

Adrian Raine The Anatomy Of Violence

Whitehead Anne Whitehead

The Anatomy of Violence Adrian Raine, 2014-02-11 Passionate, courageous, and at times controversial, *The Anatomy of Violence* is a ground-breaking work that will challenge your core human values and perspectives on violence. Why do some kids from good environments become mass murderers? Is there actually such a thing as a natural born killer? And, if so, what can we do to identify and treat those born with a predisposition to criminal behavior? For more than three decades Adrian Raine has sought answers to these questions through his pioneering research on the biological basis for violence. In this book, he presents the growing body of evidence that shows how genetics and environmental influences can conspire to create a criminal brain, and how something as seemingly innocent as a low resting heart rate can give rise to a violent personality. Bristling with ingenious experiments, surprising data, and shocking case studies, this is also a clear-eyed inquiry into the thorny ethical issues this science raises about prevention and punishment.

The Anatomy of Violence Adrian Raine, 2013 A leading criminologist who specializes in the neuroscience behind criminal behavior, Adrian Raine introduces a wide range of new scientific research into the origins and nature of violence and criminal behavior. He explains how impairments to areas of the brain that control our ability to experience fear, make decisions, and feel empathy can make us more likely to engage in criminal behavior. He applies this new understanding of the criminal mind to some of the most well-known criminals in history. And he clearly delineates the pressing considerations this research demands: What are its implications for our criminal justice system? Should we condemn and punish individuals who have little to no control over their behavior? Should we act preemptively with people who exhibit strong biological predispositions to becoming dangerous criminals?

The Brain Defense Kevin Davis, 2017-02-28 Called "the best kind of nonfiction" by Michael Connelly, this riveting new book combines true crime, brain science, and courtroom drama. In 1991, the police were called to East 72nd St. in

Manhattan, where a woman's body had fallen from a twelfth-story window. The woman's husband, Herbert Weinstein, soon confessed to having hit and strangled his wife after an argument, then dropping her body out of their apartment window to make it look like a suicide. The 65-year-old Weinstein, a quiet, unassuming retired advertising executive, had no criminal record, no history of violent behavior—not even a short temper. How, then, to explain this horrific act? Journalist Kevin Davis uses the perplexing story of the Weinstein murder to present a riveting, deeply researched exploration of the intersection of neuroscience and criminal justice. Shortly after Weinstein was arrested, an MRI revealed a cyst the size of an orange on his brain's frontal lobe, the part of the brain that governs judgment and impulse control. Weinstein's lawyer seized on that discovery, arguing that the cyst had impaired Weinstein's judgment and that he should not be held criminally responsible for the murder. It was the first case in the United States in which a judge allowed a scan showing a defendant's brain activity to be admitted as evidence to support a claim of innocence. The Weinstein case marked the dawn of a new era in America's courtrooms, raising complex and often troubling questions about how we define responsibility and free will, how we view the purpose of punishment, and how strongly we are willing to bring scientific evidence to bear on moral questions. Davis brings to light not only the intricacies of the Weinstein case but also the broader history linking brain injuries and aberrant behavior, from the bizarre stories of Phineas Gage and Charles Whitman, perpetrator of the 1966 Texas Tower massacre, to the role that brain damage may play in violence carried out by football players and troubled veterans of America's twenty-first century wars. The Weinstein case opened the door for a novel defense that continues to transform the legal system: Criminal lawyers are increasingly turning to neuroscience and introducing the effects of brain injuries—whether caused by trauma or by tumors, cancer, or drug or alcohol abuse—and arguing that such damage should be considered in determining guilt or innocence, the death penalty or years behind bars. As he takes stock of the past, present and future of neuroscience in the courts, Davis offers a powerful account of its potential and its hazards. Thought-provoking and brilliantly crafted, *The Brain Defense* marries a murder mystery complete with colorful characters and courtroom drama with a sophisticated discussion of how our legal system has changed—and must continue to change—as we broaden our understanding of the human mind.

A Passion for Ignorance Renata Salecl, 2022-11-29 An original and provocative exploration of our capacity to ignore what is inconvenient or traumatic Ignorance, whether passive or active, conscious or unconscious, has always been a part of the human condition, Renata Salecl argues. What has changed in our post-truth, postindustrial world is that we often feel overwhelmed by the constant flood of information and misinformation. It sometimes seems impossible to differentiate between truth and falsehood and, as a result, there has been a backlash against the idea of expertise, and a rise in the number of people actively choosing not to know. The dangers of this are obvious, but Salecl challenges our assumptions, arguing that there may also be a positive side to ignorance, and that by addressing the role of ignorance in society, we may

also be able to reclaim the role of knowledge. Drawing on philosophy, social and psychoanalytic theory, popular culture, and her own experience, Salecl explores how the passion for ignorance plays out in many different aspects of life today, from love, illness, trauma, and the fear of failure to genetics, forensic science, big data, and the incel movement—and she concludes that ignorance is a complex phenomenon that can, on occasion, benefit individuals and society as a whole. The result is a fascinating investigation of how the knowledge economy became an ignorance economy, what it means for us, and what it tells us about the world today.

Analysing the Cultural Unconscious Lilian Munk Rösing, Henrik Jøker Bjerre, Brian Benjamin Hansen, Kirsten Hyldgaard, Jakob Rosendal, 2020-01-23 What are we doing when taking psychoanalysis from the couch to the analysis of society, culture, and arts? How is it possible to do so? How is it possible to move from singular experiences to universal structures detected in culture and society? Could psychoanalysis applied to art works become more sensitive to their aesthetics form? Psychoanalysis is often disclaimed as non-scientific, since its main object – the unconscious – has no positive existence. This book, however, proposes psychoanalysis to be a “science of the signifier”. It takes as its object the signifier – the signifying part of the sign – insisting that it always says more (or less) than intended, because its very materiality carries unintended messages. By defining the object of psychoanalysis as the signifier, this volume argues that we can speak of psychoanalysis as a science, even if it is closer to semiotics than biology. *Analysing the Cultural Unconscious* builds on this idea by arguing that the analysis of the signifier is the way to understand not only the individual unconscious, but also the cultural one. Replacing a person's monologue on the couch with ideology criticism or a piece of art, applied psychoanalysis allows us to analyse culture and the arts in a new way, uncovering the cultural unconscious.

The Educational Prophecies of Aldous Huxley Ronald Zigler, 2015-03-05 The visionary legacy of Aldous Huxley is as relevant today as ever. Huxley possessed a sober understanding of the human condition as well as an inspired vision of the human potential. This volume presents an interdisciplinary examination and appreciation of Aldous Huxley's three visionary novels – *Brave New World* (1932), *Ape and Essence* (1948), and *Island* (1962) – to reveal the extent to which Huxley's prognoses into our possible futures was prophetic. The author assesses each novel to reveal the foresights that define our current educational, social, religious, political, and economic institutions, while also exposing our conflicts within those institutions. This volume examines the educational, cultural and technological changes that have shaped our society since Huxley's work, with special reference to the enduring legacy of educational philosopher John Dewey. It offers profound insights into the educational forces and moral foundations of our society that shape us, both inside and outside of our schools. It is the first of its kind to focus exclusively on all three of Huxley's visionary novels and detail their relevance to our world today.

Bad Boys, Bad Men 3rd Edition Donald W. Black, 2022 The newly revised edition of *Bad Boys, Bad Men - Confronting Antisocial Personality Disorder* draws on scientific data, current events, new research, and real-world case studies to analyze this misunderstood disorder, making it essential reading for anyone looking to understand antisocial and psychopathic behavior. This new edition enhances the discussion of women, psychopathy, and narcissistic personality disorder in relation to ASPD.

The Routledge Companion to Criminological Theory and Concepts Avi Brisman, Eamonn Carrabine, Nigel South, 2018-07-03 A comprehensive one-stop reference text, *The Routledge Companion to Criminological Theory and Concepts* (the 'Companion') will find a place on every bookshelf, whether it be that of a budding scholar or a seasoned academic. Comprising over a hundred concise and authoritative essays written by leading scholars in the field, this volume explains in a clear and inviting way the emergence, context, evolution and current status of key criminological theories and conceptual themes. The Companion is divided into six historical and thematic parts, each introduced by the editors and containing a selection of accessible and engaging short essays written specifically for this text: Foundations of criminological thought and contemporary revitalizations The emergence and growth of American criminology From appreciation to critique Late critical criminologies and new directions Punishment and security Geographies of crime Comprehensive cross-referencing between entries will provide the reader with signposts to later developments, to critiques and to associated theoretical developments explored within the book, and lists of further reading in every entry will encourage independent thinking and study. This book is an essential reference work for criminology students at all levels and is the perfect companion for courses on criminological theory.

Being Cultured Angus Kennedy, 2014-04-09 Today culture is everywhere as maybe never before. We read culture reviews, watch culture shows, live in Cities of Culture, and witness the Cultural Olympiad. Government, museums and arts councils worry that we are not getting enough culture and shape policy around notions of art and culture for all. Access and inclusion are in. Difficulty and exclusivity out. In *Being Cultured: in defence of discrimination* Angus Kennedy asks if this explosion of culture, and the breaking down of distinctions between high and low culture, has emancipated us or left us adrift without cultural moorings. Is it true that all cultures are equal? Is cultural diversity a good thing? Is it unacceptably elitist to insist on the highest standards of judgment? To argue that some cultural works stand the test of time and some don't? Can anyone dare to call themselves cultured anymore? Might it even be the case that culture no longer actually means anything much to us? That our nervousness about exercising discrimination and good taste - the erosion of cultural authority - might have left us with a culture that may be open to all, but lacking in depth? This provocative book strikes a blow for discrimination in culture and argues that there is a responsibility on each of us as individuals to always be becoming more cultured beings: our best selves. Kennedy revisits the tradition - from Cicero to Kant, Arnold to Arendt - of autonomy in

culture: both in the sense of its intrinsic value and how it rests on our individual freedom - quite apart from state and society - to discriminate and judge. A freedom, without which, we risk a widening culture of consensus and conformity. But which is the constitutive element of a world in common.

Killing the Competition Martin Daly, 2017-07-05 Criminologists have known for decades that income inequality is the best predictor of the local homicide rate, but why this is so has eluded them. There is a simple, compelling answer: most homicides are the denouements of competitive interactions between men. Relatively speaking, where desired goods are distributed inequitably and competition for those goods is severe, dangerous tactics of competition are appealing and a high homicide rate is just one of many unfortunate consequences. *Killing the Competition* is about this relationship between economic inequality and lethal interpersonal violence. Suggesting that economic inequality is a cause of social problems and violence elicits fierce opposition from inequality's beneficiaries. Three main arguments have been presented by those who would acquit inequality of the charges against it: that absolute poverty is the real problem and inequality is just an incidental correlate; that primitive egalitarian societies have surprisingly high homicide rates, and that inequality and homicide rates do not change in synchrony and are therefore mutually irrelevant. With detailed but accessible data analyses and thorough reviews of relevant research, Martin Daly dispels all three arguments. *Killing the Competition* applies basic principles of behavioural biology to explain why killers are usually men, not women, and counters the view that attitudes and values prevailing in cultures of violence make change impossible.

Serial Killers and the Phenomenon of Serial Murder David Wilson, Elizabeth Yardley, Adam Lynes, 2015-07-28 A superbly targeted resource for those learning about serial killings. *Serial Killers and the Phenomenon of Serial Murder* examines and analyses some of the best known (as well as lesser) cases from English criminal history, ancient and modern. It looks at the lifestyles, backgrounds and activities of those who become serial killers and identifies clear categories of individuals into which most serial killers fall. Led by Professor David Wilson the authors are all experts and teachers concerning the ever-intriguing subject of serial killing: why, when and how it happens and whether it can be predicted. Taking some of the leading cases from English law and abroad they demonstrate the patterns that emerge in the lives and backgrounds of those who kill a number of times over a period. The book is designed for those studying the topic at advanced level, whether as an academic discipline on one of the many courses now run by universities and colleges or as a private quest for understanding. It contains notes on key terms and explanations of topics such as co-activation, Munchausen syndrome, cooling-off period, psychopathy checklist, social construction, case linkage, family annihilation, activity space, rational choice theory, medicalisation and rendezvous discipline. As the first textbook of its kind it will be an invaluable resource for teachers and students of serious crime.

Delinquency and Juvenile Justice in American Society Randall G. Shelden, Emily I. Troshynski, 2019-07-16 What is

delinquency? What are the pathways to offending? What prevention strategies exist? To understand delinquency, we need to overcome stereotypical thinking and implicit biases. This engaging, affordable text explores the impact of gendered, racial, and class attitudes on decisions to arrest, detain, adjudicate, and place youths in the juvenile justice system. Sheldon and Troshynski highlight the social, legal, and political influences on how the public perceives juveniles. They look at the influences of family and schools on delinquency, as well as the impact of gender, trauma, and mental health issues. Discussions of topics such as the school-to-prison pipeline, disproportionate minority contact, and inequality provide a nuanced perspective on delinquency—a critical examination of social policies intended to control delinquency and the populations most likely to enter the juvenile justice system. The authors also examine the dramatically declining juvenile crime rate and advances in neuroscience that have fostered substantive reforms. These alternatives to confinement are replacing the institutions that have repeatedly produced failure with rehabilitative programs that offer hope for a more promising future.

Edinburgh Companion to the Critical Medical Humanities Whitehead Anne Whitehead, 2016-06-14 Original critical engagements at the intersection of the biomedical sciences, arts, humanities and social sciences In this landmark Companion, expert contributors from around the world map out the field of the critical medical humanities. This is the first volume to comprehensively introduce the ways in which interdisciplinary thinking across the humanities and social sciences might contribute to, critique and develop medical understanding of the human individually and collectively. The thirty-six newly commissioned chapters range widely within and across disciplinary fields, always alert to the intersections between medicine, as broadly defined, and critical thinking. Each chapter offers suggestions for further reading on the issues raised, and each section concludes with an Afterword, written by a leading critic, outlining future possibilities for cutting-edge work in this area. **Key Features** Offers an introduction to the second wave of the field of the medical humanities Positions the humanities not as additive to medicine but as making a decisive intervention into how health, medicine and clinical care might think about individual, subjective and embodied experience Exemplifies the commitment of the critical medical humanities to genuinely interdisciplinary thinking by stimulating multi-disciplinary dialogue around key areas of debate within the field Presents thirty-six original chapters from leading and emergent scholars in the field, who are defining its new critical edge

Trials of Passion Lisa Appignanesi, 2015-07-15 A journey into the heart of dark passions and the crimes they impel. When passion is in the picture, what is criminal, what is sane, what is mad or simply bad? Through court and asylum records, letters and newspaper accounts, this book brings to life some sensational trials between 1870 and 1914, a period when the psychiatric professions were consolidating their hold on our understanding of what is human. Outside fiction, individual emotions and the inner life had rarely been publicly discussed: now, in an increasingly popular press and its courtroom reports, people avidly consumed accounts of transgressive sexuality, savage jealousy and forbidden desires. These stood revealed as aspects not only of those labelled mad, but potentially, of everyone. With great story-telling flair and a wealth of historical detail, Lisa Appignanesi teases out the vagaries of passion and the clashes between the law and the clinic as they stumble towards a (sometimes reviled) collaboration. Sexual etiquette and class roles, attitudes to love, madness and gender, notions of respectability and honor, insanity and lunacy, all are at play in that vital forum in which public opinion is shaped—the theater of the courtroom.

The Gorilla Man Strangler Case Alvin A. J. Esau, 2022-06-15 The hitchhiker seemed harmless. He was dressed in a blue suit and a colorful sweater, accessorized with a grey cap and tan shoes. He carried nothing. It was the morning of June 8, 1927, when the Chandler family picked up the well-dressed man in Minnesota and dropped him at the Canadian border. They had unwittingly transported notorious serial killer, “The Gorilla Man,” who had strangled more than twenty women from one end of the United States to the other. He would later murder Emily Patterson and 14-year-old Lola Cowan in Winnipeg. His identity was unknown. Written by Alvin A. J. Esau, *The Gorilla Man Strangler Case: Serial Killer Earle Nelson* is a detailed historical account of the Canadian manhunt, capture, and identification of Earle Leonard Nelson, an escapee from a California mental institution. Drawing on archival sources, it's the first reliable biography of Nelson, who was hung in Manitoba on January 13, 1928. This case study also deals with various political and professional issues that arose in the pretrial, trial, and post-trial periods and spotlights the clash between Nelson's court-appointed defence attorney James Stitt, and psychiatrist Dr. Alvin Mathers, along with the chilling role of Canada's so called official hangman “Arthur Ellis” – all information that has never been published before. Esau also raises various enduring issues about the social construction of serial killers, debates about capital punishment, psychopathy, the scope of the insanity defence, the effect of pretrial publicity, and the trial as public entertainment.

We Walk Amy S. F. Lutz, 2020-10-15 In this collection of beautiful and raw essays, Amy S. F. Lutz writes openly about her experience—the positive and the negative—as a mother of a now twenty-one-year-old son with severe autism. Lutz's human

emotion drives through each page and challenges commonly held ideas that define autism either as a disease or as neurodiversity. We Walk is inspired by her own questions: What is the place of intellectually and developmentally disabled people in society? What responsibilities do we, as citizens and human beings, have to one another? Who should decide for those who cannot decide for themselves? What is the meaning of religion to someone with no abstract language? Exploring these questions, We Walk directly—and humanly—examines social issues such as inclusion, religion, therapeutics, and friendship through the lens of severe autism. In a world where public perception of autism is largely shaped by the quirky geniuses featured on television shows like The Big Bang Theory and The Good Doctor, We Walk demands that we center our debates about this disorder on those who are most affected by its impacts.
