Life in the Universe James Newsome Pierce,2008 This book explores the science of extraterrestrial life, with a particular emphasis on the existence of intelligent alien civilizations. It introduces the reader to the basic chemistry associated with life on Earth and describes the planetary and stellar environments that allow us to exist. It also discusses the likelihood of alien life developing at other locations in our galaxy, along with the possibility that we will meet or communicate with them. This book is suitable for use as a text in an introductory Life in the Universe course. Alien Experiences Nadine Lalich,Barbara Lamb,2020-09-03 Many current and ancient sources suggest that UFOs and extraterrestrial beings have been visiting the earth and interacting with humans for thousands of years. If this is true, monumental implications arise regarding the origin and evolution of humanity and the future of our planet. This book discusses the highly controversial subject of alien contact and abduction, recounting twenty-five cases of close encounter. The cases included have been selected from the files of psychotherapist, Barbara Lamb, who has been working with abductees since 1991. In her work with 560 individuals, more than 1,800 regressions have revealed encounters with what appear to be non-human life forms. Although extraterrestrial contact is difficult to prove scientifically, the events described in this book are accurate in that they have been presented as they were described by the individuals who experienced them. These are normal men and women living average, responsible lives who have been subjected to extremely unusual events. These individuals display such a compelling sincerity and marked emotional response to their strange experiences there can be no doubt they have experienced some kind of extraordinary event. As a reader, you may be curious about the subject, or you may be a confirmed skeptic. You may also be someone who is investigating unusual occurrences in your own life.

Whatever the case may be, if with an open mind you will simply consider the possibilities inferred by the cases described herein, you might find yourself on the road to a greater vision of reality.

Aliens and Man Jerome A. Kroth,2010 When it comes to extraterrestrials, UFOs, crop circles, and ancient-astronaut literature, most intelligent readers are repulsed by New Age hype, turned off by Erik Van Daniken, flustered by blatant pseudo-science, and deeply chagrined at how even the History Channel got dragged into the tabloid and sensational. Yet many intelligent, open-minded readers harbor secret interests: in the Great Pyramid and how it was built, in mythic tales of sky gods coming and going, from Ezekiel to the Rig-Veda. They are awed by the intricate fractals in crop circles, and they more than take notice when a NASA astronaut says he was trailed in space by UFOs. That questioning readership, however, swims in a vast sea of agnosticism—curious but not convinced. And there just aren't any books for them. None they can trust.

None that reaches them. None that transcends tabloid fantasies to authentically treat issues with enough dispassion and scholarly erudition not to insult their intelligence. Here, Dr. Kroth gives the run-down on a wide range of evidence, and ponders how reliable any of it may be. Readers are left with all the elements to form their own equation.

The One Mind Matthew A. Fike, 2013-10-08 *The One Mind: C. G. Jung and the Future of Literary Criticism* explores the implications of C. G. Jung's *unus mundus* by applying his writings on the metaphysical, the paranormal, and the quantum to literature. As Jung knew, everything is connected because of its participation in universal consciousness, which encompasses all that is, including the collective unconscious. Matthew A. Fike argues that this principle of unity enables an approach in which psychic functioning is both a subject and a means of discovery—psi phenomena evoke the connections among the physical world, the psyche, and the spiritual realm. Applying the tools of Jungian literary criticism in new ways by expanding their scope and methodology, Fike discusses the works of Hawthorne, Milton, Shakespeare, Wordsworth, and lesser-known writers in terms of issues from psychology, parapsychology, and physics. Topics include the case for monism over materialism, altered states of consciousness, types of psychic functioning, UFOs, synchronicity, and space-time relativity. *The One Mind* examines Goodman Brown's dream, Adam's vision in *Paradise Lost*, the dream sequence in *The Wanderer*, the role of metaphor in Robert A. Monroe's metaphysical trilogy, Orfeo Angelucci's work on UFOs, and the stolen boat episode in Wordsworth's *The Prelude*. The book concludes with case studies on Robert Jordan and William Blake. Considered together, these readings bring us a significant step closer to a unity of psychology, science, and spirituality. *The One Mind* illustrates how Jung's writings contain the seeds of the future of literary criticism. Reaching beyond archetypal criticism and postmodern theoretical approaches to Jung, Fike proposes a new school of Jungian literary criticism based on the unitary world that underpins the collective unconscious. This book will appeal to scholars of C. G. Jung as well as students and

readers with an interest in psychoanalysis, literature, literary theory, and the history of ideas.

Exoconsciousness Rebecca Hardcastle PhD, 2008-12-27 Exoconsciousness: Your 21st Century Mind invites readers to advance their consciousness beyond earthly pursuits, beckoning them toward an extraterrestrial identity. Where the mind travels, the body and emotions follow, the author, Rebecca Hardcastle, says. In the 1950s, space exploration prompted many people to contemplate the possibility that humans might well have extraterrestrial origins. From this launching point, Hardcastle conceived Exoconsciousness to describe the extraterrestrial origins, dimensions and abilities of human consciousness. In a short span of fifty years of space exploration, humans are now searching for answers to questions that previously they dared not contemplate, Hardcastle writes. Many questions are obvious, even urgent. Did humans originate off-planet? Are we a seeded race? Who, what and where are our legacies? With whom and how we are connected?

Exoconsciousness answers these questions and many more. Hardcastle broadens the definition of consciousness, integrating personal anecdotes and testimony with contemporary brain research. She asks whether the human brain is balancing to become an extraterrestrial-like unified mind. Exoconsciousness is a heightened physical experience. It demands being fully present in the body, on a cellular, DNA and quantum level, in order to transform quickly and easily. Throughout the book, Hardcastle provides easy-to-use exercises to enhance readers exoconsciousness, as well as an extensive glossary for readers to formulate a new vocabulary. Expand your cosmic awareness with this thought-provoking new guide.

Ancient Alien Ancestors Will Hart, 2017-07-18 Explores evidence for the theory of directed panspermia--that life on Earth and the landscape of Earth itself was engineered by extraterrestrials • Details how the Earth was terraformed through a sophisticated geo-engineering program, providing clear examples such as the precise mathematical longitude configurations of the Great Pyramid of Giza with the major rivers on Earth • Shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional “out of Africa” theory of evolution • Examines the strongest modern UFO accounts, including the Russian Roswell case, as well as the suppressed UFO sightings of NASA astronauts In the early 1970s, Nobel Prize-winning DNA co-discoverer Sir Francis Crick and his colleague Leslie Orgel proposed that in the distant past, an extraterrestrial race sent a spacecraft loaded with microorganisms to seed the Earth with life. Now, more than 40 years later, the fields of space research and biotechnology have advanced to the point where they can back up Crick and Orgel’s claims about our ancient alien ancestors. Sharing scientific evidence of alien involvement with life on our planet and with the very landscape of Earth itself, Will Hart refines the theory of directed panspermia--that life was intentionally seeded on Earth by extraterrestrials--to reveal that the same ET agency also created humans and generated civilization. He shows how the Earth was terraformed through an engineering program so sophisticated and vast that it has escaped our attention so far--for example, the major rivers on Earth are precisely aligned through geo-engineering with the Great Pyramid of Giza. Revealing the Great Pyramid as an alien message in stone, the author explains how the Giza pyramids could not have been built by the ancient Egyptians and examines the extraterrestrial energy technologies used to move the pyramids’ massive stone blocks, methods later rediscovered by Nikola Tesla and the

builder of Coral Castle, Edward Leeds Kalnin. He details how an advanced race implanted the basic genome on Earth as well as genetically engineered the human race and shows how our spectrum of blood types supports the theory of panspermia while directly contradicting the conventional “out of Africa” theory of evolution. Investigating how the extraterrestrial agency behind the origin of civilization is still working behind the scenes today, the author examines the strongest modern UFO accounts, including the Russian Roswell case and the suppressed UFO sightings of NASA astronauts. He shows that this advanced ET civilization is not an alien race in the way we normally think of “aliens”--they are our ancestors and as human as we are.
