**Dr. A.P.J. Abdul Kalam**

**Information Services for HIV/AIDS** DIANE Publishing Company, 1995-10 Report of a conference co-sponsored by the NLM and the NIH Office of AIDS Research, June 28-30, 1993. Reviews the various HIV/AIDS information resources and services that the the NIH has instituted since the beginning of the AIDS pandemic. Provides information on the findings and recommendations of five panels: clinical researchers; medical, dental, and nursing providers; allied health care providers; media and the general public; patients and the affected community.

**AIDS at 30** Victoria A. Harden, Anthony Fauci, MD, 2012-01-01 Society was not prepared in 1981 for the appearance of a new infectious disease, but we have since learned that emerging and reemerging diseases will continue to challenge humanity. AIDS at 30 is the first history of HIV/AIDS written for a general audience that emphasizes the medical response to the epidemic. Award-winning medical historian Victoria A. Harden approaches the AIDS virus from philosophical and intellectual perspectives in the history of medical science, discussing the process of scientific discovery, scientific evidence, and how laboratories found the cause of AIDS and developed therapeutic interventions. Similarly, her book places AIDS as the first infectious disease to be recognized simultaneously worldwide as a single phenomenon. After years of believing that vaccines and antibiotics would keep deadly epidemics away, researchers, doctors, patients, and the public were forced to abandon the arrogant assumption that they had conquered infectious diseases. By presenting an accessible discussion of the history of HIV/AIDS and analyzing how aspects of society advanced or hindered the response to the disease, AIDS at 30 illustrates for both medical professionals and general readers how medicine identifies and evaluates new infectious diseases quickly and what political and cultural factors limit the medical community's response.

*AIDS in Asia* Yichen Lu, Max Essex, 2004-06-01 Asia has become the new battle ground for the war against HIV/AIDS. The magnitude of the potential public health problems caused by AIDS in this populous continent may become a catastrophic disaster. A 10% rate of prevalence of HIV-1 in India and China alone would mean more than 200 million people are infected with HIV. AIDS in Asia is useful as a comprehensive, up-to-date AIDS reference book for public health and medical professionals. This volume provides concrete information on the diagnosis, treatment, care, prevention and impact of AIDS. Part I contains 'Snapshots of HIV/AIDS in Asia.' Countries and regions included in this section are: Thailand, India, China, Japan, Vietnam, Laos, Cambodia, Myanmar, Malaysia, Indonesia, the Philippines, Pakistan, Nepal, Sri Lanka, Hawaii and the

Pacific Islands, Hong Kong and Taiwan. Part II addresses the molecular epidemiology of HIV/AIDS. Part III deals with the diagnosis, surveillance and projected scenarios of the AIDS epidemic. Part IV outlines prevention efforts and treatment options. Part V provides an overview of the ongoing collaborative efforts involved in several different nations in the worldwide war against AIDS. This volume will be invaluable to all the public health professionals and researchers working in this field. ...the book is a useful addition to the HIV/AIDS literature. AIDS in Asia offers a comprehensive, interesting overview of the epidemic there and of general issues that will influence its progression. -Roger Detels, MD, MS, University of California-Los Angeles The Journal of the American Medical Association, Book Review, 293:15

Do We Care? K. Sujatha Rao, 2016-12-20 India is one of the fastest-growing economies in the world. Yet health is not a part of our ambitious development story. In fact, India's disproportionately stingy healthcare budget makes some of the poorer nations look better in comparison. Statistics, however, speak louder than critics: we have one of the highest numbers of women dying in childbirth and under-five mortality rates. Every year nearly sixty million people get pushed below the poverty line due to the health expenditures that they incur. But there are a few bright spots too: India has eradicated polio and reversed the incidence of HIV/AIDS by an impressive margin. Drawing on her experience as the former union health secretary, K. Sujatha Rao gives us an unsparingly candid insider's view of India's health system. This richly detailed book favours increasing the health budget, greater use of technology, and providing leadership and good governance. Rao argues that unless good health is prioritized as a national goal, India's growth story will remain largely self-congratulatory.

*India's Public Health System* Monica Das Gupta, Manju Rani, 2004

**Sexuality in the Time of AIDS** Ravi K Verma, 2004-06-30 This book contributes greatly to our understanding of contemporary sexual behaviour and sexual attitudes in both rural and urban India and in different strata of society, including adolescent girls, sex workers (male and female), college students and slum dwellers. Presenting case studies from around the country, the original essays in this book identify the contextual, cultural and social factors that contribute to the risk of infection. They cover three broad areas: -/-/- - An overview of the HIV/AIDS epidemic in India and the response of both the government and the public. -/- - Perspectives from diverse communities concerning premarital, marital and extramarital sexuality. -/- - Lessons learned at the national level in terms of research methodology and in the development of new approaches to HIV/AIDS. -/-/- Overall, the book stresses the need to view sexuality and risk in a broad cultural and social context, as also emphasizes the need to learn directly from the community in order to develop innovative programmes.

**Creating A Livable Planet** Dr. A.P.J. Abdul Kalam, 2021-01-01 Creating A Livable Planet: Dr. A.P.J. Abdul Kalam's Vision for a Sustainable Future by Dr. A.P.J. Abdul Kalam: Explore the visionary leadership of Dr. A.P.J. Abdul Kalam as he presents his vision for a sustainable future, emphasizing environmental conservation, sustainable development, and the importance of individual and collective efforts to achieve an ecologically balanced world. A nation's capability of self-sustainability is seen

as the foremost marker for it to be considered a developed nation. Its self-sufficiency in agriculture; economy; health and education facilities for its citizens builds its sustainability. An ideal nation should be able to fulfil the basic needs for each of its citizen on its own. To achieve this level of self-sufficiency was one of India's former President Dr. A.P.J. Abdul Kalam's major aspirations for the country. Creating A Livable Planet is a volume especially compiled with an aim to preserve and spread Dr. Kalam's enlightening and informative ideas on the usage of right technology to benefit and improve India's agriculture; economy; atmosphere and health of citizens. He; through these articles; educates the citizens; both young and old; on how using inexpensive; conventional and nature-friendly techniques can help us enrich our agriculture; environment and health. He also advocates the adoption of necessary modern technologies that could help our society evolve.

HIV/AIDS Treatment in Resource Poor Countries Yichen Lu,Max Essex,Chris Chanyasulkit,2012-10-26 The book focuses on HIV/AIDS prevention and treatment strategies in resource-poor settings. Contributors include HIV/AIDS researchers and public health administrators from the US, Africa, China, and Thailand. Several chapters, written by local health officials, take a close look at AIDS prevention and treatment in China at the community level. Other chapters cover issues of treatment scale-up, drug resistance, and mother-to-child transmission in Southern Africa and Thailand, and offer lessons learned for researchers in other developing countries. Overall the aim of this book is to bring some of the latest issues to the fore, and to foster exchange and collaboration between AIDS researchers in developing countries. This book grew out of an annual conference held in China and organized by the Harvard School of Public Health, and could possibly become the first volume of a series.

**Inside Out** P.C. Joshi and V.K. Srivastava, 2024-01-01 The present autobiographical compilation is unique in the sense that it is not one full-length portrayal of one anthropologist but a succinct and terse life-sketch formatted around a framework by large number of active anthropologists of contemporary times right from the seniormost anthropologist R.K. Mutatkar to Somenath Bhattacharjee. As a result, what is presented in the book, is a unique compendium on the self-memoirs by Indian anthropologists. The autobiographies presented in this volume are narratives on the circumstances and situation making people pursuing anthropology as a career highlighting specific challenges and rewards in their quest for understanding themselves eventually.

### **Addressing the Sexually Transmitted Infections Epidemic in the United States: A Sociomedical Perspective**

Christopher Williams, Laura Skrip, Darren Whitfield, Keith L. Gray, 2023-12-04 Rates of sexually transmitted infections (STIs) have significantly increased in the United States. Per-capita estimates reveal approximately 68 million prevalent and 26 million incident STIs nationally. Gonorrhea, syphilis, and chlamydia—the three reportable STIs—reached levels not seen in the last fifty years and this resurgence is concurrent with increasing antimicrobial resistance and a dearth of viable candidates in the vaccine pipeline. A seminal report by the National Academies of Sciences, Engineering, and Medicine, Sexually Transmitted Infections: Adopting a Sexual Health Paradigm, confirms that STIs rank among the most pressing and intractable public health threats. Furthermore, rising rates of STIs exact a substantial societal, medical, and economic burden that strain public health capacity, which has been substantially debilitated in the wake of the Covid-19 pandemic. STIs can have serious consequences for sexual, reproductive, and overall health. Untreated syphilis, for instance, is directly

implicated in neurological, cardiovascular, and dermatological disease. Human papillomavirus is a known cause of cervical cancer and is the most common cancer among women globally. Hepatitis B increases risk for cirrhosis and primary liver cancer. Despite reductions in HIV transmission and improvements in prevention and treatment, infections among women, girls, adolescents, and mother-to-child transmission remain unacceptably high. Marginalized racial/ethnic minorities, LGBTQ persons, vulnerable at-risk adolescents and young adults, and other underrepresented populations are more susceptible to STIs as they negotiate an array of factors that can delay and even preclude access to preventive interventions. The United States spends substantially more on STI prevention and treatment yet it consistently bares a disproportionate burden of sexually transmitted infections compared to other Western industrialized nations. Access to healthcare, erosion and diversion of public health capacity, racism, discrimination, stigma, substandard education, and poverty have all been identified as important contributors to the trajectory of acute sexually transmitted infections. Furthermore, upstream drivers such as national, state, and local public health policies have been associated with population-level STI risk, prevention, and treatment and as such offer opportunities for ecological, observational, and multi-level analyses to assess their direct and indirect impact on sexual health outcomes. In this thematic collection, we aim to present an interdisciplinary collection of high-quality articles centered on the premise that the rise of emerging and re-emerging STIs can be attributed, in part, to a complex interaction of sociomedical factors beyond individual behavioral risk profiles. This Research Topic welcomes a variety of manuscript formats including original research, brief reports, systematic reviews, and perspective manuscripts involving sociomedical factors, social determinants of health, health disparities, infectious disease epidemiology, and other drivers including health policies that act as barriers and facilitators of effective STI prevention and treatment. Manuscripts that examine structural, community, institutional, interpersonal, and broad individual factors linked to STIs are very well suited for this collection. Topic areas include, but are not limited to: • Structural racism, discrimination, and stigma and their influence on prevention, treatment, and support services among vulnerable and marginalized populations; • Housing and income insecurity that impede sexual, reproductive, and overall health; • Biological factors that affect the spread of STIs including their asymptomatic nature and the influence of sex as a biological variable; • Intimate partner violence, harassment, and intimidation; • Substance abuse, sex work, sexual networks, and normative sexual attitudes and beliefs that impede the adoption of preventive health-promoting behaviors; • Priority populations including adolescents, men who have sex with men, youth who are LGBTQ, and the incarcerated; • Impact of HIV pre-exposure prophylaxis (PrEP) uptake on STI incidence; • Culturally-specific biopsychosocial, behavioral, and community-based STI interventions to treat and support those afflicted with STIs; • Community mobilization and community-based organization to reduce STIs; • Community-level prevalence of infectious agents; • Local and holistically-integrated STI clinics; • Public health STI workforce capacity; • Health in All Policies (HiAP) approaches to STI prevention and treatment. Christopher Williams is the Senior Vice President

and Director of Research at National Health Promotion Associates, a private research and development firm that specializes in the development, testing and dissemination of evidence-based approaches to target behavioral risk factors associated with major chronic diseases, violence, accidents and preventable injuries. The other Topic Editors declare no competing interests with regard to the Research Topic subject.

Encyclopedia of AIDS Raymond A. Smith,1998-08-27 The Encyclopedia of AIDS covers all major aspects of the first 15 years of the AIDS epidemic, including the breakthroughs in treatment announced at the International AIDS Conference in July 1996. The encyclopedia provides extensive coverage of major topics in eight areas: basic science and epidemiology; transmission and prevention; pathology and treatment; impacted populations; policy and law; politics and activism; culture and society; and the global epidemic. With more than 300 entries written by 175 specialists and illustrated with more than 100 photographs and charts, the Encyclopedia of AIDS is an essential reference work for students at the undergraduate and graduate levels, professionals in a wide variety of medical, service, and care fields, academics, researchers, journalists, and general readers.

**Unleashing India's Innovation** Mark Dutz,2007-10-15 India's recent growth rate has been impressive, with real GDP rising by over 8 percent a yearsince 2004. The country is also becoming a top global innovator for high-tech products andservices. Still, India is underperforming relative to its innovation potential. Even a dynamicyoung population--more than half of whom are under 25 years of age--is constrained when skillstraining and higher education are insufficient. To sustain competitiveness, economic growth, andrising living standards over the long term, India needs to aggressively harness its innovation potential. The term innovation is broadly defined in this book to include both the creation andcommercialization of new knowledge and the diffusion and absorption of existing knowledge in newcontexts. A unique feature is the book's focus on inclusive innovation, that is, knowledge creationand absorption activities most relevant to the needs of the poor. Concrete recommendations aremade for increasing productivity and welfare through the disciplining role of competition,

including training and education, information infrastructure, and public and private finance as support mechanisms for broad-based innovation. 'Unleashing India's Innovation: Toward Sustainable and Inclusive Growth' provides national and local policy makers, private sector enterprises, academic and research institutions, international organizations, and civil society with a better understanding of the power of innovation to fuel economic growth and poverty reduction.

*AIDS in Asia* Jai P Narain, 2004-11-16 This volume discusses the many advances in HIV research, new initiatives and their promise for application in the Asian region. It highlights the critical need for national commitment and adequate resources, and for addressing the underlying HIV-risk related behaviours and vulnerabilities. The contributors also examine the concept of comprehensive care - from home and from the community to the institutional level - as well as providing up to date information on HIV drug and vaccine development.

**Neuropsychiatric Complications of HIV** Anchal Singh, 2024-11-26 Thanks to advances in Anti-Retroviral Drugs (ARTs), HIV is treatable and those who have the disease are often able to lead a normal life. However, as a chronic (and incurable) infectious disease, HIV positive patients are susceptible to neuropsychiatric complications. These complications reduce the quality of life for the individual and exponentially increase the cost of medical care and medications to treat both conditions. *Neuropsychiatric Complications of HIV: A Challenging Health Concern* examines these neuropsychiatric complications prevalent in those who are HIV positive, providing clinical correlation, translational significance, and details guides to neurocognitive assessment, brain imaging, and related neuropharmacology. Written for clinicians, researchers, and students working with HIV and AIDS, the book begins with the biology of HIV, a complete look at available ARTs and antibodies, as well as diagnostics tools for HIV. It continues on to the epidemiology of NeuroAIDs and the manifestations of it—cognitive deficits, dementia, depression, agitation, psychosis, and cognitive slowing. - Includes at-a-glance flow charts for clinical strategy - Presents review questions to enhance understanding of content - Calls out translational significance in each chapter - Examines ethical issues and possible solutions - Provides an extensive list of online resources for related subject material
