**Great Military Leaders** William T. Worthington, 2002 Great Military Leaders - A Bibliography with Vignettes

500 Great Military Leaders Spencer C. Tucker, 2014-12-16 This insightful encyclopedia examines the most influential commanders who have shaped military history and the course of world events from ancient times to the present. From Alexander the Great and Attila the Hun to Ho Chi Minh and Colin Powell, 500 Great Military Leaders provides readers with insight into the most innovative and prominent individuals who have led armies to victory on battlefields all over the world. The broad coverage ranges from military leaders from the ancient world to the present day, including political figures who directed war efforts and those who were responsible for major technological improvements. This encyclopedia goes beyond providing factual information about each individual's life to delve into the greater historical context and impact on their contemporaries as well as on future military history. The presentation of information is designed to enable readers to both observe the gradual evolution of warfare over time and clearly perceive the differences in tactics used by generals with varying military resources at their disposal. The entries include not only information on the individual's life and work but a summary statement that assesses successes and failures across each leader's career and summarizes the overall impact. Each entry also provides several references for further reading about that individual. The accessible writing style of this resource and in-depth information and analyses make it appropriate for high school and undergraduate-level students as well as scholars of military history and individuals who simply enjoy reading about military history.

**Black American Military Leaders** Walter L. Hawkins, 2016-04-27 This book is a revision, with greatly expanded inclusion criteria, of the 1993 African American Generals and Flag Officers: Biographies of Over 120 Blacks in the United States Military. It offers detailed, career-oriented summaries for men and women who often overcame societal obstacles to become ranking members of the armed forces. Persons from all branches are now included (Army, Navy, Air Force and Marine Corps), as well as the National Guard and Reserves.

**Tacit Knowledge for Military Leaders**, 1999 Tacit knowledge is defined as knowledge grounded in experience, intimately related to action, and not well supported by formal training and doctrine. Tacit knowledge of leadership used by Army officers at three different levels of command have been identified, assessed, and developed into assessment

questionnaires for each level. The questionnaires have been construct validated and proven to predict certain leadership effectiveness ratings at each level and to do so better than measures of verbal reasoning ability, tacit knowledge for business managers, or experience. This product contains the leadership tacit knowledge questionnaire for company commanders. Instructions are given for administering and scoring the questionnaire and recommended applications are described. The document begins with a brief summary of the development and validation of the questionnaire.--DTIC.

**The Criminal Responsibility of Senior Political and Military Leaders as Principals to International Crimes**

Héctor Olásolo,2009-05-15 As shown by the trials of Slobodan Milosevic, Charles Taylor and Saddam Hussein, the large-scale and systematic commission of international crimes is usually planned and set in motion by senior political and military leaders. Nevertheless, the application of traditional forms of criminal liability leads to the conclusion that they are mere accessories to such crimes. This does not reflect their central role and often results in a punishment which is inappropriately low in view of the impact of their actions and omissions. For these reasons, international criminal law has placed special emphasis on the development of concepts, such as control of the crime and joint criminal enterprise (also known as the common purpose doctrine), which aim at reflecting better the central role played by senior political and military leaders in campaigns of large scale and systematic commission of international crimes. The Rome Statute of the International Criminal Court and the case law of the ICTY and the ICTR have, in recent years, played a unique role in the achievement of this goal.

**The Worst Military Leaders in History** John M. Jennings,Chuck Steele,2023-06-24 Spanning countries and centuries, a “how-not-to” guide to leadership that reveals the most maladroït military commanders in history—now in paperback. For this book, fifteen distinguished historians were given a deceptively simple task: identify their choice for the worst military leader in history and then explain why theirs is the worst. From the clueless Conrad von Hötzenndorf and George A. Custer to the criminal Baron Roman F. von Ungern-Sternberg and the bungling Garnet Wolseley, this book presents a rogues’ gallery of military incompetents. Rather than merely rehashing biographical details, the contributors take an original and unconventional look at military leadership in a way that appeals to both specialists and general readers alike. While there are plenty of books that analyze the keys to success, *The Worst Military Leaders in History* offers lessons of failure to avoid. In other words, this book is a “how-not-to” guide to leadership.

*What is Military History?* Stephen Morillo,2017-12-21 The third edition of *What is Military History?* has been thoroughly

updated, and includes a new bibliography and new case studies on naval warfare and the origins of war, as well as expanded sections on historiography, environmental history and world history. This popular textbook showcases a field that encompasses not only accounts of campaigns and battles, but includes a wide range of perspectives on all aspects of past military organization and activity. Its global and comparative analysis covers: the history of military history, showing how it has developed from ancient times to the present; the key ideas and concepts that shape analysis of military activity; the current controversies about which military historians argue, and why they are important; a survey of who does military history, where it is taught and published, and how it is practiced; and a look at where military history is headed in the future. Ideal for any interested reader and for classes in military history and in historiography generally, the third edition of this popular book thoroughly explains the dynamics of this rich and growing area of study.

Napoleon's Military Maxims Napoléon Bonaparte, David G. Chandler, Beatrice Heuser, 2023-08-30 This classic work is a distillation of the knowledge, intuition and wisdom of one of history's greatest military commanders. Napoleon's success was built upon practical experience combined with his own study of classical warfare and his natural grasp of the key principles of war. His thoughts and theories on the art of waging war are presented here in the form of accessible and readable maxims. This edition also features additional contextual commentary by historians David Chandler and Beatrice Heuser, which allows modern readers to compare Napoleon's principles with the experience of war today.

**Brigadier General John D. Imboden** Spencer C. Tucker, 2002-11-29 John D. Imboden is an important but often overlooked figure in Civil War history. With only limited militia training, the Virginia lawyer and politician rose to the rank of brigadier general in the Confederate Army and commanded the Shenandoah Valley District, which had been created for Stonewall Jackson. Imboden organized and led the Staunton Artillery in the capture of the U.S. arsenal at Harper's Ferry. He participated in the First Battle of Bull Run/Manassas and organized a cavalry command that fought alongside Stonewall Jackson in his Shenandoah Valley Campaign. The Jones/Imboden Raid into West Virginia cut the Baltimore & Ohio Railroad

and ravaged the Kanawha Valley petroleum fields. Imboden covered the Confederate withdrawal from Gettysburg and later led cavalry accompanying Jubal Early in his operations against Philip Sheridan in Sheridan's Shenandoah Valley Campaign. Imboden completed his war service in command of Confederate prisons in Georgia, Alabama, and Mississippi. Spencer C. Tucker fully examines the life of this Confederate cavalry commander, including analysis of Imboden's own post-war writing, and explores overlooked facets of his life, such as his involvement in the Confederate prison system, his later efforts to restore the economic life of his home state of Virginia by developing its natural resources, and his founding of the city of Damascus, which he hoped to make into a new iron and steel center. Spencer C. Tucker, John Biggs Professor of Military History at the Virginia Military Institute, is the author of Vietnam and the author or editor of several other books on military and naval history. He lives in Lexington, Virginia.
