River Jordan Rachel Havrelock, 2011-12 As the site of several miracles in the Jewish and Christian traditions, the Jordan is one of the world's holiest rivers. It is also the major political and symbolic border contested by Israelis and Palestinians. Combining biblical and folkloric studies with historical geography, Rachel Havrelock explores how the complex religious and mythological representations of the river have shaped the current conflict in the Middle East. Havrelock contends that the intractability of the Israeli-Palestinian conflict stems from the nationalist myths of the Hebrew Bible, where the Jordan is defined as a border of the Promised Land. Both Israelis and Palestinians claim the Jordan as a necessary boundary of an indivisible homeland. Examining the Hebrew Bible alongside ancient and modern maps of the Jordan, Havrelock chronicles the evolution of Israel's borders based on nationalist myths while uncovering additional myths that envision Israel as a bi-national state. These other myths, she proposes, provide roadmaps for future political configurations of the nation. Ambitious and masterful in its scope, *River Jordan* brings a fresh, provocative perspective to the ongoing struggle in this violence-riddled region.

In Search of the River Jordan James Fergusson, 2023-03-14 A writer's travels along the legendary yet contested Jordan River—exploring the long conflict over water supply Access to water has played a pivotal role in the Israel-Palestine dispute. Israel has diverted the River Jordan via pipes and canals to build a successful modern state. But this has been at the expense of the region's cohabitants. Gaza is now so water-stressed that the United Nations has warned it could soon become uninhabitable; its traditional water source has been ruined by years of over-extraction and mismanagement, the effects exacerbated by years of crippling blockade. Award-winning author and journalist James Fergusson travels to every corner of Israel and Palestine telling the story of the River Jordan and the fierce competition for water. Along the way, he meets farmers, officials, soldiers, refugees, settlers, rioting youth, religious zealots, water experts, and engineers on both sides of the Green Line. Fergusson gives voice to the fears and aspirations of the region's inhabitants and highlights the centrality of water in negotiating future peace.

Maps of Paradise Alessandro Scafi, 2014-02-15 Where is paradise? It always seems to be elsewhere, inaccessible, outside of time. Either it existed yesterday or it will return tomorrow; it may be just around the corner, on a remote island, beyond the sea. Across a wide range of cultures, paradise is located in the distant past, in a longed-for future, in remote places or within each of us. In particular, people everywhere in the world share some kind of nostalgia for an innocence experienced at the beginning of history. For two millennia, learned Christians have wondered where on earth the primal paradise could have been located. Where was the idyllic Garden of Eden that is described in the Bible? In the Far East? In equatorial Africa? In Mesopotamia? Under the sea? Where were Adam and Eve created in their unspoiled perfection? Maps of Paradise charts the diverse ways in which scholars and mapmakers from the eighth to the twenty-first century rose to the challenge of identifying the location of paradise on a map, despite the certain knowledge that it was beyond human reach. Over one hundred

illustrations celebrate this history of a paradox: the mapping of the unmappable. It is also a mirror to the universal dream of perfection and happiness, and the yearning to discover heaven on earth.

Mapping Jordan Through Two Millennia JohnR. Bartlett, 2017-07-05 This book shows how travellers and scholars since Roman times have put together their maps of the land east of the River Jordan. It traces the contribution of Roman armies and early Christian pilgrims and medieval European travellers, Crusading armies, learned scholars like Jacob Ziegler, sixteenth-century mapmakers like Mercator and Ortelius, eighteenth-century travellers and savants, and nineteenth-century biblical scholars and explorers like Robinson and Smith, culminating in the late-nineteenth century surveyors working for the Palestine Exploration Fund. This original and valuable book shows, with full illustrations, how maps of the Transjordan region developed through the centuries, and with its detailed tables and bibliography will aid future scholars in further research. The author took part in archaeological excavations and surveys in Jordan, was Associate Professor of Biblical Studies and Fellow at Trinity College Dublin, has published research papers and books on ancient Jordan. John Bartlett was the editor of the Palestine Exploration Quarterly, and until recently was the Chairman of the Palestine Exploration Fund.

Mapping the Middle East Zayde Antrim, 2018-04-15 Mapping the Middle East explores the many ways people have visualized the vast area lying between the Atlantic Ocean and the Oxus and Indus River Valleys over the past millennium. By analyzing maps produced from the eleventh century on, Zayde Antrim emphasizes the deep roots of mapping in a region too often considered unexamined and unchanging before the modern period. As Antrim argues, better-known maps from the nineteenth and twentieth centuries—a period coinciding with European colonialism and the rise of the nation-state—not only obscure this rich past, but also constrain visions for the region’s future. Organized chronologically, Mapping the Middle East addresses the medieval “Realm of Islam;” the sixteenth- to eighteenth-century Ottoman Empire; French and British colonialism through World War I; nationalism in modern Turkey, Iran, and Israel/Palestine; and alternative geographies in the twentieth and twenty-first centuries. Vivid color illustrations throughout allow readers to compare the maps themselves with Antrim’s analysis. Much more than a conventional history of cartography, Mapping the Middle East is an incisive critique of the changing relationship between maps and belonging in a dynamic world region over the past thousand years.
