Procesos de elaboración de alimentos y bebidas SÁNCHEZ PINEDA DE LAS INFANTAS, M.T.,2003-01-01 Hacia finales del siglo XIX el incremento del conocimiento científico permitió la transformación de la industria artesanal en una industria basada en el conocimiento científico, fenómeno que todavía se persigue en la actualidad. Fue en ese momento cuando se puede considerar que nacieron las Industrias Agrarias. Las Industrias Agrarias emplean fundamentalmente materias primas de origen vegetal o animal cuyas características las hacen fácilmente alterables o degradables. Se trata de materias vivas antes o incluso a veces durante el procesado, cuyos componentes orgánicos constituyen un medio de vida adecuado para el desarrollo microbiano y un sustrato apto para la acción enzimática y el desequilibrio de componentes constitutivos con posibilidad de modificación sensorial y nutricional. Por otra parte, presentan siempre una considerable dispersión en sus propiedades y características tanto en el tiempo como en el espacio lo cual es un grave inconveniente a la hora de elaborar productos que deban responder a una adecuada homogeneidad y ser estables durante el almacenamiento. La obra ha sido dividida en secciones dedicadas a los principales tipos de industrias. En cada uno de los capítulos que componen estas secciones, se abordado el estudio y conocimiento de las materias primas y de los productos elaborados, la ingeniería de diseño y de los procesos elegidos, así como la implantación del sistema APPCC en cada una de las industrias seleccionadas.

El libro de las hamburguesas Fabio Alberti, 2018-12-01 Hay tantas hamburguesas como gente con ganas de comerlas. Infinidad de técnicas y combinaciones; de sabores, de texturas y tipos de cocción. Este es el libro sobre hamburguesas que faltaba, de la mano de uno de los personajes más queridos y graciosos, y famoso por su hamburguesería El Puesto de Fabio! Hoy están muy de moda las hamburguesas gourmet, pero Fabio Alberti se pregunta: ¿es gourmet una bola de carne picada

grasosa, arrojada a una plancha, aplastada y puesta entre dos panes recalentados? Probablemente no, se responde, pero es cierto que en esa simpleza reside el secreto de este sándwich irresistible. Varios años antes de que las hamburguesas se volvieran gourmet, ya existía El Puesto de Fabio, un verdadero pionero. Cuando él ya era una de las estrellas más graciosas de la televisión, pero el food truck aún no se había convertido en el último grito de la gastronomía, Fabio compró una vieja y destalada casa rodante de los 70, la limpió, la tuneó y se puso a vender comida rápida sobre ruedas. Una pregunta lo mantiene andando desde entonces: ¿quedan algo por inventar más allá del medallón de carne con pan, tomate, lechuga, queso y cebolla? Con su estilo práctico y su desparpajo, nos dice que sí y nos zambulle a través de su libro en la magia de este producto simple aunque lleno de posibilidades. Hay tantas hamburguesas como gente con ganas de comerlas. Infinidad de técnicas y combinaciones; de sabores, de texturas y tipos de cocción. El viaje arranca por la madre de todas las hamburguesas, la americana, la clásica, y sigue adelante para enseñarnos, sin perder de vista esa sencillez esencial, a preparar cosas cada vez más espectaculares: con hongos, con brie, con mucho picante; hamburguesas de cerdo, de pollo, de pescado y hasta rebozadas. Pídanla como quieran, prepárenla como más les guste, pero -reclama Fabio- no le digan burger. Al pan, pan y a la hamburguesa, hamburguesa.

Otros temas destacados son la nutrición, las especies acuáticas exóticas invasoras, la pesca continental responsable, la resiliencia en la pesca y la acuicultura y la gobernanza de la tenencia y los derechos del usuario.

Alimentos Pospandemia Claude Kramer, 2021-04-11 El paradigma de alimentación con el que la humanidad llegó al siglo XXI ya no es viable. Ni las millas que recorren los alimentos, ni el desperdicio de comida, ni los flagelos como la obesidad, la diabetes o los trastornos cardiovasculares, provocados directamente por los alimentos y que se relacionan con un 70% de las muertes del mundo. No se trata solamente de sustituir los alimentos a base de animales, ni de la contaminación ambiental que provoca la ganadería, sino de la posibilidad de cambiar las reglas de juego a través de una alimentación nutritiva accesible para el mundo, una especie de democratización (y descentralización) de las proteínas. La tecnología será la matriz del nuevo paradigma. El futuro de la alimentación incluye carne de matriz compleja producida en impresoras 3D, hongos hiperproteicos, micoproteína y otras fermentaciones; ingeniería biológica y un campo aún por explorar en términos de diseño de alimentos para beneficiar directamente nuestra salud.
