**The Scientist's Guide to Writing** Stephen B. Heard, 2016-04-12 A concise and accessible primer on the scientific writer's craft The ability to write clearly is critical to any scientific career. The Scientist's Guide to Writing provides practical advice to help scientists become more effective writers so that their ideas have the greatest possible impact. Drawing on his own experience as a scientist, graduate adviser, and editor, Stephen Heard emphasizes that the goal of all scientific writing should be absolute clarity; that good writing takes deliberate practice; and that what many scientists need are not long lists of prescriptive rules but rather direct engagement with their behaviors and attitudes when they write. He combines advice on such topics as how to generate and maintain writing momentum with practical tips on structuring a scientific paper, revising a first draft, handling citations, responding to peer reviews, managing coauthorships, and more. In an accessible, informal tone, The Scientist's Guide to Writing explains essential techniques that students, postdoctoral researchers, and early-career scientists need to write more clearly, efficiently, and easily. Emphasizes writing as a process, not just a product Encourages habits that improve motivation and productivity Explains the structure of the scientific paper and the function of each part Provides detailed guidance on submission, review, revision, and publication Addresses issues related to coauthorship, English as a second language, and more

**The California Institute for Regenerative Medicine** Institute of Medicine,Board on Health Sciences Policy,Committee on a Review of the California Institute for Regenerative Medicine,2013-03-27 The California Institute for Regenerative Medicine (CIRM) was created in 2005 by The California Stem Cell Research and Cures Act (Proposition 71) to distribute \$3 billion in state funds for stem cell research. The passage of Proposition 71 by the voters of California occurred at a time when federal funding for research involving human embryonic stem cells was uncertain, given the ethical questions raised by such research. During its initial period of operations, CIRM has successfully and thoughtfully provided more than \$1.3 billion in awards to 59 California institutions, consistent with its stated mission. As it transitions to a broadened portfolio of grants to stimulate progress toward its translational goals, the Institute should obtain cohesive, longitudinal, and integrated advice; restructure its grant application review process; and enhance industry representation in aspects of its operations. CIRM's unique governance structure, while useful in its initial stages, might diminish its effectiveness moving forward. The California Institute for Regenerative Medicine: Science, Governance, and the Pursuit of Cures recommends specific steps to enhance CIRM's organization and management, as well as its scientific policies and processes, as it transitions to the critical next stages of its research and development program.

*Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems* Mani, Nandita S.,Cawley, Michelle A.,2022-05-06 Beyond providing space for data science activities, academic libraries are often overlooked in the data science

landscape that is emerging at academic research institutions. Although some academic libraries are collaborating in specific ways in a small subset of institutions, there is much untapped potential for developing partnerships. As library and information science roles continue to evolve to be more data-centric and interdisciplinary, and as research using a variety of data types continues to proliferate, it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part. The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries. It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff, engage in the research enterprise, contribute to curriculum development, and help build a stronger ecosystem where libraries are part of data science. Covering topics such as data science initiatives, digital humanities, and student engagement, this book is an indispensable resource for librarians, information professionals, academic institutions, researchers, academic libraries, and academicians.

**Developing Capacities for Teaching Responsible Science in the MENA Region** The World Academy of Sciences (TWAS), Bibliotheca Alexandrina, National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Developing a Framework for an International Faculty Development Project on Education About Research in the Life Sciences with Dual Use Potential, 2013-07-28 Spurred on by new discoveries and rapid technological advances, the capacity for life science research is expanding across the globe—and with it comes concerns about the unintended impacts of research on the physical and biological environment, human well-being, or the deliberate misuse of knowledge, tools, and techniques to cause harm. This report describes efforts to address dual use issues by developing institutes around the world that will help life sciences faculty learn to teach about the responsible conduct of science. Based on the successful National Academies Summer Institute for Undergraduate Biology Education and on previous NRC reports on effective methods for teaching about dual use issues, the report's authoring committee designed a general framework for the faculty institutes and chose the Middle East-North Africa (MENA) region to test a prototype faculty institute. In September 2012, the first Institute was held in Aqaba, Jordan, bringing together 28 participants from Algeria, Egypt, Jordan, Libya, and Yemen to engage with effective, evidence-based teaching methods, develop curricular materials for use in their own classrooms, and become community leaders on dual use and related topics. *Developing Capacities for Teaching Responsible Science in the MENA Region: Refashioning Scientific Dialogue* offers insights from the institute that will help in the design and implementation of future programs in the MENA region, and in other parts of the world.

CSR, Sustainability, and Leadership Gabriel Eweje, Ralph Bathurst, 2017-02-10 With the acceptance of CSR and Sustainability as important business performance indicators, it is timely now to assess the impact that leadership has on the development of these processes. CSR, Sustainability, and Leadership seeks to explore the integration of these three elements through an examination of concerns and trends in contemporary organisations. The authors discuss empirical and theoretical studies which focus on processes and practices which inform the field. Organisations wish not only to participate in responsible behaviour, but also actively lead within their local environments. However, businesses are failing in their execution of CSR because of ineffective leadership. Business leaders are central to an organisation's purpose in the world and this book will inform a robust discussion about social issues which are pressing to scholars, policymakers, not-for-profit organisations and students.
