The Word for World is Forest Ursula K. Le Guin, 2010-07-06 The award-winning masterpiece by one of today's most honored writers, Ursula K. Le Guin! The Word for World is Forest When the inhabitants of a peaceful world are conquered by the bloodthirsty yumens, their existence is irrevocably altered. Forced into servitude, the Athsheans find themselves at the mercy of their brutal masters. Desperation causes the Athsheans, led by Selver, to retaliate against their captors, abandoning their strictures against violence. But in defending their lives, they have endangered the very foundations of their society. For every blow against the invaders is a blow to the humanity of the Athsheans. And once the killing starts, there is no turning back. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Forest Urbanisms Bruno De Meulder, Kelly Shannon, 2024-10-15 A radical redefinition of how humanity occupies the earth — through forests, agriculture, and settlement — and rearticulates environmental stewardship by intertwining ecologies and urbanisms, this publication brings together essays by scholars in forestry, urbanism and other disciplines, designers, practitioners and policy makers. It explores the multifaceted notion of forest urbanisms, including a conceptual framing essay; contributions from the sciences such as bioscience engineering, architecture, urbanism and public policy; contemporary forest urbanism projects and explorative essays that make tangible an agenda for the 21st century. With descriptions of both built and non-built projects from around the globe, the essays show how such projects substantiate a radical shift in humankind's occupation of the world, where ecologies and urbanisms converge and agriculture, forests, and settlements are integrated. Forest Urbanisms extends growing research on a new nature-culture relationship, the necessity for trees in cities, and a rebalancing of ecology and urbanism.

Avatar and Nature Spirituality Bron Taylor, 2013-09-30 Avatar and Nature Spirituality explores the cultural and religious significance of James Cameron's film Avatar (2010), one of the most commercially successful motion pictures of all time. Its success was due in no small measure to the beauty of the Pandora landscape and the dramatic, heart-wrenching plight of its nature-venerating inhabitants. To some audience members, the film was inspirational, leading them to express affinity with the film's message of ecological interdependence and animistic spirituality. Some were moved to support the efforts of indigenous peoples, who were metaphorically and sympathetically depicted in the film, to protect their cultures and

environments. To others, the film was politically, ethically, or spiritually dangerous. Indeed, the global reception to the film was intense, contested, and often confusing. To illuminate the film and its reception, this book draws on an interdisciplinary team of scholars, experts in indigenous traditions, religious studies, anthropology, literature and film, and post-colonial studies. Readers will learn about the cultural and religious trends that gave rise to the film and the reasons these trends are feared, resisted, and criticized, enabling them to wrestle with their own views, not only about the film but about the controversy surrounding it. Like the film itself, *Avatar and Nature Spirituality* provides an opportunity for considering afresh the ongoing struggle to determine how we should live on our home planet, and what sorts of political, economic, and spiritual values and practices would best guide us.

Is a River Alive? Robert Macfarlane, 2025-05-20 A New York Times Bestseller A #1 Sunday Times (UK) Bestseller A New York Times New Nonfiction to Read This Spring Recommendation • A Financial Times Best Summer Book of 2025 • A Guardian Nonfiction to Look Forward To in 2025 Pick • A Washington Post Book to Watch For in 2025 From the best-selling author of *Underland* and the great nature writer...of this generation (Wall Street Journal), a revelatory book that transforms how we imagine rivers—and life itself. Hailed in the New York Times as “a naturalist who can unfurl a sentence with the breathless ease of a master angler,” Robert Macfarlane brings his glittering style to a profound work of travel writing, reportage, and natural history. *Is a River Alive?* is a joyful, mind-expanding exploration of an ancient, urgent idea: that rivers are living beings who should be recognized as such in imagination and law. Macfarlane takes readers on three unforgettable journeys teeming with extraordinary people, stories, and places: to the miraculous cloud-forests and mountain streams of Ecuador, to the wounded creeks and lagoons of India, and to the spectacular wild rivers of Canada—imperiled respectively by mining, pollution, and dams. Braiding these journeys is the life story of the fragile chalk stream a mile from Macfarlane's house, a stream who flows through his own years and days. Powered by dazzling prose and lit throughout by other minds and voices, *Is a River Alive?* will open hearts, challenge perspectives, and remind us that our fate flows with that of rivers—and always has.

The Fantastic Other Brett Cooke, George E. Slusser, Jaume Marti-Olivella, 2022-06-08 *The Fantastic Other* is a carefully assembled collection of essays on the increasingly significant question of alterity in modern fantasy, the ways in which the understanding and construction of the Other shapes both our art and our imagination. The collection takes a unique perspective, seeing alterity not merely as a social issue but as a biological one. Our fifteen essays cover the problems posed by the Other, which, after all, go well beyond the bounds of any single critical perspective. With this in mind, we have selected studies to show how insights from deconstruction, Marxism, feminism, and Freudian, Jungian and evolutionary psychology help us understand an issue so central to the act of reading.

Where No Man Has Gone Before Lucie Armitt, 2012 How do women writers use science fiction to challenge assumptions about the genre and its representations of women? To what extent is the increasing number of women writing science fiction reformulating the expectations of readers and critics? From Mary Shelley onwards, women writers have played a central role in the shaping and reshaping of this genre, irrespective of its undeniably patriarchal image. Essays on the work of writers such as Doris Lessing and Ursula Le Guin, Katherine Burdekin, C. L. Moor, Suzette Elgin, Gwyneth Jones, Maureen Duffy and

Josephine Saxton demonstrate that science fiction remains as particularly well-suited to the exploration of woman as 'alien' or 'other' in our culture today, as it was with the publication of *Frankenstein* in 1818.

Fictional Languages in Science Fiction Literature Israel A. C. Noletto, 2024-05-31 *Fictional Languages in Science Fiction Literature* surveys a large number of fictional languages, those created as part of a literary world, to present a multifaceted account of the literary phenomenon of glossopoesis (language invention). Consisting of a few untranslated sentences, exotic names, or even fully-fledged languages with detailed grammar and vocabulary, fictional languages have been a common element of English-language fiction since Thomas More's *Utopia* (1516). Different notions of the functions of such fictional languages in narrative have been proposed: as rooted in phonaesthetics and contextual features, or as being used for characterisation and construction of alterity. Framed within stylistics and informed by narrative theory, literary theory, literary pragmatics, and semiotics, this study combines previous typologies into a new 5-part reading model comprising unique analytical approaches tailored to science fiction's specific discourse and style, exploring the relationship between glossopoesis, world-building, storytelling, interpretation, and rhetoric, both in prose and paratexts.

Dystopias and Utopias on Earth and Beyond Douglas A. Vakoch, 2021-04-29 Caught as we are in a grave climate crisis that seems more irreversible with every passing year, our literary portrayals of the future often feature the dystopian collapse of the world as we know it. Science fiction explores how we got here, while pointing toward a more hopeful path forward. From an ecofeminist perspective, a core cause of our current ecological catastrophe is the patriarchal domination of nature, playing out in parallel with the oppression of women. As an alternative to dystopian futures that seem increasingly inevitable, ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships. *Dystopias and Utopias on Earth and Beyond: Feminist Ecocriticism of Science Fiction* explores the fictional worlds of such canonical novelists as Margaret Atwood, Octavia Butler, Ursula K. Le Guin, Doris Lessing, and Joan Slonczewski, as well as those of lesser-known science fiction writers, as they collectively probe humanity's greatest existential threats. Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues, as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars, which offer liberatory alternatives that might someday be actualized in the real world. By examining the links between the destruction of the environment and the domination of women, *Dystopias and Utopias on Earth and Beyond* provides the tools to counteract those intertwined oppressions, helping create a foundation for a truly habitable world.

Science Fiction and Psychology Gavin Miller, 2020-01-31 *Science Fiction and Psychology* explores science fiction literature's varied use of psychological discourses from the late nineteenth century to the end of the twentieth. The readings explore the varied employment in science fiction of ideas from five key psychological schools – evolutionary psychology,

psychoanalysis, behaviourism, existential-humanism, and cognitivism – and conclude by examining psychology’s use of science fiction.

The Language of the Night Ursula K. Le Guin, 2024-05-14 Featuring a new introduction by Ken Liu, this revised edition of Ursula K. Le Guin’s first full-length collection of essays covers her background as a writer and educator, on fantasy and science fiction, on writing, and on the future of literary science fiction. “We like to think we live in daylight, but half the world is always dark; and fantasy, like poetry, speaks the language of the night.” —Ursula K. Le Guin Le Guin’s sharp and witty voice is on full display in this collection of twenty-four essays, revised by the author a decade after its initial publication in 1979. The collection covers a wide range of topics and Le Guin’s origins as a writer, her advocacy for science fiction and fantasy as mediums for true literary exploration, the writing of her own major works such as *A Wizard of Earthsea* and *The Left Hand of Darkness*, and her role as a public intellectual and educator. The book and each thematic section are brilliantly introduced and contextualized by Susan Wood, a professor at the University of British Columbia and a literary editor and feminist activist during the 1960s and ’70s. A fascinating, intimate look into the exceptional mind of Le Guin whose insights remain as relevant and resonant today as when they were first published.

The Routledge Handbook of Ecofeminism and Literature Douglas A. Vakoch, 2022-09-19 The Routledge Handbook of Ecofeminism and Literature explores the interplay between the domination of nature and the oppression of women, as well as liberatory alternatives, bringing together essays from leading academics in the field to facilitate cutting-edge critical readings of literature. Covering the main theoretical approaches and key literary genres of the area, this volume includes: Examination of ecofeminism through the literatures of a diverse sampling of languages, including Hindi, Chinese, Arabic, and Spanish; native speakers of Tamil, Vietnamese, Turkish, Slovene, and Icelandic Analysis of core issues and topics, offering innovative approaches to interpreting literature, including: activism, animal studies, cultural studies, disability, gender essentialism, hegemonic masculinity, intersectionality, material ecocriticism, postcolonialism, posthumanism, postmodernism, race, and sentimental ecology Surveys key periods and genres of ecofeminism and literary criticism, including chapters on Gothic, Romantic, and Victorian literatures, children and young adult literature, mystery, and detective fictions, including interconnected genres of climate fiction, science fiction, and fantasy, and distinctive perspectives provided by travel writing, autobiography, and poetry This collection explores how each of ecofeminism’s core concerns can foster a more emancipatory literary theory and criticism, now and in the future. This comprehensive volume will be of great interest to scholars and students of literature, ecofeminism, ecocriticism, gender studies, and the environmental humanities.
