Elliott Carter's Late Music John Link,2022-01-27 Elliott Carter was born four months after Orville Wright demonstrated the Wright Brothers' Flyer to the U.S. Army, and he died two months after the Voyager 1 spacecraft left the heliosphere at the threshold of interstellar space. Carter's remarkable longevity, and the unusual trajectory of his life and work through more than a century of disruptive change, has affected the reception history of his music in ways that we are only beginning to acknowledge. Over the course of a nearly eighty-year-long career, Carter leveraged his advantages and turned obstacles into opportunities with admirable persistence. He chose projects that not only interested him but also fit into the plans for artistic and professional development that he cultivated assiduously over decades. And he paid close attention to how his artistic objectives could be presented most effectively to the performers, listeners, and patrons on whom his career depended. Together with his wife Helen Frost-Jones Carter, he skillfully steered a course through the turbulent waters of the twentieth and early twenty-first centuries with steadily increasing success. The story of Carter's artistic life, as he told it and as it was promoted by several generations of advocates, is one of independence, uncompromising vision, and technical progress. It was astutely tailored to the beliefs and values of its intended audience and, as autobiography, it reports selectively and glosses over or omits events and attitudes deemed unhelpful in building Carter's reputation and authority, and promoting his music--

MacDowell E. Douglas Bomberger,2013-07-17 Edward MacDowell was born on the eve of the Civil War into a Quaker family in lower Manhattan, where music was a forbidden pleasure. With the help of Latin-American émigré teachers, he became a formidable pianist and composer, spending twelve years in France and Germany establishing his career. Upon his return to the United States in 1888 he conquered American audiences with his dramatic Second Piano Concerto and won his way into their hearts with his poetic Woodland Sketches. Columbia University tapped him as their first professor of music in 1896, but a scandalous row with powerful university president Nicholas Murray Butler spelled the end of his career. MacDowell died a broken man four years later, but his widow Marian kept his spirit alive through the MacDowell Colony, which she founded in 1907 in their New Hampshire home, and which is today the oldest and one of the most influential, thriving artist colonies in the the United States. Drawing on private letters that were sealed for fifty years after his death, this biography traces MacDowell's compelling life story, with new revelations about his Quaker childhood, his efforts to succeed in the insular German music world, his mysterious death, and his lifelong struggle with Seasonal Affective Disorder. Edward MacDowell's story is a timeless tale of human strength and weakness set in one of the most vibrant periods of American musical history, when optimism about the country's artistic future made anything seem possible.

The Harvard Biographical Dictionary of Music Don Michael Randel,1996 Biographical dictionary emphasizes classical and art music; also gives ample attention to the classics as well as Jazz, Blues, rock and pop, and hymns and showtunes across the ages.
