Seeking Accountability for Nazi and War Crimes in East and Central Europe Irina Tcherneva,Vanessa Voisin,Eric Le Bourhis,2022 The thirst for post-World War II justice transcended the Cold War and mobilized diverse social groups. This is a story of their multilayered and at times conflictual interactions. In this edited collection, sixteen historians develop a new approach to the trials against persons accused of war crimes and mass murder in Europe during the ascendancy of Nazism and the Second World War (1933-1945). Focusing on the social aspects of the demand for justice and making use of previously underexploited local and international sources, contributors put to the test the notion of show trials and explore a range of judicial and political cultures from Germany to the Soviet Union. Essays uncover the expectations around accountability and forms of mobilization on the part of a range of citizens involved in the trials: survivors, witnesses, perpetrators, Nazi hunters, and civic activists. In addition to the perspective of these citizens, contributors invoke the expertise of reporters, filmmakers, historians, investigators, and prosecutors who shaped public representations of justice. These shaping efforts, the authors show, often supported the desire of political authorities to benefit from the publicity of the trials and to contain the spontaneous dissemination of information. The book's close examination of interactions between citizens and authorities thus demonstrates the extent and limits of what might be called a coproduction of justice, in the process shedding light on the interdependence between historical knowledge and legal prosecution of mass crimes.

The American Ascendancy Michael H. Hunt,2007-04-10 A simple question lurks amid the considerable controversy created by recent U.S. policy: what road did Americans travel to reach their current global preeminence? Taking the long

historical view, Michael Hunt demonstrates that wealth, confidence, and leadership were key elements to America's ascent. In an analytic narrative that illuminates the past rather than indulges in political triumphalism, he provides crucial insights into the country's problematic place in the world today. Hunt charts America's rise to global power from the nineteenth and early twentieth centuries to a culminating multilayered dominance achieved in the mid-twentieth century that has led to unanticipated constraints and perplexities over the last several decades. Themes that figure prominently in his account include the rise of the American state and a nationalist ideology and the domestic effects and international spread of consumer society. He examines how the United States remade great power relations, fashioned limits for the third world, and shaped our current international economic and cultural order. Hunt concludes by addressing current issues, such as how durable American power really is and what options remain for America's future. His provocative exploration will engage anyone concerned about the fate of our republic.

The Problems of Genocide A. Dirk Moses, 2021-02-04 Historically delineates the problems of genocide as a concept in relation to rival categories of mass violence.

Oxford Dictionary of Medical Quotations Peter McDonald, 2004 The Oxford Dictionary of Medical Quotations presents a wonderfully entertaining and eclectic range of quotations covering all aspects of medicine through the ages. It couples profound statements from famous scientists with witty one-liners from the likes of Woody Allen and Spike Milligan. Packed with hundreds of quotations, it is a book that anyone in the medical profession, or with an interest in health, will find an invaluable source of reference and considerable entertainment. A few examples: I'm not afraid to die. I just don't want to be there when it happens. - Woody Allen The only cure for sea-sickness is to sit on the shady side of an old brick church in the country. - English sailors' proverb The nurse should never neglect to attend to the patient's bodily hygiene on the pretext that such measures do little good and are not urgent. - Florence Nightingale

Teaching Central American Literature in a Global Context Gloria Elizabeth Chacón, Mónica Albizúrez Gil, 2022-06-15 Central America has a long history as a site of cultural and political exchange, from Mayan and Nahua trade networks to the effects of Spanish imperialism, capitalism, and globalization. In Teaching Central American Literature in a Global Context, instructors will find practical, interdisciplinary, and innovative pedagogical approaches to the cultures of Central America that are adaptable to various fields of study. The essays map out classroom lessons that encourage students to relate writings and films to their own experience of global interconnectedness and to read critically the history that binds Central America to the United States, Mexico, and the Caribbean. In the context of debates about immigration and a growing Central American presence in the United States, this book provides vital resources about the region's cultural production and covers trends in Central American literary studies including Mayan and other Indigenous literatures, modernismo, Jewish and Afro-descendant literatures, nineteenth- and twentieth-century literature, and contemporary texts and films. This volume

contains discussion of the following authors, filmmakers, and public figures: Humberto Ak'abal, María José Álvarez and Martha Clarissa Hernández, Dennis Ávila, Abner Benaim, Jayro Bustamante, Berta Cáceres, Isaac Esau Carrillo Can, Jennifer Cárcamo, Horacio Castellanos Moya, Quince Duncan, Jacinta Escudos, Regina José Galindo, Francisco Gavidia, Francisco Goldman, Enrique Gómez Carrillo, Gaspar Pedro González, Carlos Cubena Guillermo Wilson, Eduardo Halfon, Tatiana Huezo, Florence Jaugey, Hernán Jimenez, Óscar Martínez, Victor Montejo, Marisol Ceh Moo, Victor Perera, Archbishop Óscar Romero, José Coronel Urtecho, and Marcela Zamora.

Bulletin of the Atomic Scientists ,1985-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world.

Official Secrets Richard Breitman,2022-12-13 Richard Breitman's Official Secrets is an important work based on newly declassified archives. As defeat loomed over the Third Reich in 1945, its officials tried to destroy the physical and documentary evidence about the Nazis' monstrous crimes, about their murder of millions. Great Britain already had some of the evidence, however, for its intelligence services had for years been intercepting, decoding, and analyzing German police radio messages and SS ones, too. Yet these important papers were sealed away as Most Secret, Never to Be Removed from This Office-and they have only now reappeared. Integrating this new evidence with other sources, Richard Breitman reconsiders how Germany's leaders brought about the Holocaust-and when-and reassesses Britain's and America's suppression of information about the Nazi killings. His absorbing account of the tensions between the two powers and the consequences of keeping this information secret for so long shows us the danger of continued government secrecy, which serves none of us well, and the failure to punish many known war criminals.

Justice In Arms Australian Army Legal Corps,2014-01-05 Justice in Arms brings to life a fascinating and important element of Australia's legal history — the role of Army legal officers in Australia and in expeditionary operations from the Boer War until 2000. This is a comprehensive and absorbing history which describes the dynamic interaction of institutional and political imperatives and the personalities who managed this interaction over the decades. It is populated by colourful characters and legal luminaries and demonstrates that military justice is rightly concerned with discipline and cohesiveness. Reflecting broader societal norms, it is also concerned with the rule of law and respect for the rights, liberties and fair treatment of those who serve in the armed forces. Justice in Arms describes the extraordinary contribution of Army legal officers to both the profession of arms and the development of the law, charting the evolving personal and structural relationships between Army legal officers and command dictated by the changing legal needs of the Army and the broader Australian Defence Force. Today Army legal officers apply, adapt and shape the law to meet evolving needs in peacetime and

during armed conflict and peace operations, ensuring the legitimacy of military action and the maintenance of domestic and international support for national objectives.

Diehard Rebels Jason Phillips, 2007 Concentrates on diehard rebel soldiers' faith in Confederate invincibility and reveals the history of southern culture as a continuum rather than a succession of old South, Confederacy, new South.

Attack Politics Emmett H. Buell Jr., Lee Sigelman, 2009-09-01 This second edition of Attack Politics updates Emmett Buell and Lee Sigelman's highly regarded study of negativity in presidential campaigns since 1960 with a substantial new chapter on the 2008 contest between Barack Obama and John McCain. That campaign, the authors contend, proved to be the least negative in the last half century and reinforces their central argument that these campaigns have actually not grown dirtier and more negative since the election of JFK. In this new edition, Buell and Sigelman address the same questions that guided their research in the original book. Who attacked whom? How frequently? On what issues? In what ways? And at what point in the race? They also update their analysis of whether presidential campaigns have gotten more negative since 1960, whether opposing sides addressed the same issues or avoided subjects owned by the other side, and whether trailing candidates wage more negative campaigns than leading candidates. The authors expand their analysis well beyond their original research base—17,000 campaign statements extracted from nearly 11,000 news items in the New York Times—focusing on both presidential and vice-presidential nominees as sources and targets of attacks and examining the actions of surrogate campaigners. They also compare their findings with previously published accounts of these campaigns—including firsthand accounts by candidates and their confidants. Each chapter features echoes from the campaign trail that reflect the invective exchanged by rival campaigns. Their new chapter shows that, rather than neatly resembling either of their typology's extremes (runaways or dead heats), the 2008 race began as a dead heat in late summer but began to take on all the characteristics of a somewhat competitive affair by the end of September. Campaign discourse that began with an anticipated focus on the Iraq War and other national security issues came to be dominated by concerns about the economic meltdown. As the campaign headed toward the home stretch, anxiety about the economy seemed to eclipse national security, health care, immigration, and other concerns. This shift of emphasis, they argue, doomed whatever chance McCain had of winning. Like the first edition, this update of Attack Politics systematically analyzes negative campaigning, pinning down much that has previously been speculated on but left unsubstantiated. It offers the best overview yet of modern presidential races and remains must reading for anyone interested in the vagaries of those campaigns.

The Holocaust Norman Goda, 2016-11-03 The Holocaust: Europe, the World, and the Jews is a readable text for undergraduate students containing sufficient but manageable detail. The author provides a broad set of perspectives, while emphasizing the Holocaust as a catastrophe emerging from an international Jewish question. This text conveys a sense of the Holocaust's many moving parts. It is arranged chronologically and geographically to reflect how persecution, experience, and

choices varied over different periods and places. Instructors may also take a thematic approach, as the chapters have distinct sections on such topics as German decisions, Jewish responses, bystander reactions, and other themes.

The Tokyo Trial Jeanie Maxine Welch, 2001-11-30 Overshadowed for many years by the Nuremberg trials, the Tokyo Trial--one of the major events in the aftermath of World War II--has elicited renewed interest since the 50th anniversary of the war's end. Revelations of previously hidden war crimes, including comfort women and biological warfare, and the establishment of international courts to try Yugoslav and Rwandan war criminals have added to the interest. This bibliography addressees the renewed interest in the Tokyo Trial, providing over 700 citations to official publications, scholarly monographs and journal articles, contemporaneous accounts, manuscript collections, and Web sites. Also included are sources on the Trial's influence on international law and military law and unresolved issues being debated to this day. Defining war crimes after the fact, practicing victor's justice to punish enemies, holding military commanders accountable for their troops' actions--these were issues confronted in the Tokyo Trial and other Asia-Pacific war crimes trials. They are still being investigated, researched, and debated today. This bibliography helps to illuminate these issues from different perspectives, providing a variety of ways to locate relevant English-language sources. The volume also includes citations to contemporary issues stemming from the Asia-Pacific war crimes trials--comfort women, biological warfare, and unresolved issues of reparations and official apologies. The book is a useful guide to sources on all aspects of the Tokyo Trial.

The Nanjing Massacre and the Making of Mediated Trauma Hongtao Li, Shunming Huang, 2021-08-24 Drawing on cultural trauma theory, this book investigates how collective memory of the Nanjing Massacre is fashioned in China and how the mass media, political power and public praxis jointly shape the politics and culture of memory in contemporary China. Allowing for the dimensions of history and different mediating spaces, the authors first conduct textual analysis of news reports from traditional media since the event took place, revealing that the significance of the Massacre was initially portrayed as a local incident before its construction as a national trauma and finally a collective memory. In a study of physical and online memorial spaces, including the Memorial Hall, commemorative activities on the Internet and new media platforms, the book unveils the production and reproduction of trauma narratives as well as how these narratives have been challenged. The final part further studies the interactions between media and other institutional settings while exploring issues of global memory and reconciliation in East Asia. The title will be an essential read for anyone interested in memory studies, media and communication, and particularly the collective memory of the Nanjing Massacre.

The Malmedy Massacre Steven P. Remy, 2017-03-14 During the Battle of the Bulge, Waffen SS soldiers shot 84 American prisoners near Malmedy, Belgium—the deadliest mass execution of U.S. soldiers during World War II. Drawing on newly declassified documents, Steven Remy revisits the massacre and the most infamously controversial war crimes trial in

American history, to set the record straight.
