Unfortunately, she soon discovers that is only because she's considered Merciless: The Supervillainy without Mercy™'s favorite henchwoman. Determined to prove herself every bit her boyfriend's equal, if not superior, Cindy assembles a team of other villains to go after the largest treasure trove in the world: the hoard of the Dragon King. Merciless has also decided to engage in a little friendly competition that Cindy wants nothing to do with. Can she steal slay the dragon and claim its treasure? Will she let her ego and impatience get in the way? Tales Of Entropy Petteri Hannila, 2021-12-13 *Tales of Entropy* is a story game for 2-6 players. Each player takes a central role in depicting a dramatic scenario that sets the scene for murder and romance, friendship and conflict. The central characters are set against each other from the start, but it is up to the players—and the dice—whether the tense starting situation spirals into chaos and destruction or a blaze of glory at the end. The game is based on a pre-written scenario, on top of which the players build a rich tapestry of content according to their own vision, creating a unique play experience. Each playthrough takes around 2-3 sessions, about 10 hours of playtime. You can play one of the many scenarios created by the other players, or write your own, it is easy and fun. You can send your work to be included in the online scenario database and share your ingenuity with the world. The game book includes ten scenarios ready to play out of the box: Want to tell a tale of power, war and love from the Viking Age, or experience an adventure of Sherlock Holmes in the exotic Limehouse? How about joining a struggling rock band near a breakthrough in the 90s, or defending a child with special needs against an obsessive FBI agent. The choice is yours.

Literature and the Brain Norman Norwood Holland, 2009 *LITERATURE AND THE BRAIN* goes straight to the human core of literature when it explains the different ways our brains convert stories, poems, plays, and films into pleasure. When we are deep into a film or book, we find ourselves absorbed, unaware of our bodies or our surroundings. We don't doubt the existence of Spider-Man or Harry Potter, and we have real feelings about these purely imaginary beings. Our brains are behaving oddly, because we know we cannot act to change what we are seeing. This is only one of the special ways our brains behave to with literature, ways that *LITERATURE AND THE BRAIN* reveals. 474 pp. 13 ill.

Liminality in Fantastic Fiction Sandor Klapcsik, 2012-01-09 This critical work diversifies Victor Turner's concept of liminality, a basic category of postmodernism, in which distinct categories and hierarchies are questioned and limits erode. Liminality involves an oscillation between cultural institutions, genre conventions, narrative perspectives, and thematic binary oppositions. Grounded on this notion, the text investigates the liminality in Agatha Christie's detective fiction, Neil Gaiman's fantasy stories, and Stanislaw Lem's and Philip K. Dick's science fiction. Through an examination of destabilized norms, this analysis demonstrates that liminality is a key element in the changing trends of fantastic texts.

Microbreweries, Nanobreweries, and Brewpubs Joseph Peter Klapatch, 2023-05-09 In the mid-1980s, the American beer market offered far fewer options than what is available today. When microbreweries began to come onto the scene, distributors and retailers were skeptical of their new beers and did not believe that these new American brews would be able to compete with imports. Newer, smaller brewers also had to overcome antiquated laws and strong consumer brand loyalty to major domestic beers. After years of struggles, microbrewers established a foothold in the American beer market, popularized new and previously underappreciated styles, and set the stage for a massive proliferation of nanobreweries across the country. This book takes a look at these microbreweries--prime examples of American enterprise and innovation--from an industry outsider's perspective. The author explores a select number of small breweries from around the United States, covering their signature brews, histories, and what it took for them to claim their niches in the marketplace.

Lingua Cosmica Dale Knickerbocker, 2018-05-04 Anthologies, awards, journals, and works in translation have sprung up to reflect science fiction's increasingly international scope. Yet scholars and students alike face a problem. Where does one begin to explore global SF in the absence of an established canon? *Lingua Cosmica* opens the door to some of the creators in the vanguard of international science fiction. Eleven experts offer innovative English-language scholarship on figures ranging from Cuban pioneer Daína Chaviano to Nigerian filmmaker Olatunde Osunsanmi to the Hugo Award-winning Chinese writer Liu Cixin. These essays invite readers to ponder the themes, formal elements, and unique cultural characteristics within the works of these irreplaceable—if too-little-known—artists. Dale Knickerbocker includes fantasists and genre-benders pushing SF along new evolutionary paths even as they draw on the traditions of their own literary cultures. Includes essays on Daína Chaviano (Cuba), Jacek Dukaj (Poland), Jean-Claude Dunyac (France), Andreas Eschbach (Germany), Angélica Gorodischer (Argentina), Sakyō Komatsu (Japan), Liu Cixin (China), Laurent McAllister (Yves Meynard and Jean-Louis Trudel, Francophone Canada), Olatunde Osunsanmi (Nigeria), Johanna Sinisalo (Finland), and Arkady and Boris Strugatsky (Russia).

Contributors: Alexis Brooks de Vita, Pawel Frelik, Yvonne Howell, Yolanda Molina-Gavilán, Vibeke Rützou Petersen, Amy J. Ransom, Hanna-Riikka Roine, Hanna Samola, Mingwei Song, Tatsumi Takayuki, Juan Carlos Toledano Redondo, and Natacha Vas-Deyres.

After: The Echo Scott Nicholson, 2014-04-22 Nobody thrills like Nicholson does. Nobody. - J.A. Konrath, The List A massive solar storm kills billions and wipes out the technological infrastructure, and the few survivors learn that some among them have...changed. AFTER: THE ECHO (Book #2 in the After series) It's six weeks after the shock. The smoke on the horizon has diminished, and Rachel Wheeler and her two traveling companions head toward the mountains where Rachel's grandfather Franklin has built a survivalist compound. However, the strange mutated people known as Zapheads seem to be changing from bloodthirsty killers into a force far more menacing. A secret military installation may hold the key to rebuilding civilization, but Franklin doesn't trust their intentions. And the Zapheads are adapting to the new world faster than the human survivors, who must fight for their place in a future that may have no room for them.

The Digital Role-Playing Game and Technical Communication Daniel Reardon, David Wright, 2021-04-22 With annual gross sales surpassing 100 billion U.S. dollars each of the last two years, the digital games industry may one day challenge theatrical-release movies as the highest-grossing entertainment media in the world. In their examination of the tremendous cultural influence of digital games, Daniel Reardon and David Wright analyze three companies that have shaped the industry: Bethesda, located in Rockville, Maryland, USA; BioWare in Edmonton, Alberta, Canada; and CD Projekt Red in Warsaw, Poland. Each company has used social media and technical content in the games to promote players' belief that players control the companies' game narratives. The result has been at times explosive, as empowered players often attempted to co-op the creative processes of games through discussion board forum demands, fund-raising campaigns to persuade companies to change or add game content, and modifications ("modding") of the games through fan-created downloads. The result has changed the way we understand the interactive nature of digital games and the power of fan culture to shape those games.

The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese and African diasporic science fiction. The contributors use both well-established critical and theoretical approaches and embrace a range of new ones, including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today.
