches, the main strengths of humanities have been identified in the ability to: promote critical thinking and analytical reasoning; provide knowledge and understanding of democracy and social justice; develop leadership, cultural and ethical values. The main problems of humanities are the lack economic relevance; the socio-institutional perception of them as “impractical” and unemployable; the fact that they do not match with technological development. Finally, the resulting crisis consists mainly in the absence (or radical reduction) of funding from institutions; a decrease in student numbers a decrease in interest; a loss of centrality in society. A Numanities (New Humanities) project should consider all these aspects, with self-critical assessment on the first line. The goal is to unify the various fields, approaches and also potentials of the humanities in the context, dynamics and

problems of current societies, and in an attempt to overcome the above-described crisis. Numanities are introduced not as a theoretical paradigm, but in terms of an “umbrella-concept” that has no specific scientific content in it: that particularly means that the many existing new fields and research trends that are addressing the same problems (post-humanism, transhumanism, transformational humanities, etc.) are not competitors of Numanities, but rather possible ways to them. Therefore, more than a theoretical program, Numanities intend to pursue a mission, and that is summarized in a seven-point manifesto. In the light of these premises and reflections, the book then proceeds to identify the areas of inquiry that Numanities, in their functions and comprehensive approach, seek to cover. The following list should also be understood as a statement of purposes for this entire book series. These, in other words, will be the topics/areas we intend to represent. Once elaborated on the foundations of Numanities, the book features a second part that presents two case studies based on two relatively recent (and now updated) investigations that the author has performed in the fields of musical and animal studies respectively. The two cases (and relative areas of inquiry) were selected because they were considered particularly relevant within the discussion of Numanities, and in two different ways. In the first case-study the author discussed the most typical result (or perhaps cause?) of the technophobic attitude that was addressed in the first part of the book: the issue of “authenticity”, as applied, in the author's particular study, to popular music. In the second case-study, he analyzes two different forms of comparative analysis between human and non-human cognition: like in the former case, this study, too, is aimed at a critical commentary on (what the author considers) redundant biases in current humanistic research – anthropocentrism and speciesism.

*Peter Gzowski* R.B. Fleming,2010-08-27 Born in 1934, Peter Gzowski covered most of the last half of the century as a journalist and interviewer. This biography, the most comprehensive and definitive yet published, is also a portrait of Canada during those decades, beginning with Gzowski's days at the University of Toronto's *The Varsity* in the mid 1950s, through his years as the youngest-ever managing editor of *Maclean's* in the 1960s and his tremendous success on CBC's *Morningside* in the 1980s and 1990s, and ending with his stint as a *Globe and Mail* columnist at the dawn of the 21st century and his death in January 2002. Gzowski saw eight Canadian Prime Ministers in office, most of whom he interviewed, and witnessed everything from the Quiet Revolution in Québec to the growth of economic nationalism in Canada's West. From the rise of state medicine to the decline of the patriarchy, Peter was there to comment, to resist, and to participate. Here was a man who was proud to call himself Canadian and who made millions of other Canadians realize that Canada was, in what he claimed was a Canadian expression, not a bad place to live.

**The Creative Curve** Allen Gannett, 2018-06-12 Big data entrepreneur Allen Gannett overturns the mythology around creative genius, and reveals the science and secrets behind achieving breakout commercial success in any field. We have been spoon-fed the notion that creativity is the province of genius -- of those favored, brilliant few whose moments of insight arrive in unpredictable flashes of divine inspiration. And if we are not a genius, we might as well pack it in and give up. Either we have that gift, or we don't. But Allen shows that simply isn't true. Recent research has shown that there is a predictable science behind achieving commercial success in any creative endeavor, from writing a popular novel to starting up a successful company to creating an effective marketing campaign. As the world's most creative people have discovered, we are enticed by the novel and the familiar. By understanding the mechanics of what Gannett calls "the creative curve" - the point of optimal tension between the novel and the familiar - everyone can better engineer mainstream success. In a thoroughly entertaining book that describes the stories and insights of everyone from the Broadway team behind *Dear Evan Hansen*, to the founder of Reddit, from the Chief Content Officer of Netflix to Michelin star chefs, Gannett reveals the four laws of creative success and identifies the common patterns behind their achievement.

Roll Over Adorno Robert Miklitsch, 2012-02-01 What happens when Theodor Adorno, the champion of high, classical artists such as Beethoven, comes into contact with the music of Chuck Berry, the de facto king of rock 'n' roll? In a series of readings and meditations, Robert Miklitsch investigates the postmodern nexus between elite and popular culture as it occurs in the audiovisual fields of film, music, and television—ranging from Gershwin to gangsta rap, Tarantino to *Tongues Untied*, Tony Soprano to *Buffy the Vampire Slayer*, Miklitsch argues that the aim of critical theory in the new century will be to describe and explain these commodities in ever greater phenomenological detail without losing touch with those evaluative criteria that have historically sustained both *Kulturkritik* and classical aesthetics.
