Manual para el cultivo de frutales en el trópico: Feijoa Omar Camilo Quintero,2012-01-01 Un nuevo libro en manos del público es muy significativo para una sociedad, pero un libro calificado como de gran tamaño y que a la vez haga referencia a una actividad que, como los frutales para Colombia, puede constituirse al lado del café, las flores y el banano en referente obligado de nuestra identidad ante el mundo en los próximos 20 años, tiene una altísima dosis de motivación, no solo desde el punto de vista de los estudiosos de la fruticultura -especialistas y neófitos- sino, principalmente, desde el ángulo de los inversionistas y de los diseñadores de políticas públicas, que tendrán el reto de hacer realidad lo que hasta hoy ha sido una mera lisonja: el tránsito real de una fruticultura de patio a una fruticultura comercial con claros entronques en los principales mercados internacionales. Por esta razón, y porque en las actuales circunstancias nuestro país tiene dentro de sus apuestas productivas y comerciales, en el marco de los tratados de libre comercio, esperanzas ciertas en este importante renglón productivo, para el Ministerio de Agricultura y Desarrollo Rural más que pertinente resulta oportuno y reconfortante presentar el libro Manual para el cultivo de frutales en el trópico, que a través de 1024 páginas reúne la experiencia y la visión de un selecto grupo de 48 autores y coautores de reconocida trascendencia en el ámbito de la docencia, de la investigación y del propio ejercicio profesional, en una mixtura que recoge, de manera integral y propicia, los diferentes quehaceres de la actividad frutícola con identidad nacional, pero naturalmente con aplicación a la fruticultura del trópico en general.

Mercadeo agropecuario una estrategia de gestión empresarial Gloria Acened Puentes Montañez,Ana Milena Serrano Amado,Nancy Cristina Sanabria Neira,2021-06-03 El mercadeo agropecuario es un elemento clave en la formación de profesionales del sector agrario, puesto que las nuevas dinámicas y tendencias socioeconómicas, tecnológicas y culturales que interactúan en el contexto económico global y local, integran y articulan cada vez más a productores y consumidores. Este libro se considera como un instrumento útil y didáctico para fortalecer la fundamentación teórica del marketing aplicado y apoyar la actividad académica y práctica de estudiantes, docentes, agroempresarios e instituciones públicas y privadas, relacionados con la temática y gestión del desarrollo rural. Intenta introducir al lector en los conceptos básicos acompañados de datos reales, aportados por la experiencia de las autoras en el desarrollo de proyectos y trabajos realizados en el marco de acción del Grupo de Investigación CERES de la Universidad Pedagógica y Tecnológica de Colombia. El documento es una contribución a la discusión y profundización de diferentes enfoques y metodologías de análisis y práctica de los mercados, para la formulación de alternativas de solución a la problemática de comercialización de productos agropecuarios.

**Postharvest Biology and Technology of Tropical and Subtropical Fruits** Elhadi M. Yahia,2011-06-30 While products such as bananas, pineapples, kiwifruit and citrus have long been available to consumers in temperate zones, new fruits such as lychee, longan, carambola, and mangosteen are now also entering the market. Confirmation of the health benefits of tropical and subtropical fruit may also promote consumption further. Tropical and subtropical fruits are particularly vulnerable to postharvest losses, and are also transported long distances for sale. Therefore maximising their quality postharvest is essential and there have been many recent advances in this area. Many tropical fruits are processed further into purees, juices and other value-added products, so quality optimisation of processed products is also important. The books cover current state-of-the-art and emerging post-harvest and processing technologies. Volume 1 contains chapters on particular production stages and issues, whereas Volumes 2, 3 and 4 contain chapters focused on particular fruit. Chapters in Volume 4 review the factors affecting the quality of different tropical and subtropical fruits from mangosteen to white sapote. Important issues relevant to each product are discussed, including means of maintaining quality and minimising losses postharvest, recommended storage and transport conditions and processing methods, among other topics. With its distinguished editor and international team of contributors, Volume 4 of Postharvest biology and technology of tropical and subtropical fruits, along with the other volumes in the collection, are essential references both for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area. - Along with the other volumes in the collection, Volume 4 is an essential reference for professionals involved in the postharvest handling and processing of tropical and subtropical fruits and for academics and researchers working in the area - Reviews factors affecting the quality of different tropical and subtropical fruits, concentrating on postharvest biology and technology - Important issues relevant to each particular fruit are discussed, such as postharvest physiology, preharvest factors affecting postharvest quality and pests and diseases
