

Flora Y Fauna De Mxico Por Estados

United States. Good Neighbor Environmental Board

Mexican Natural Resources Management and Biodiversity Conservation Alfredo Ortega-Rubio, 2018-07-20 This book presents valuable and recent lessons learned regarding the links between natural resources management, from a Socio-Ecological perspective, and the biodiversity conservation in Mexico. It address the political and social aspects, as well as the biological and ecological factors, involved in natural resources management and their impacts on biodiversity conservation. It is a useful resource for researchers and professionals around the globe, but especially those in Latin American countries, which are grappling with the same Bio-Cultural heritage conservation issues.

Ethnobotany of the Mountain Regions of Mexico Alejandro Casas, José Juan Blancas Vázquez, 2023-05-31 Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that “traditional” knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly (the various societies (Society for Economic Botany, International Society of Ethnopharmacology, Society of Ethnobiology, International Society for Ethnobiology, and many regional and national societies in the field currently have thousands of members). Growth has been most robust in

BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.

Estadísticas del medio ambiente. México 1997, 1998-07-31 Esta publicación es el primer trabajo conjunto entre el INEGI y al SEMARNAP (Secretaría de Medio Ambiente, Recursos Naturales y Pesca), el cual apareció impreso originalmente en 1998. Agrupa una serie de estadísticas sobre la situación ambiental, mismas que tienen como objetivo proporcionar a la sociedad un mayor conocimiento sobre el tema y brindar un apoyo para la toma de decisiones. Se integra de cinco capítulos: I. Población, economía y medio ambiente en el mundo, II. Condiciones generales del medio ambiente en México, III. Estadísticas del medio ambiente natural, asentamientos y actividades humanas, IV. Gestión ambiental y V. Perspectivas del trabajo en la elaboración de información del medio ambiente; incluye también un listado de siglas, unidades de medida y abreviaturas utilizadas en el documento, así como un glosario de términos. Debido a la importancia del tema y en razón de que la edición impresa esta agotada, se ofrece ahora esta publicación revisada y corregida en formato electrónico.

La copla en México Aurelio González, 2007 El tema que recorre, desde distintos puntos de vista, el presente libro es la canción lírica a partir de su unidad fundamental que es la copla. El punto de partida de todas estas reflexiones es el Cancionero folklórico de México, obra de extraordinaria envergadura por la cantidad del material recopilado así como por su sistematización. En realidad estos estudios no hubieran sido posibles sin que existiera este trabajo que, si bien no agota las posibilidades de un corpus lírico, ni cubre todas las necesidades del investigador, el material que ofrece es de una riqueza extraordinaria y claramente representativo de lo que es la lírica tradicional en México y es la fuente básica para cualquier estudio.

Biodiversity, Ecosystems, and Conservation in Northern Mexico Jean-Luc E. Cartron, Gerardo Ceballos, Richard Stephen Felger, 2005-08-25 This book describes the biodiversity and biogeography of northern Mexico, documents the biological importance of regional ecosystems and the impacts of human land use on the conservation status of plants and wildlife. It should become the standard source document for the conservation status of species and ecosystems in this region, which is of unusual biological interest because of its high biodiversity and highly varied landscape and biological zonation.
