The Natural History of Weasels and Stoats Carolyn M. King,2007 Publisher description

Exuberance Kay Redfield Jamison,2004-09-28 A national bestselling author examines one of the mind's most exalted states—one that is crucially important to learning, risk-taking, social cohesiveness, and survival itself. “[Jamison is] that rare writer who can offer a kind of unified field theory of science and art.” —The Washington Post Book World With the same grace and breadth of learning she brought to her studies of the mind’s pathologies, Kay Redfield Jamison examines one of its most exalted states: exuberance. This “abounding, ebullient, effervescent emotion” manifests itself everywhere from child’s play to scientific breakthrough. *Exuberance: The Passion for Life* introduces us to such notably irrepressible types as Teddy Roosevelt, John Muir, and Richard Feynman, as well as Peter Pan, dancing porcupines, and Charles Schulz’s Snoopy. It explores whether exuberance can be inherited, parses its neurochemical grammar, and documents the methods people have used to stimulate it. The resulting book is an irresistible fusion of science and soul.

Pest Control for the Smallholder David Bezzant,2013-03-01 Among the many challenges facing the contemporary smallholder who keeps livestock and grows his own food, is how to deal with the various pests that are capable of decimating crops, degrading pasture, stealing produce, contaminating animal feed and killing valuable livestock. This book provides the smallholder with the knowledge and the information about the skills to meet this challenge in an effective and humane way.Considers all the major pests faced by smallholders including rats, house and field mice, grey squirrels, moles, rabbits, deer, foxes, mink, wood pigeons, crows and rooks. Discusses each pest in detail, arguing that it is essential for the smallholder to understand their characteristics and behaviour in order to control them successfully. Emphasizes that 'prevention is better than cure' and identifies a variety of measures designed to thwart, rather than kill, pests. Examines both traditional and modern pest control methods. Covers traps, poisons, air rifles, dogs, ferrets, electric fencing, bird scarers, wildlife deterrents and repellents, automatic bird feeders, and polytunnels and cloches. Stresses that smallholders need to adopt a comprehensive pest control programme that complies with current legislation and balances conservation with

control. An invaluable and well-illustrated book that provides the smallholder with the knowledge required to deal efficiently and humanely with the various pests that present a constant challenge. Essential reading for small-scale farmers, smallholders and those with large gardens attached to properties in the countryside. Superbly illustrated with 146 colour photographs. David Bezzant has been a smallholder for all his adult life and is an expert on the use of old-fashioned forms of pest control.

The Madman's Library Edward Brooke-Hitching, 2020-10-01 * BBC RADIO 4 BOOK OF THE WEEK * 'Anybody who loves the printed word will be bowled over by this amusing, erudite, beautiful book about books. It is in every way a triumph. One of the loveliest books to have been published for many, many years' Alexander McCall Smith 'Quite simply the best gift for any book lover this year, or perhaps ever' Lucy Atkins, Sunday Times Literary Book of the Year 'An utterly joyous journey into the deepest eccentricities of the human mind... The most cheering, fascinating book I've read for ages' Guardian From the author of the critically acclaimed and globally successful *The Phantom Atlas*, *The Golden Atlas* and *The Sky Atlas* comes a stunning new work. *The Madman's Library* is a unique, beautifully illustrated journey through the entire history of literature, delving into its darkest territories to hunt down the very strangest books ever written, and uncover the fascinating stories behind their creation. This is a madman's library of eccentric and extraordinary volumes from around the world, many of which have been completely forgotten. Books written in blood and books that kill, books of the insane and books that hoaxed the globe, books invisible to the naked eye and books so long they could destroy the Universe, books worn into battle, books of code and cypher whose secrets remain undiscovered... and a few others that are just plain weird. From the 605-page Qur'an written in the blood of Saddam Hussein, through the gorgeously decorated 15th-century lawsuit filed by the Devil against Jesus, to the lost art of binding books with human skin, every strand of strangeness imaginable (and many inconceivable) has been unearthed and bound together for a unique and richly illustrated collection ideal for every book-lover.

The Natural History of Weasels & Stoats Carolyn M. King, 1989 A comprehensive treatment of the fierce little predators: physical description, life cycle and span, evolution, hunting and reproduction behavior, population dynamics, the impact on their prey, diseases, and their relation to humans (mostly as pests, i.e. competitors). The color plates are informative, but the line drawing are marvelous. Annotation c. Book News, Inc., Portland, OR (booknews.com).
