

S About Human Rights

Dr Annabelle Mooney

Human Rights and the Body Dr Annabelle Mooney, 2014-09-28 *Human Rights and the Body* is a response to the crisis in human rights, to the very real concern that without a secure foundation for the concept of human rights, their very existence is threatened. While there has been consideration of the discourses of human rights and the way in which the body is written upon, research in linguistics has not yet been fully brought to bear on either human rights or the body. Drawing on legal concepts and aspects of the law of human rights, Mooney aims to provide a universally defensible set of human rights and a foundation, or rather a frame, for them. She argues that the proper frames for human rights are firstly the human body, seen as an index reliant on the natural world, secondly the globe and finally, language. These three frames generate rights to food, water, sleep and shelter, environmental protection and a right against dehumanization. This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law.

Cultural Heritage, Sustainable Development and Human Rights Laura Pineschi, 2023-12-04 The importance of cultural heritage - in both its tangible and intangible forms - to sustainable development and its economic, social and environmental components is increasingly evident in the recent practice of intergovernmental and non-governmental organizations at the universal and regional level. Due consideration for the integration of the cultural dimension in the implementation of Agenda 2030 has begun to grow in various international fora, including initiatives to emphasize the role and contribution of tangible and intangible heritage as drivers and enablers of sustainable development. It has also been recognized that the inherent links between cultural heritage and sustainable development cannot be correctly addressed without taking into account their various implications for the effective enjoyment of all human rights, including cultural rights. This book offers a thorough academic investigation on the importance of cultural heritage to sustainable development and cultural rights from an international law perspective. Providing an in-depth review of the possible intersections between cultural heritage, sustainable development and cultural rights and the limits of the current legal and institutional framework, it will be of interest to researchers and scholars of international law, cultural heritage law, environmental law and human rights law.

Exporting the European Convention on Human Rights Maria-Louiza Deftou, 2022-10-20 This book explores how the European Convention on Human Rights operates and influences on the global stage. The ECHR and its interpretation by the European Court of Human Rights (ECtHR) considerably echo in and outside Europe. To what degree has that influence translated into its norms, doctrines and methods of interpretation being exported into equivalent systems which also enact the protection of fundamental rights? This book answers that question by exploring the judicial dialogue of the ECHR system with comparable legal orders. Through a horizontal and multifaceted study of regional and global systems, the book identifies the impact of the ECHR within the confines of their jurisprudence to provide scholars in the field of international human rights law with an essential text. Discussing the extent to which the ECHR penetrates into the judicial production of the most affected legal systems, the book mostly focuses on the case law of the Court of Justice of the European Union, the Inter-American Court of Human Rights and the UN Human Rights Committee. It also investigates whether there is room for cross-fertilisation between them and finally, moves on to explore the legal consequences of the interplay of these mechanisms with the ECtHR and what it means for the overall functioning of international human rights law.

The Foundations of International Investment Law Zachary Douglas, Joost Pauwelyn, Jorge E. Viñuales, 2014-05-01 International investment law is one of the fastest growing areas of international law. It has led to the signing of thousands of agreements, mostly in the form of investment contracts and bilateral investment treaties. Also, in the last two decades, there has been an exponential growth in the number of disputes being resolved by investment arbitration tribunals. Yet the legal

principles at the basis of international investment law and arbitration remain in a state of flux. Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime, such as investment, property, regulatory powers, scope of jurisdiction, applicable law, or the interactions with other areas of international law. The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law. It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law. The first part of the book focuses on the 'infrastructure' of the investment regime or, more specifically, on the structural arrangements that have been developed to manage foreign investment transactions and the potential disputes arising from them. The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions. The third part addresses the main sources of 'regime stress' as well as the main legal mechanisms available to manage such challenges to the operation of the regime. Overall, the book offers a thorough investigation of the conflicting theoretical positions underlying international investment law, testing their worth by reference to concrete issues that have arisen in the jurisprudence. It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory.

What's Wrong with Rights? Nigel Biggar, 2020-09-25 Are natural rights 'nonsense on stilts', as Jeremy Bentham memorably put it? Must the very notion of a right be individualistic, subverting the common good? Should the right against torture be absolute, even though the heavens fall? Are human rights universal or merely expressions of Western neo-imperial arrogance? Are rights ethically fundamental, proudly impervious to changing circumstances? Should judges strive to extend the reach of rights from civil Hamburg to anarchical Basra? Should judicial oligarchies, rather than legislatures, decide controversial ethical issues by inventing novel rights? Ought human rights advocates learn greater sympathy for the dilemmas facing those burdened with government? These are the questions that *What's Wrong with Rights?* addresses. In doing so, it draws upon resources in intellectual history, legal philosophy, moral philosophy, moral theology, human rights literature, and the judgments of courts. It ranges from debates about property in medieval Christendom, through Confucian rights-scepticism, to contemporary discussions about the remedy for global hunger and the justification of killing. And it straddles assisted dying in Canada, the military occupation of Iraq, and genocide in Rwanda. *What's Wrong with Rights?* concludes that much contemporary rights-talk obscures the importance of fostering civic virtue, corrodes military effectiveness, subverts the democratic legitimacy of law, proliferates publicly onerous rights, and undermines their authority and credibility. The solution to these problems lies in the abandonment of rights-fundamentalism and the recovery of a richer public discourse about ethics, one that includes talk about the duty and virtue of rights-holders.

Emotion and Traumatic Conflict Michalinos Zembylas,2015-07-01 Do the emotional responses of students and to traumatic conflict constitute insurmountable obstacles in peace education efforts? How do hegemonic narratives shape the emotions of ethnic identity and collective memory, and what can be done pedagogically to transform the powerful influence of such narratives and emotions? Can peace education efforts that foreground emotion in critical ways become a productive pedagogical intervention in conflicted societies? *Emotion and Traumatic Conflict* takes us through an ethnographic journey into a specific site of conflict to show how emotions are entangled with educational efforts towards peacebuilding, healing, and reconciliation. While sociologists, anthropologists, historians, and political scientists have long analyzed the emotional dynamics of conflict and peace, rarely have educators looked into the emotional complexities of traumatic conflict, the impact of emotion in everyday school interactions and pedagogical practices, and the consequences of the role of emotion in what has become known as critical peace education. This book not only offers an analysis of the emotional consequences of traumatic conflict in schools, it also develops an innovative, compelling, and cross-disciplinary perspective on the entanglement of emotion, power, politics, trauma, healing, and critical education. The book provides a detailed ethnographic analysis of the ideological appropriation of emotions of conflict in schools, yet it pushes boundaries further through a theorization of the consequences of this appropriation and the pedagogical interventions required to challenge, undermine, or subvert this process. Zembylas argues that these pedagogical interventions, rooted in both psychoanalytic and socio-political perspectives of trauma and emotion, ought to engage emotions as critical and transformative forces in peace education. Grounded in recent literature on affect and emotion that spans the social sciences, Zembylas's analysis of the emotions of traumatic conflict in education offers a provocative proposal for the role of critical peace education in healing

and reconciliation.
