*Introducción teórica y práctica a la investigación histórica. Guía para historiar en las ciencias sociales* Renzo Ramírez Bacca, 2010 La tercera parte, Crítica y análisis, ofrece una explicación sobre la función de la crítica de la investigación histórica y las técnicas de análisis para las fuentes de información. El objetivo de la exposición es ofrecer herramientas y técnicas de la denominada crítica de fuentes y del análisis hermenéutico; en especial para el estudio y crítica de documentación escrita primaria, secundaria y digital, así como para materiales audiovisuales, en particular la pintura, la fotografía y el cine. La cuarta parte, fundamentos historiográficos, ofrece una comprensión sucinta de las principales corrientes de la historiografía occidental y sus aportes en la profesionalización y avance epistemológico de la disciplina. Como el título lo indica se trata de un conocimiento de fundamentación disciplinar, más extenso que las otras partes del libro debido a su naturaleza empírico-descriptiva. Esta parte se centra en el historicismo, el marxismo, y la escuela de Annales, toma en cuenta los historiadores y aportes más relevantes, que son vistos en su conjunto desde la perspectiva de su propio contexto académico e histórico. La quinta parte, Escritura, proyectos y fuentes, es un esbozo sobre los distintos tipos de producción y difusión escrita realizados en la disciplina, seguido de un instructivo para el diseño y elaboración de proyectos de investigación, y una introducción al componente empírico del trabajo histórico, en especial para la exploración y búsqueda de fuentes secundarias y primarias.

**Immanuel Wallerstein** Carlos Antonio Aguirre Rojas, 2013-08-08 Singular libro-entrevista, compuesto de dos partes, persigue un doble objetivo: el de servir como introducción a las principales tesis y contribuciones esenciales desarrolladas, en el último cuarto de siglo, por la creativa perspectiva teórica y analítica del "análisis de los sistemas-mundo", y el de

permitir un acercamiento directo a las ideas y a la concepción del más importante constructor de esta perspectiva, Immanuel Wallerstein.

*Constructing Worlds Otherwise* Raúl Zibechi, 2024-04-16 A new collection from one of Latin America's most dynamic radical thinkers—in the tradition of Frantz Fanon and Eduardo Galeano. Constructing Worlds Otherwise sets itself against the recolonization of Latin America by one-dimensional, ethnocentric perspectives that permeate the North American left and block fundamental social change in the Global South. In a provocative mix of polemic and on-the-ground analysis, Raúl Zibechi argues that it is time for radicals in the Global North to learn from the people their governments have colonized and oppressed for centuries. Through a survey of the most marginalized voices across Latin America—feminists, the Indigenous, people of African descent, and inhabitants of urban favelas and shantytowns—he introduces the Anglo world to a range of critical perspectives and new forms of struggle. For Zibechi, real change comes from “societies in movement,” the people already fighting for their survival using egalitarian and traditional models of world-building, without the state, without official representatives, and without vanguards of political experts. His book contributes to global geographies of autonomous and anti-state thinking, with Zibechi placing his work in conversation with the ideological theorist of Kurdish resistance, Abdullah Öcalan, for a rich and dynamic survey of global movements of decolonization. Now more urgent than ever, this translation by George Ygarza Quispe comes at a time when the global left—struggling to expand its vision in a time of climate chaos and rising authoritarianism—finds itself at an impasse, desperate to animate and renew its critical imaginary.

*An Economic History of Europe* Antonio Di Vittorio, 2006-09-27 An Economic History of Europe provides students with a comprehensive introduction to European economic history from the fifteenth century to the present day. Individual chapters offer brief references to previous historical periods and events, with special attention given to core themes concerning economic development, and an analysis of their change through time and space. Core themes examined in each period include: the increasing prominence of industry international trade demand and supply dynamics agriculture. The unique

structure of this text enables students not only to gain a firm grounding in the long-term evolution of the European economy, but also provides an historical overview of the economic development of individual countries. Individual contributors analyze the shift from the modern to the contemporary period and offer a broad explanation of the historical roots of the problems that face today's economic development. This key text is indispensable reading for students in economics, economic history, development economics and history.

**Democracy, Federalism, the European Revolution, and Global Governance** Andrea Bosco,2020-06-10 The European Union is facing today the greatest crisis since its creation. Brexit could mean not only the reversal of its steady enlargement—from 6 to 28 member states—but also the beginning of an inexorable decline leading to its disintegration. However, few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction—democracy and federalism—and the first who tried to realise, in June 1940, a European federation on the basis of an Anglo-French union. This volume traces the fundamental stages of the European unification process, placing it in relation to the wider process of world economic and political integration. In particular, it analyses the historical significance of the European Revolution, which is identified in the overcoming of the nation state—namely the modern political formula which institutionalised the political division of mankind—and the birth of the first truly international state. The universal historical significance of the European Revolution lies in its exportability—as for the other great European revolutions—and, therefore, its potential as progressively extensible to all the states of the planet. Europe was indeed the first region of the world where the barriers between national states fell, and a post-national political identity emerged, complementary to national political identities. It is, in fact, in the context of the European Union that democracy beyond the borders of the nation state has first been realized, constituting a guiding principle for global governance.

**The Postmodernism Debate in Latin America** John Beverley,Michael Aronna,José Oviedo,1995-05-05 Postmodernism may seem a particularly inappropriate term when used in conjunction with a region that is usually thought of as having only recently, and then unevenly, acceded to modernity. Yet in the last several years the concept has risen to the top of the agenda of cultural and political debate in Latin America. This collection explores the Latin American engagement with postmodernism, less to present a regional variant of the concept than to situate it in a transnational framework. Recognizing that postmodernism in Latin America can only inaccurately be thought of as having traveled from an advanced capitalist center to arrive at a still dependent neocolonial periphery, the contributors share the assumption that postmodernism is itself about the dynamics of interaction between local and metropolitan cultures in a global system in which the center-periphery model has begun to break down. These essays examine the ways in which postmodernism not only designates the effects of this transnationalism in Latin America, but also registers the cultural and political impact on an increasingly simultaneous

global culture of a Latin America struggling with its own set of postcolonial contingencies, particularly the crisis of its political left, the dominance of neoliberal economic models, and the new challenges and possibilities opened by democratization. With new essays on the dynamics of Brazilian culture, the relationship between postmodernism and Latin American feminism, postmodernism and imperialism, and the implications of postmodernist theory for social policy, as well as the text of the Declaration from the Lacandon Jungle of the Zapatista National Liberation Army, this expanded edition of boundary 2 will interest not only Latin Americanists, but scholars in all disciplines concerned with theories of the postmodern. Contributors. Xavier Albó, José Joaquín Brunner, Fernando Calderón, Enrique Dussel, Néstor García Canclini, Martín Hopenhayn, Neil Larsen, the Latin American Subaltern Studies Group, Norbert Lechner, María Milagros López, Raquel Olea, Aníbal Quijano, Nelly Richard, Carlos Rincón, Silviano Santiago, Beatriz Sarlo, Roberto Schwarz, and Hernán Vidal

*War, Power and the Economy* A. González Enciso, 2016-10-04 War, Power and the Economy contains a comparative history of Great Britain, France and Spain, the three rival empires of the 1700s. It explores how the states prepared for war, what kind of economic means they had, what institutional changes they implemented, and how efficient this was. As such, the book presents the first comparative synthesis aiming to understand the outcome of the global confrontation in the eighteenth century. Faced with the challenge of paying for new and more costly wars, some countries found flexible ways to get more money and better supplies, whereas others did not. The development of freer colonial markets, the increase of consumption and its taxation, the problems of venal administration or the different systems of patronage with contractors, are some of the factors explaining the divergences that were made clear by 1815. This book explores political and economic dimensions of the eighteenth-century European state in order to explain why and how changes in power as an outcome of war depended upon the available means and the way they were obtained and used. The book takes the idea that making war or preparing for it obliged governments to make important changes in their institutions, so that during the eighteenth century the state in many ways formed itself through war efforts. Ultimately, this study aims to show how closely political and military success was entwined with economic interests. This volume is of great interest to those who study economic history, political economy and European history.

*The Disobedience of Design* Gui Bonsiepe, 2021-12-02 This volume presents for the first time in English a curated selection of writings by the design thinker Gui Bonsiepe from the 1960s to the present day. Addressing as it does questions of non-Western design and a design practice that is both radical and democratic, Bonsiepe's work has assumed new importance for current debates inspired by global political and environmental crises. Structured into three sections, the anthology first addresses Bonsiepe's work on design theory and practice, particularly in relation to the history and contemporary relevance of the Ulm design school, where Bonsiepe was a professor in the 1960s. A second section then represents Bonsiepe's writings

after his move to South America in the 1960s and '70s, where he worked as a design consultant for the Allende government in Chile before the military takeover. In writings from the period, Bonsiepe explores the concept of design 'at the periphery' and the relationship of national design traditions and practices in Latin American countries to those of 'the core' - Western European and American design. The final section comprises selections of Bonsiepe's writings on design in relation to literacy and language, visuality and cognition. This indispensable volume includes new interviews with Bonsiepe as well as his original, previously unpublished texts.

**Dependency, Neoliberalism and Globalization in Latin America** Carlos Eduardo Martins, 2019-12-09 The Marxist Theory of Dependency (TMD) managed to articulate the insertion of peripheral societies into the international market with the capital accumulation processes of each country. It has become an essential theory for the understanding of our societies. Since Ruy Mauro Marini laid out its foundations, many transformations have occurred in global capitalism and in our societies, leaving us the challenge of updating it against a more complex context. The real test of theory is its adequacy as an instrument of understanding contemporary reality. The TMD has been enriched and renewed from this work of Carlos Eduardo Martins. It considers capitalism from the perspective of anti-capitalism, dependence from the standpoint of emancipation and reality through a vision for its revolutionary transformation. Emir Sader - CLACSO General Secretary (2006-2012) This book is a revised edition of a work first published in 2011 as Globalização, dependência e neoliberalismo na América Latina by Boitempo Editorial, São Paulo, Brazil. La teoría marxista de la dependencia (TMD) logró articular la inserción de las sociedades periféricas en el mercado internacional con los procesos de acumulación de capital de cada país. Se ha convertido en una teoría esencial para la comprensión de nuestras sociedades. Desde que Ruy Mauro Marini expuso sus fundamentos, muchas transformaciones ocurrieron en el capitalismo global y en nuestras sociedades, poniendo el desafío de actualización en condiciones más complejas. La prueba real de la teoría es su adecuación como instrumento de comprensión de la realidad contemporánea. La TMD sale enriquecida y renovada de esta obra de Carlos Eduardo Martins dedicada a pensar el capitalismo bajo la perspectiva del anticapitalismo, la dependencia en la óptica de la emancipación y la realidad en la perspectiva de su transformación revolucionaria. Emir Sader - Secretario General CLACSO (2006-2012)

Environment, Social Justice, and the Media in the Age of the Anthropocene Elizabeth G. Dobbins, Luigi Manca, Maria Lucia Piga, 2020-02-17 Environment, Social Justice, and the Media in the Age of Anthropocene addresses three imminent challenges to human society in the age of the Anthropocene. The first challenge involves the survival of the species; the second the breakdown of social justice; and the third the inability of the media to provide global audiences with an adequate orientation about these issues. The notion of the Anthropocene as a geological age shaped by human intervention implies a new understanding of the human context that influences the physical and biological sciences. Human existence continues to be affected by the physical and biological reality from which it evolved but, in turn, it affects that reality as well. This work

addresses this paradox by bringing together the contributions of researchers from very different disciplines in conversation about the complex relationships between the physical/biological world and the human world to offer different perspectives and solutions in establishing social and environmental justice in the age of the Anthropocene.

**Tuna Wars** Steven Adolf, 2019-11-09 Historically, whenever tuna was hauled ashore, the sounds of battle were never far away. 'Tuna Wars' tells the untold story of the power struggles emerging around tuna, from the distant past to your present-day dinner table. In the ancient past, the giant tuna was the first fish to become the basis of a large-scale industry and a 'global' trade that created fortunes: Hannibal was able to finance his elephant campaign on Rome thanks to tuna. From the Middle Ages on, a tuna fishing monopoly on Spain's southern coast allowed the nobility to completely dominate the area and even lead the 'invincible' Armada. When the markets for tuna increased exponentially thanks to technical advances, tuna eventually became a billion-dollar business and one of the most-consumed fish species worldwide. But this massive expansion came at a price. An 18th century monk in Madrid was the first to warn that tuna fisheries needed to be run sustainably for the sake of future generations. And the issue of sustainability would go on to become a game-changer in the modern tuna wars, characterized by new alliances and partnerships, hybrid warfare and commercial power struggles. In addition to accompanying you through the history of tuna and sharing insights into fisheries science and approaches to sustainably managing fisheries, Tuna Wars offers practical guidance on choosing sustainably fished tuna. In short, it will tell you everything you ever wanted to know about tuna, but were afraid to ask.

**El consumo lácteo en España (1950-2020). Auge y caída de la buena alimentación** Fernando Collantes, 2025-06-08 En apenas unas décadas, los países occidentales han pasado de dejar atrás el hambre y la privación a enfrentarse a un tipo diferente de malnutrición: el provocado por los excesos y desequilibrios de las dietas actuales. En este libro, Fernando Collantes se sumerge en un pequeño caso de estudio, el consumo de leche y productos lácteos en España desde 1950 hasta el presente, para comprender mejor el ascenso y caída de la buena alimentación en las sociedades opulentas. Sobre la base de un enfoque teórico inspirado en la socioeconomía de Joseph Schumpeter y con recurso a una variedad de fuentes cuantitativas y cualitativas, el libro explica la transformación de las dietas como resultado de una combinación de cambios en la macroeconomía, la dinámica empresarial de la cadena alimentaria y la cultura del consumo. Collantes identifica dos oleadas de consumo lácteo: la masificación del consumo de leche procesada (1950-1990) y la sustitución de esta por derivados lácteos (1990-presente). Mientras la primera de estas oleadas realizó una contribución importante al bienestar de los españoles, la segunda terminó teniendo impactos negativos tanto en lo nutricional como en lo socioeconómico. Del análisis histórico se deriva una conclusión política: es preciso que el Estado abandone su adhesión a la doctrina del consumidor soberano e implante políticas que promuevan decididamente la buena alimentación.

**Crítica de la Modernidad en América Latina: Hacia una modernidad alternativa de Nuestra América** Roberto

Viesca Dorantes,2020-11-01 La Modernidad nace para diferenciarse de otras épocas. Parte de un imaginario histórico de pretensiones universalistas bajo la lógica de la razón y de la sociedad del progreso. Lo “moderno” significa lo que se vive en el momento. Es una forma de “objetivizar el mundo” mediante saberes filosóficos y concretos que se producen inevitablemente en la atracción de su centro. Así, la secularización de la vida consiste en emprender la razón y el juicio en entramados científicos, metafísicos y lógicos que confluyeron al principio del Renacimiento. Fue este proceso de ruptura con la Edad Media, que los simbolismos abstractos de construcción del “yo” y del sujeto, encontraron cabida en la nueva formación de la sociedad que irrumpía en nuevos procesos de cambios reflexivos de su conciencia. Es entonces, que los procesos de ruptura son parte incondicional de la Modernidad; es la manera de autogenerarse hacia rumbos cílicos de fundación-crisis-fundación con los que se perfecciona, materializa y realiza. Dentro de ella, el discurso social de la individualidad, discurre en el principio óntico (del ser) de la subjetividad, donde se reconoce y se encuentra la modernidad según Hegel. Con la subjetividad y la razón, la Modernidad encuentra un paso reflexivo hacia su propia constitución y conciencia de sí misma, para establecer pautas autorreferidas, como la autorrealización, la autoconciencia, la autorepresentación y su autosignificado. Todas ellas, son modos de “racionalizar” la Modernidad, es decir, de llevarla acabo de acuerdo a su institucionalidad de encontrar un “tiempo moderno”, en la que se sitúa en un marco espacio-temporal presente con relación entre el sujeto y el mundo que ahora es moderno.

Falso movimiento Franco Moretti,2025-07-17 Falso movimiento reúne los artículos de Franco Moretti escritos en los últimos años y traducidos ahora por primera vez al castellano. En estos ensayos, el crítico italiano revisa algunos aspectos fundamentales del giro cuantitativo en los estudios literarios, que ha producido algunas contribuciones ya clásicas para la comparatística contemporánea y las humanidades digitales. Moretti propone un balance crítico de los alcances y las limitaciones del análisis cuantitativo y explora las posibilidades de una aproximación a los fenómenos literarios que, en un único gesto, comprenda tanto a las dimensiones más cuantificables que implica el trabajo con grandes masas textuales como la especificidad que surge de la atención a las formas que, en última instancia, no pueden reducirse a un conjunto de datos.
