Educational Developments in South Kashmir Since Indian Independence Maroof Maqbool, 2016-12-01 Since the emergence of civilization, man has been marching in search of knowledge and wisdom. Various research studies have been proposed through education so that humanity, brotherhood and harmony are wedded together. Education is central for making life meaningful and purposeful. Education in India is provided by the public sector as well as the private sector, with control and funding coming from three levels: central, state, and local. Takshasila was the earliest recorded centre of higher learning in India from at least 5th century B.C. and it is debatable whether it could be regarded a university or not. The

Nalanda University was the oldest university system of education in the world. Western education became ingrained into Indian society with the establishment of the British Raj. Since gaining independence, India has made considerable progress in education with reference to overall literacy, infrastructure and universal access and enrolment in schools. This book covers a wide range of important topics on the development of education and its progress at National level. The author is extremely grateful to the number of authors and scholars whose material has been consulted and referred to in this book. The author would heartily welcome and acknowledge queries, suggestions and comments, both from the teachers and the students for further improvement in the next edition.

Changing Architectural Education David Nicol, Simon Pilling, 2005-08-19 Architectural education is under pressure to meet the demands of an evolving construction industry and to cater to the increasingly varied career destinations of graduates. How should architectural education respond to these professional challenges? How can students be better prepared for professional practice? These questions are the focus of this book, which brings together contributions from a wide range of authors, from both the UK and the USA, working in the fields of architectural education, architectural practice and educational research.

Egypt's Strategy to Meet the Sustainable Development Goals and Agenda 2030: Researchers' Contributions El-Sayed E. Omran, Abdelazim M. Negm, 2023-02-01 This book focuses on Egypt as a representative example of emerging economies struggling to achieve their sustainable development goals (SDGs). The Egyptian government has launched Egypt's Vision 2030 in line with the 2030 Agenda, also known as the Sustainable Development Strategy (SDS), which encompasses the economic, social and environmental dimensions of development. It is under the SDS that all development plans in Egypt are incorporated while at the same time being strongly guided by the SDGs. Aware of the principle of shared but differentiated responsibility, Egypt also recognizes that fundamental challenges remain, despite a strong willingness to achieve the SDGs. High birth rates, brain drain phenomena, water scarcity, migration, discrimination against women and girls, a growing informal sector and instability in neighboring states (especially Libya and Syria) are only some of the many hindrances to sustainable development. In order to address these challenges, Egypt relies heavily on the SDGs, which are aimed at transforming our world. Although there is an urgent need for a drastic change in the way we use the Earth, the question arises as to whether the SDGs are sufficient to facilitate such a transformation. This book explores the key environmentally related Sustainable Development Goals (SDGs) and offers a cutting-edge assessment of current progress with a view to reaching these objectives by 2030. The book highlights some of the key findings and ideas for how research may help achieve

the 17 Sustainable Development Goals in enterprises. The book provides a useful framework that can help and aid the Egyptian government to assess the many goals and targets outlined in the 2030 Agenda. The analysis of Egypt can be used as a blueprint for other developing nations and globally in order to guide policy toward achieving the SDGs. Covering food security, water resilience, climate change, agronomics, rural life, environmental impact assessment as a tool for measuring the achievement of the goals, Egyptian education, the COVID-19 pandemic, cultural and societal dimensions, this book will be of great interest to students and scholars of sustainable development and climate change, as well as practitioners and policymakers involved in sustainable development and disaster management.

Teaching Elementary STEM Education Sherri Cianca, 2019-07-19 This textbook offers practical guidelines for integrating science, technology, engineering, and mathematics into the elementary classroom in the context of addressing real-world problems, and cultivating in students high-level thinking and problem-solving skills. Designed to equip teachers and future teachers with tools to create and implement standards-based STEM curriculum and cognitively demanding tasks, author Sherri Cianca offers hands-on, easily implemented strategies that foster student reasoning, autonomy, and humanity. This fresh approach to STEM teaching empowers teachers (preservice and inservice) and other leaders to better understand the standards and better design effective instructional practices. The chapters work together to advance teachers' abilities to achieve mastery-level understanding of content, translate standards into student-friendly curriculum, and create a robust

learning environment. Each chapter contains probes to uncover incomplete and inaccurate conceptions and to focus attention on key learning elements. Chapter summaries and Reflect and Apply sections reinforce professional development, and appendices expand on chapter content and provide rich examples of STEM units, curriculum, and assessment criteria. Dr. Cianca's vision is that teachers serve as well-equipped change agents that will empower their students to transfer STEM learning into applications that will impart a positive impact on our future world.

Fostering Diversity and Inclusion in the Social Sciences Amy Samuels, Gregory L. Samuels, 2021-08-01 The United States' social and economic inequities stood in high relief during the COVID-19 pandemic, spotlighting the glaringly disproportionate systemic injustices related to public health and the economic impact on minoritized communities. Realities of structural and institutionalized racism and classism were exposed to greater degrees as we sought to understand and investigate the inequitable impact regarding health and income disparities for African American, Latinx, and Native American communities, as well as racial violence explicitly targeting Asian American communities. Further exacerbating the polarized sociopolitical landscape amidst the pandemic, the murder of George Floyd in May 2020, witnessed by countless people around the world, resulted in anguish and drew heightened attention to the insidious racial injustice and ongoing racial violence that continues to plague the nation. As many advocates took to the streets in an attempt to have their voices heard in the continued struggle for racial equality, the federal government tried to further silence those who have been historically placed on the margins, including the attack of critical race theory, antiracism work in education, and training for diversity and inclusion. Consequently, it is imperative social science educators are equipped with the knowledge, tools, and dispositions to facilitate learning that explores the implications of power, privilege, and oppression and ask important questions to ensure voices that have been muffled, or silenced altogether, are strategically unsilenced, voiced, and valued. Given the perpetuation of inequities, existing educational disparities, and the continued need for reconciliation, this volume explores how the social sciences can be examined and reimaged to combat injustices and support further diversity, equity, and inclusion. Authors explore how educators can (a) understand how knowledge is constructed, shaped, and influences how students see the world, (b) problematize current curricular approaches and reframe instructional practices, (c) employ a critical lens to attend to and proactively address existing challenges and inequities related to race, (d) infuse their teaching with greater attention to diversity and inclusion for all students; and (e) promote increased awareness, advocacy, and educational justice. Through the examination of research, theory, and practitioner-oriented strategies, the authors encourage reflection, inspire calls for action, and explore how to teach about, proactively challenge, and encourage continued examination of society to support progress through increased critical consciousness, cultural competence, and critical multiculturalism.

Modernization as Lived Experiences Fengshu Liu,2019-11-07 This book examines, in a culturally and contextually sensitive way, the particularity of what it means to be young in post-Mao China undergoing rapid and dramatic transformation by comparing childhood and youth experiences over three generations. The analysis draws on life-history interviews with Beijing young men and women in their last upper secondary year, their parents and their grandparents. The book offers a comprehensive coverage of the various aspects of life pertinent to youth experiences and compares each of these across three generations, treating them as interrelated and mutually affecting processes - childhood, intergenerational relationships, education and future plans, gender and sexuality. By offering both men's and women's accounts of their childhood and youth experiences, which for the three generations combined extend over nearly a century, the book sheds useful light on how gender and sexuality have evolved in China. Fengshu Liu concludes that the young generation's lives feature a 'maximization desire', in sharp contrast to the two older generations' childhood and youth experiences. The book meticulously weaves rich ethnographic details and individual life stories into a larger and unfolding picture of historical, social and cultural trends, while providing critical insight into Chinese modernization and modernity against the backdrop of globalization. It can thus be an enjoyable read also for people beyond the academia interested in China's social and cultural transformation and its children and youth.

Parental Choice? P. L. Thomas,2010-07-01 Education has rarely been absent from local and national public discourse. Throughout the history of modern education spanning more than a century, we have as a culture lamented the failures of public schooling, often making such claims based on assumptions instead of any nuanced consideration of the many influences on teaching and learning in any child's life—notably the socioeconomic status of a student's family. School reform, then, has also been a frequent topic in political discourse and public debate. Since the mid-twentieth century, a rising call for market forces to replace government-run schooling has pushed to the front of those debates. Since *A Nation at Risk* in the early 1980s and the implementation of *No Child Left Behind* at the turn of the twenty-first century, a subtle shift has occurred in the traditional support of public education—fueled by the misconception that private schools out perform public schools along with a naive faith in competition and the promise of the free market. Political and ideological claims that all parents deserve school choice has proven to be a compelling slogan. This book unmasks calls for parental and school choice with a postformal and critical view of both the traditional bureaucratic public school system and the current patterns found the body of research on all aspects of school choice and private schooling. The examination of the status quo and market-based calls for school reform will serve well all stakeholders in public education as they seek to evaluate the quality of schools today and form positions on how best to reform schools for the empowerment of free people in a democratic society.
