strategies to be used within a Response to Intervention (RtI) framework. In addition to updating all chapters to reflect current research and data, authors Sara Whitcomb and Kenneth Merrell move away from a more narrow view of social skills to reflect an expanded notion of strengths-based assessment, which includes such traits as coping skills, resilience, problem-solving ability, emotional knowledge, and empathy. Barkley Adult ADHD Rating Scale-IV (BAARS-IV) Russell A. Barkley, 2011-02-01 The Barkley Adult ADHD Rating Scale-IV (BAARS-IV) offers an essential tool for assessing current ADHD symptoms and domains of impairment as well as recollections of childhood symptoms. Directly linked to DSM-IV diagnostic criteria, the scale includes both self-report and other-report forms (for example, spouse, parent, or sibling). Not only is the BAARS-IV empirically based, reliable, and valid, but it is also exceptionally convenient to use. The long version takes the average adult 5-7 minutes to complete, and the Quick Screen takes only 3-5 minutes. Special features include a section of items assessing the newly identified symptoms of sluggish cognitive tempo, also known as the inattentive-only subtype of ADHD. Complete instructions for scoring and interpreting the scale are provided. See also the Barkley Deficits in Executive Functioning Scale (BDEFS for Adults), which assesses clinically significant executive functioning difficulties, and the Barkley Functional Impairment Scale (BFIS for

Adults), which evaluates 15 major domains of psychosocial functioning. Includes Permission to Photocopy Enhancing the convenience and value of the BAARS-IV, the limited photocopy license allows purchasers to reproduce the forms and score sheets and yields considerable cost savings over other available scales. The large format and sturdy wire binding facilitate photocopying.

Personality Assessment Robert P. Archer, Steven R. Smith, 2014-04-03 The first edition of *Personality Assessment* provided an overview of the most popular self-report and performance-based personality assessment instruments. The chapter authors were key members in creating or developing the research base for the eight test instruments covered in the book. The text was geared with graduate-level clinical, school, and counseling psychology courses in mind. While still retaining all the attractive features of the first edition, this revision will reflect the advances in the field since 2008. Chapter contributors updated and expanded on reliability and validity data, clinical utility, multicultural considerations, and implications for therapeutic assessment. Another distinctive feature of this second edition is a companion website that features ancillary materials such as PowerPoints and test banks.

Guide to Assessment Scales in Attention-Deficit/Hyperactivity Disorder Scott H Kollins, Elizabeth Sparrow, C Keith Conners, 2011-10-23 A comprehensive guide to the assessment scales, interviews, and questionnaires for ADHD for children, adolescence, and adults. Written by world-renowned experts in psychiatry, specifically in ADHD. Dr Conners' work in this book is invaluable as he is the author of the most widely used assessment scales in the field. A follow-up of the 2003 first edition of the *Guide to Assessment Scales in Attention-Deficit Hyperactivity Disorder* (also written by Dr Conners and Dr Kollins) Concise analysis of the most useful and popular scales assessing ADHD for children, adolescents, and adults. Explains how to most effectively use the top assessment scales in ADHD for children and adults in the context of a clinical practice Expert commentaries highlight the advantages and disadvantages of each scale, in addition to providing a discussion on how and when to administer them. Attention-deficit hyperactivity disorder (ADHD) is the most commonly studied and diagnosed psychiatric disorder in children, affecting about 3-5% of children globally and diagnosed in about 2-16% of school aged children. Additionally, it is a chronic disorder; 30-50% of individuals diagnosed with ADHD in childhood continue to be symptomatic in adulthood. However, with early diagnosis, medical management and behavioral treatment has been most effective when treating patients with ADHD at any age. Assessment scales are critical and essential tools for the diagnosis and treatment of patients with ADHD. This book has been designed to provide clinicians with a quick guide to the most effective assessment scales in ADHD for patients at any age. Additionally, the scales are used in clinical trials to evaluate drug efficacy.

Guide to Psychological Assessment with African Americans Lorraine T. Benuto, Brian D. Leany, 2014-11-20 The movements toward cultural sensitivity and evidence-based practice are watershed developments in clinical psychology. As a population with a long history of substandard treatment from mental health systems, African Americans have especially benefitted from these improvements. But as with other racial and ethnic minorities, finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge. The Guide to Psychological Assessment with African Americans aims to close the evaluation/therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality. Expert contributors analyze scarce and far-flung data, identify strengths and limitations of measures and norms in their use with African-American clients, and advise on avoiding biases in interpreting results. The editors advocate for a theory-based hypothesis-testing approach to assessment when empirical evidence is lacking, and offer guidelines for decision-making that is effective as well as ethnically aware. The Guide's findings, insights, and practical information cover the gamut of test and diagnostic areas, including: IQ and personality. Generalized anxiety disorder, panic, and phobias. Neuropsychological assessment, cognitive decline, and dementia. Mood disorders and suicidality. Forensic assessment, risk, and recidivism. Measures specific to children and adolescents. Plus PTSD, substance disorders, eating pathology, and more. Expertly complementing cross-cultural treatment texts, the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning useful to clinical psychologists, neuropsychologists, and clinical social workers.
