Black Engineers in the United States--a Directory James K. K. Ho,1974

Changing the Face of Engineering John Brooks Slaughter,Yu Tao,Willie Pearson,2015-12-15 The underrepresentation of African Americans in STEM fields in general, and in engineering in particular, according to John Slaughter is at best benign neglect, and at worst active discrimination. In one of the first broad-based studies of the African American experience in engineering, Slaughter and his coeditors set out to describe the problem and propose workable solutions in the form of education and public policy initiatives. In this book, twenty-four eminent scholars address this shortfall from a wide variety of disciplinary angles. They draw insight from robust statistical analyses and contextualized analyses grounded in personal narratives of African American engineers and instructors at a diverse set of research institutions with evidenced-based approaches to their success in graduating African American engineers. This definitive volume will certainly be of interest to scholars and policymakers--
