Rebecca Dresser

State of Wonder Ann Patchett, 2012-05-10 LONGLISTED FOR THE ORANGE PRIZE FOR FICTION 2012 There were people on the banks of the river. Among the tangled waterways and giant anacondas of the Brazilian Rio Negro, an enigmatic scientist is developing a drug that could alter the lives of women for ever. Dr Annick Swenson's work is shrouded in mystery; she refuses to report on her progress, especially to her investors, whose patience is fast running out. Anders Eckman, a mild-mannered lab researcher, is sent to investigate. A curt letter reporting his untimely death is all that returns. Now Marina Singh, Anders' colleague and once a student of the mighty Dr Swenson, is their last hope. Compelled by the pleas of Anders's wife, who refuses to accept that her husband is not coming home, Marina leaves the snowy plains of Minnesota and retraces her friend's steps into the heart of the South American darkness, determined to track down Dr. Swenson and uncover the secrets being jealously guarded among the remotest tribes of the rainforest. What Marina does not yet know is that, in this ancient corner of the jungle, where the muddy waters and susurrating grasses hide countless unknown perils and temptations, she will face challenges beyond her wildest imagination. Marina is no longer the student, but only time will tell if she has learnt enough.

Myths of the Underworld in Contemporary Culture Judith Fletcher,2019-04-25 *Myths of the Underworld in Contemporary Culture: The Backward Gaze* examines a series of twentieth and twenty-first century fictional works that adapt Greco-Roman myths of the catabasis, the heroic journey to the underworld. Covering a range of genres - including novels, comics, and children's culture, by authors such as Elena Ferrante, Salman Rushdie, Neil Gaiman, A. S. Byatt, Toni Morrison, and Ann Patchett - it reveals how an enduring fascination with life after death, and fantasies of accessing the world of the dead while we are still alive, manifest themselves in myriad and varied re-imaginings of the ancient descent myth. The volume begins with a detailed overview of the use of the myth by ancient authors such as Homer, Aristophanes, Vergil, and Ovid, before exploring the ways in which the narrative of a return trip to Hades by Odysseus, Aeneas, Orpheus, and Persephone can be manipulated by contemporary storytellers to fit themes of social marginality and alterity, postmodern rebellion, the position of female authors in the literary canon, and the dislocation endured by refugees, exiles, and diasporic populations. It also argues that citations of classical underworld stories can disrupt and challenge the literary canon by using media - such as comic books, children's culture, or rock music - not conventionally associated with high culture.

Silent Partners Rebecca Dresser, 2017 The research ethics system was created without the help of people who know what it is like to be a research subject. This is a serious omission. Experts have overlooked ethical issues that matter to subjects. Silent Partners moves subjects to the forefront, giving them a voice in research ethics.

The Palgrave Handbook of Twentieth and Twenty-First Century Literature and Science Neel Ahuja, Monique Allewaert, Lindsey Andrews, Gerry Canavan, Rebecca Evans, Nihad M. Farooq, Erica Fretwell, Nicholas Gaskill, Patrick Jagoda, Erin Gentry Lamb, Jennifer Rhee, Britt Rusert, Matthew A. Taylor, Aarthi Vadde, Priscilla Wald, Rebecca Walsh, 2020-11-26 This handbook illustrates the evolution of literature and science, in collaboration and contestation, across

the twentieth and twenty-first centuries. The essays it gathers question the charged rhetoric that pits science against the humanities while also demonstrating the ways in which the convergence of literary and scientific approaches strengthens cultural analyses of colonialism, race, sex, labor, state formation, and environmental destruction. The broad scope of this collection explores the shifting relations between literature and science that have shaped our own cultural moment, sometimes in ways that create a problematic hierarchy of knowledge and other times in ways that encourage fruitful interdisciplinary investigations, innovative modes of knowledge production, and politically charged calls for social justice. Across units focused on epistemologies, techniques and methods, ethics and politics, and forms and genres, the chapters address problems ranging across epidemiology and global health, genomics and biotechnology, environmental and energy sciences, behaviorism and psychology, physics, and computational and surveillance technologies. Chapter 19 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Heaven is a Place on Earth Adrian Shirk, 2023-12-05 An exploration of American ideas of utopia through the lens of one millennial's quest to live a more communal life under late-stage capitalism Told in a series of essays that balance memoir with fieldwork, *Heaven Is a Place on Earth* is an idiosyncratic study of American utopian experiments—from the Shakers to the radical faerie communes of Short Mountain to the Bronx rebuilding movement—through the lens of one woman's quest to create a more communal life in a time of unending economic and social precarity. When Adrian Shirk's father-in-law has a stroke and loses his ability to speak and walk, she and her husband—both adjuncts in their midtwenties—become his primary caretakers. The stress of these new responsibilities, coupled with navigating America's broken health-care system and ordinary twenty-first-century financial insecurity, propels Shirk into an odyssey through the history and present of American utopian experiments in the hope that they might offer a way forward. Along the way, Shirk seeks solace in her own community of friends, artists, and theologians. They try to imagine a different kind of life, examining what might be replicable within the histories of utopia-making, and what might be doomed. Rather than “no place,” Shirk reframes utopia as something that, according to the laws of capital and conquest, shouldn't be able to exist—but does anyway, if only for a moment.

Becoming Bestsellers: John Grisham and Danielle Steel (Sample from Chapter 2 of THE BESTSELLER CODE) Jodie Archer, Matthew L. Jockers, 2016-08-16 This sneak peek teaser - featuring literary giants John Grisham and Danielle Steele - from Chapter 2 of The Bestseller Code, a groundbreaking book about what a computer algorithm can teach us about blockbuster books, stories, and reading, reveals the importance of topic and theme in bestselling fiction according to percentages assigned by what the authors refer to as the "bestseller-ometer." Although 55,000 novels are published every year, only about 200 hit the lists, a commercial success rate of less than half a percent. When the computer was asked to "blindly" select the most likely bestsellers out of 5,000 books published over the past thirty years based only on theme, it discovered two possible candidates: The Accident by Danielle Steel and The Associate by John Grisham. The computer recognized quantifiable patterns in their seemingly opposite, but undeniably successful writing careers with legal thrillers and romance. In Chapter 2, Archer and Jockers analyze this data and divulge the most and least likely to best sell topics and themes in fiction with a human discussion of the "why" behind these results. The Bestseller Code is a big-idea book about the relationship between creativity and technology. At heart it is a celebration of books for readers and writers—a compelling investigation into how successful writing works.

Writing Deep Scenes Martha Alderson, Jordan Rosenfeld, 2015-09-04 Take a Deep Dive into Plot and Scene and Improve Your Writing Whether you're planning your first novel or have already written a first draft, you need to master the concepts of plot and scene to truly realize your story's potential. Writing Deep Scenes teaches you how to write strong, layered, and engaging scenes--the secret to memorable, page-turning plots. It's filled with practical tools for building layers and nuance into your scenes, employing the right scene types at the right junctures, and developing a profound understanding of how plot and scene intertwine. Inside you'll learn: • How scenes are comprised of three key layers: action, emotion, and theme. • How to recognize each layer and weave them seamlessly into a scene. • How to develop an intricate relationship between the action and emotion in every scene. • How thematic imagery embedded in scenes increases a story's tension and contributes to the story's meaning. Using contemporary examples from a variety of genres, Writing Deep Scenes provides an effective method for plotting at the scene level. Use these techniques and enrich your fiction and memoirs with page-turning suspense and pathos, and explore new depths in every story you write.

Mapping the Amazon Amanda M. Smith, 2021-05-01 An analysis of the political and ecological consequences of charting

the Amazon River basin in narrative fiction, *Mapping the Amazon* examines how widely read novels from twentieth-century South America attempted to map the region for readers. Authors such as José Eustasio Rivera, Rómulo Gallegos, Mario Vargas Llosa, César Calvo, Márcio Souza, and Mário de Andrade travelled to the Amazonian regions of their respective countries and encountered firsthand a forest divided and despoiled by the spatial logic of extractivism. Writing against that logic, they fill their novels with geographic, human, and ecological realities omitted from official accounts of the region. Though the plots unfold after the height of the Amazon rubber boom (1850–1920), the authors construct landscapes marked by that first large-scale exploitation of Amazonian biodiversity. The material practices of rubber extraction resurface in the stories told about the removal of other plants, seeds, and minerals from the forest as well as its conversion into farmland. Smith places the counter-discursive impulses of each novel in dialogue with various modernizing projects that carve Amazonia into cultural and economic spaces: border commissions, extractive infrastructure, school geography manuals, Indigenous education programs, and touristic propaganda. Even the “novel maps” studied, however, have blind spots, and *Mapping the Amazon* considers the legacy of such unintentional omissions today.

Reading Together, Reading Apart Tamara Bhalla, 2016-10-17 Often thought of as a solitary activity, the practice of reading can in fact encode the complex politics of community formation. Engagement with literary culture represents a particularly integral facet of identity formation--and expresses of a sense of belonging--within the South Asian diaspora in the United States. Tamara Bhalla blends a case study with literary and textual analysis to illuminate this phenomenon. Her fascinating investigation considers institutions from literary reviews to the marketplace to social media and other technologies, as well as traditional forms of literary discussion like book clubs and academic criticism. Throughout, Bhalla questions how her subjects' circumstances, desires, and shared race and class, limit the values they ascribe to reading. She also examines how ideology circulating around a body of literature or a self-selected, imagined community of readers shapes reading itself and influences South Asians' powerful, if contradictory, relationship with ideals of cultural authenticity.

Cataloging Library Resources: An Introduction Marie Keen Shaw, 2024-08-06 This revised text is aimed specifically for library support staff and purposefully aligned with the American Library Association – Library Support Staff Certification (LSSC) competency standards for Cataloging and Classification. In recent years AACR2 rules and MARC21 cataloging standards have evolved to RDA rules and BIBFRAME standards. Today catalogers must have the knowledge and skills to apply RDA rules of cataloging and use the BIBFRAME standards for data entry. Written in clear language and featuring practical examples, Cataloging Library Resources: An Introduction Revised edition will instruct library support staff to become proficient catalogers. Other books on this topic are written for professional librarians rather than support staff. And although the majority of library support staff do not hold professional degrees, many are expected to do the complex and technical work of catalogers. This book provides many examples that support staff can use to learn how to catalog all types of library print, media, and digital materials using the most up-to-date Library of Congress standards. Using this handbook as a guide, readers will be able to perform the ALA-LSSC cataloging and classification competencies and the new RDA, FRBR, and BIBFRAME standards listed below: Apply and manage the appropriate processes, computer technology, and equipment for cataloging and classification. Apply principles of Resource Description and Access (RDA) and the Functional Requirements for Bibliographic Records (FRBR) when creating cataloging records. Apply principles of the Bibliographic Framework Initiative (BIBFRAME) and utilize the BIBFRAME model to create cataloging records. Use the basic cataloging and classification tools, both print and online, including bibliographic utilities and format standards. Understand the value of authority control and its basic principles, and can identify and apply appropriate access points for personal names, corporate bodies, series, and subjects. Explain the value and advantages of cooperative or collaborative cataloging practices to enhance services. Know the basics of standard metadata formats and cataloging rules to select, review, and edit catalog records, and to generate metadata in various formats. Use and apply the classification systems of Dewey, Library of Congress, and Government Documents.And much more!
