*Sanctuaries of Earth, Stone, and Light* Gloria Fraser Giffords, 2022-08-23 Over nearly three centuries, Jesuit, Franciscan, and Dominican missionaries built a network of churches throughout the “new world” of New Spain. Since the early twentieth century, scholars have studied the colonial architecture of southern New Spain, but they have largely ignored the architecture of the north. However, as this book clearly demonstrates, the colonial architecture of Northern New Spain—an area that encompasses most of the southwestern United States and much of northern Mexico—is strikingly beautiful and rich with meaning. After more than two decades of research, both in the field and in archives around the world, Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed, she sleuthed through historical records in several countries, and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle, sometimes striking influences of the religious, social, and artistic traditions of Europe (from the beginning of the Christian era through the nineteenth century), of the Muslim countries ringing the Mediterranean (from the seventh through the fifteenth centuries), and of Northern New Spain’s indigenous peoples (whose art influenced the designs of occupying Europeans). *Sanctuaries of Earth, Stone, and Light* is a pathbreaking book, featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.

*El Camino Real de California* Joseph P. Sánchez, 2019-11-01 The arrival of Spaniards in 1769 served as a defining moment for California’s future. They described the First Peoples and their cultures and provided a window into the evolution of California’s Camino Real. In an effort to establish the Camino Real de California as a UNESCO World Heritage Site, Joseph P. Sánchez explores the rich history of the path running from San Diego to San Francisco in this significant study. While records capture the stories and legends of the Camino Real there is little information on the exact ground route. Sánchez utilizes historical and archaeological literature and the documentation from Spanish and Mexican archives to begin the

much-needed process of authentication of this braided corridor to further establish the Camino Real de California's integrity and valuable history, which is shared with Spain, Mexico, and Native American tribes. Their story is part of the patrimony of the Camino Real de California, which ought to be authenticated, preserved, and protected for future generations to enjoy.

*Slave Families and the Hato Economy in Puerto Rico* David M. Stark, 2017-05-24 Scholarship on slavery in the Caribbean frequently emphasizes sugar and tobacco production, but this unique work illustrates the importance of the region's hato economy—a combination of livestock ranching, foodstuff cultivation, and timber harvesting—on the living patterns among slave communities. David Stark makes use of extensive Catholic parish records to provide a comprehensive examination of slavery in Puerto Rico and across the Spanish Caribbean. He reconstructs slave families to examine incidences of marriage, as well as birth and death rates. The result are never-before-analyzed details on how many enslaved Africans came to Puerto Rico, where they came from, and how their populations grew through natural increase. Stark convincingly argues that when animal husbandry drove much of the island's economy, slavery was less harsh than in better-known plantation regimes geared toward crop cultivation. Slaves in the hato economy experienced more favorable conditions for family formation, relatively relaxed work regimes, higher fertility rates, and lower mortality rates.

**California Through Russian Eyes, 1806-1848** James R. Gibson, 2013-10-23 In the early nineteenth century, Russia established a colony in California that lasted until the Russian-American Company sold Fort Ross and Bodega Bay to John Sutter in 1841. This annotated collection of Russian accounts of Alta California, many of them translated here into English from Russian for the first time, presents richly detailed impressions by visiting Russian mariners, scientists, and Russian-American Company officials regarding the environment, people, economy, and politics of the province. Gathered from Russian archival collections and obscure journals, these testimonies represent a major contribution to the little-known history of Russian America. Well educated and curious, the visiting Russians were acute observers, generous in their appreciation of Hispanic hospitality but outspoken in their criticisms of all they found backward or abhorrent. In the various reports and reminiscences contained within this volume, they make astute observations of both Hispanic and Native inhabitants, describing the Catholic missions with their devout friars and neophyte workers; the corruptible Franciscan missionaries; the sorry plight of mission Indians; the Californios themselves, whose religion, language, dwellings, cuisine, dress, and pastimes were novel to the Russians; the economic and social changes in Alta California following Mexican independence; and the schemes of American traders and settlers to draw the province into the United States. Amplified by James R. Gibson's

informative annotations, and featuring a gallery of elegant color illustrations, this unique volume casts new light on the history of Spanish and Mexican California.

*Disaster in the Early Modern World* Ovanes Akopyan, David Rosenthal, 2023-11-17 How did early modern societies think about disasters, such as earthquakes or floods? How did they represent disaster, and how did they intervene to mitigate its destructive effects? This collection showcases the breadth of new work on the period ca. 1300-1750. Covering topics that range from new thinking about risk and securitisation to the protection of dikes from shipworm, and with a geography that extends from Europe to Spanish America, the volume places early modern disaster studies squarely at the intersection of intellectual, cultural and socio-economic history. This period witnessed fresh speculation on nature, the diffusion of disaster narratives and imagery and unprecedented attempts to control the physical world. The book will be essential to specialists and students of environmental history and disaster, as well as general readers who seek to discover how pre-industrial societies addressed some of the same foundational issues we grapple with today.

Medicine and Politics in Colonial Peru Adam Warren, 2010-10-24 By the end of the eighteenth century, Peru had witnessed the decline of its once-thriving silver industry and had barely begun to recover from massive population losses due to smallpox and other diseases. At the time, it was widely believed that economic salvation was contingent upon increasing the labor force and maintaining as many healthy workers as possible. In *Medicine and Politics in Colonial Peru*, Adam Warren presents a groundbreaking study of the primacy placed on medical care to generate population growth during this era. The Bourbon reforms of the eighteenth century shaped many of the political, economic, and social interests of Spain and its colonies. In Peru, local elites saw the reforms as an opportunity to positively transform society and its conceptions of medicine and medical institutions in the name of the Crown. Creole physicians, in particular, took advantage of Bourbon reforms to wrest control of medical treatment away from the Catholic Church, establish their own medical expertise, and create a new, secular medical culture. They asserted their new influence by treating smallpox and leprosy, by reforming medical education, and by introducing hygienic routines into local funeral rites, among other practices. Later, during the early years of independence, government officials began to usurp the power of physicians and shifted control of medical care back to the church. Creole doctors, without the support of the empire, lost much of their influence, and medical reforms ground to a halt. As Warren's study reveals, despite falling in and out of political favor, Bourbon reforms and creole physicians were instrumental to the founding of modern medicine in Peru, and their influence can still be felt today.

A Century of Retablos Charles M. Carrillo, Thomas J. Steele, 2007 In recent years, tremendous attention has been focused on the Arts of 18th and 19th century New Mexico. This colonial period benefited from a creative and religious community that populated the region. Retablos, painted panels depicting saints worshiped in churches and private homes, were an important part of the rich culture. The Lyon Collection beautifully illustrates the breadth of Retablo painting by examining

specific Santo's stylistic development as well as the iconography and social history of each painting. This landmark publication will be of great use to the ongoing study of colonial southwestern art and history. 107 colour illustrations
