Black Freedom Fighters in Steel Ruth Needleman, 2003 Thousands of African Americans poured into northwest Indiana in the 1920s dreaming of decent-paying jobs and a life without Klansmen, chain gangs, and cotton. *Black Freedom Fighters in Steel: The Struggle for Democratic Unionism* by Ruth Needleman adds a new dimension to the literature on race and labor. It tells the story of five men born in the South who migrated north for a chance to work the dirtiest and most dangerous jobs in the steel mills. Individually they fought for equality and justice; collectively they helped construct economic and union democracy in postwar America. George Kimbley, the oldest, grew up in Kentucky across the street from the family who had owned his parents. He fought with a French regiment in World War I and then settled in Gary, Indiana, in 1920 to work in steel. He joined the Steelworkers Organizing Committee and became the first African American member of its full-time staff in 1938. The youngest, Jonathan Comer, picked cotton on his father's land in Alabama, stood up to racism in the military during World War II, and became the first African American to be president of a basic steel local union. This is a book about the integration of unions, as well as about five remarkable individuals. It focuses on the decisive role of African American leaders in building interracial unionism. One chapter deals with the African American struggle for representation, highlighting the importance of independent black organization within the union. Needleman also presents a conversation among two pioneering steelworkers and current African American union leaders about the racial politics of union activism.

The Semantics and Pragmatics of Quotation Paul Saka, Michael Johnson, 2017-12-07 The chapters in this volume address a variety of issues surrounding quotation, such as whether it is a pragmatic or semantic phenomenon, what varieties of quotation exist, and what speech acts are involved in quoting. Quotation poses problems for many prevailing theories of language. One fundamental principle is that for a language to be learnable, speakers must be able to derive the truth-conditions of sentences from the meanings of their parts. Another popular view is that indexical expressions like I display a

certain fixity -- that they always refer to the speaker using them. Both of these tenets appear to be violated by quotation. This volume is suitable for scholars in philosophy of language, semantics, and pragmatics, and for graduate students in philosophy and linguistics. The book will also be useful for researchers in other fields that study quotation, including psychology and computer science.

The Lobbyists Rajeev Jayaswal,2017-01-06 In early 2000, India caught attention of global petroleum giants after it announced world's biggest gas discovery. In 2004, it announced another world-class oil discovery in Rajasthan. These developments raised India's hope that the world's fourth largest oil importer would be able to significantly reduce over-dependence on the Gulf and other oil producing countries. But, subsequent developments belied the hope. Soon India's oil and gas dream turned out to be a nightmare. Controversies gripped domestic oil and gas industry. Greed for gas resulted into a major corporate war. It involved politicians, media and some members of the civic society. The Congress-led Manmohan Singh government was accused of encouraging crony capitalism. Allegations of corruption triggered probes by auditors and investigative agencies. Bureaucrats stopped taking decisions. The government suffered acute policy paralysis. Exploration and production of oil and gas suffered. In less than one decade India's import dependence jumped. India left Japan behind to become world's third largest oil importer after the United States and China. This would have comforted oil exporting countries. India would continue to remain their most dependable market as it imported more than 80% crude oil it processes. The future \$150-160 oil market was secure thanks to intense internal strife over oil and gas matters. But, a question remained unanswered. Was the decade-long turbulence sponsored by some lobbyists having share in this import pie? This book is an attempt to examine it. Was it a mere coincidence that India's energy security engagements with neighbours, particularly with Iran lost vigour after the first Oil Minister Mani Shankar Iyer was removed? Was the Civil Nuclear Deal an American sugar-coated pill that contained the Nuclear Non-proliferation Treaty (NPT)? The book highlights certain factual developments at that time that would throw some light on these questions. This book is also iconoclastic. It attempts to change the popular perception created by certain groups or individuals around the oil and gas sector controversies. It explains how certain political and corporate elements took advantage of the confusion to pursue their self interests? What was perceived as black was in fact, not so dark and what was felt completely white, had shades of gray. So far people had been shown only 180-degree of the oil and gas controversies. This book brings up the other side of the picture, which was hitherto hidden. This is an attempt to complete the circle so that reader can form a 360-degree picture.

Possibilities and Complexities of Decolonising Higher Education Aneta Hayes,Kathy Luckett,Greg William Misiaszek,2023-03-31 The chapters in this book highlight the possibilities and complexities of putting decolonial theory to work in higher education in Northern and Southern contexts across the globe. This book looks at decolonial work as praxis

involving transformation at a range of levels from theoretical development, national policy, institutional policy and culture, academic discipline, programme, course, classroom, student and the self. Our authors argue that praxis in their contexts includes working at institutional level to undo the historical power of 'coloniality' in universities in the metropolises, introducing Indigenous knowledges into curricula and undoing the effects of 'coloniality' in embodiment, temporality and whiteness. We, as editors, argue for the need for transformation of the self as well as structures, and highlight qualities such as reflexivity on our own entanglements with coloniality, and why they occur, in this undoing. The approach offered in this book emphasises the connection between significant personal change as a pre-condition and an epistemological process to connect critical decolonial theory and our teaching practice. The book was originally published as a special issue of the journal *Teaching in Higher Education*.

The Language of Violent Jihad Paul Baker, Rachelle Vessey, Tony McEnery, 2021-10-28 How do violent jihadists use language to try to persuade people to carry out violent acts? This book analyses over two million words of texts produced by violent jihadists to identify and examine the linguistic strategies employed. Taking a mixed methods approach, the authors combine quantitative methods from corpus linguistics, which allows the identification of frequent words and phrases, alongside close reading of texts via discourse analysis. The analysis compares language use across three sets of texts: those which advocate violence, those which take a hostile but non-violent standpoint, and those which take a moderate perspective, identifying the different uses of language associated with different stages of radicalization. The book also discusses how strategies including use of Arabic, romanisation, formal English, quotation, metaphor, dehumanisation and collectivisation are used to create in- and out-groups and justify violence.

Making it Explicit Robert Brandom, 1994 Where accounts of the relation between language and mind often rest on the concept of representation, Brandom sets out an approach based on inference, and on a conception of certain kinds of implicit assessment that become explicit in language. It is the first attempt to work out a detailed theory rendering linguistic meaning in terms of use.

Power, Protest, and the Public Schools Melissa Weiner, 2010-06-11 Accounts of Jewish immigrants usually describe the role of education in helping youngsters earn a higher social position than their parents. Melissa F. Weiner argues that New York City schools did not serve as pathways to mobility for Jewish or African American students. Instead, at different points in the city's history, politicians and administrators erected similar racial barriers to social advancement by marginalizing and denying resources that other students enjoyed. *Power, Protest, and the Public Schools* explores how activists, particularly parents and children, responded to inequality; the short-term effects of their involvement; and the long-term benefits that would spearhead future activism. Weiner concludes by considering how today's Hispanic and Arab children face similar inequalities within public schools.

Dalit's Inheritance in Hindu Religion Mahendra Singh, 2006 This book is about the great contribution, made by the so-called low castes, presently called Dalits, to the Hindu Religion, spiritual, social and political fields, in every period of Indian history. In the chapter Aryan Gods Versus Castes, the author has brought out in detail as to how Lord Rama, Krishna and Shiva laid the ideals of liberal society free from rigidity of castes and other man-made distinctions. The author traces the present rigid structure of Hindu Caste to the period of Manusmriti and other Smrities after 2nd century AD, though the period of mass untouchability is given as 18th and 19th century AD, which resulted out of several famines and consequent extreme poverty. The treatment of the book is on modern scientific lines dipped in spirituality, as preached by Swami Vivekananda. While highlighting the plight of Dalits in the past and present period, the author has not lost sight of whatever is good and grand in Hindu philosophy.

Pio Gama Pinto Shiraz Durrani,2018-10-19 Pio Gama Pinto was born in Kenya on March 31, 1927. He was assassinated in Nairobi on February 24, 1965. In his short life, he became a symbol of anti-colonial and anti-imperialist struggles in Kenya and India. He was actively involved in Goa's struggle against Portuguese colonialism and in Mau Mau during Kenya's war of independence. For this, he was detained by the British colonial authorities in Kenya from 1954-59. His contribution to the struggle for liberation for working people spanned two continents - Africa and Asia. And it covered two phases of imperialism - colonialism in Kenya and Goa and neo-colonialism in Kenya after independence. His enemies saw no way of stopping the intense, lifelong struggle waged by Pinto - except through an assassin's bullets. But his contribution, his ideas, and his ideals are remembered and upheld even today by people active in liberation struggles. This book does not aim or claim to be a comprehensive record on Pio Gama Pinto, just the beginning of the long journey necessary to record the history of Kenya from an anti-imperialist perspective. It introduces readers to voices of many people who have written about Pinto to build up as clear a picture of Pinto as possible. In that spirit, it seeks to make history available to those whose story it is - people of Kenya, Africa and progressive people around the world.

Reading, Thinking, and Writing About History Chauncey Monte-Sano,Susan De La Paz,Mark Felton,2014 Although the Common Core and C3 Framework highlight literacy and inquiry as central goals for social studies, they do not offer guidelines, assessments, or curriculum resources. This practical guide presents six research-tested historical investigations along with all corresponding teaching materials and tools that have improved the historical thinking and argumentative writing of academically diverse students. Each investigation integrates reading, analysis, planning, composing, and reflection into a writing process that results in an argumentative history essay. Primary sources have been modified to allow struggling readers access to the material. Web links to original unmodified primary sources are also provided, along with other sources to extend investigations. The authors include sample student essays from each investigation to illustrate the progress of two different learners and explain how to support students' development. Each chapter includes these helpful sections: Historical Background, Literacy Practices Students Will Learn, How to Teach This Investigation, How Might Students Respond?, Student Writing and Teacher Feedback, Lesson Plans and Materials. Book Features: Integrates literacy and inquiry with core U.S. history topics. Emphasizes argumentative writing, a key requirement of the Common Core. Offers explicit guidance for instruction with classroom-ready materials. Provides primary sources for differentiated instruction. Explains a curriculum appropriate for students who struggle with reading, as well as more advanced readers. Models how to transition over time from more explicit instruction to teacher coaching and greater student independence. "The tools this book provides—from graphic organizers, to lesson plans, to the accompanying documents—demystify the writing process and offer a sequenced path toward attaining proficiency." —From the Foreword by Sam Wineburg, co-author of *Reading Like a Historian* "Assuming

literate practice to be at the core of history learning and historical practice, the authors provide actual units of history instruction that can be immediately applied to classroom teaching. These units make visible how a cognitive apprenticeship approach enhances history and historical literacy learning and ensure a supported transition to teaching history in accordance with Common Core State Standards.” —Elizabeth Moje, Arthur F. Thurnau Professor, School of Education, University of Michigan “The C3 Framework for Social Studies State Standards and the Common Core State Standards challenge students to investigate complex ideas, think critically, and apply knowledge in real world settings. This extraordinary book provides tried-and-true practical tools and step-by-step directions for social studies to meet these goals and prepare students for college, career, and civic life in the 21st century.” —Michelle M. Herczog, president, National Council for the Social Studies
