**Development Planning in South Africa** John Reynolds,2018-06-15 Celebrated as a beacon of democracy and reconciliation, many people in South Africa continue to live in severe poverty, particularly in the Eastern Cape Province. Backed by the United Nations Development Programme, the Eastern Cape's provincial government consequently launched an historically ambitious programme – the Provincial Growth and Development Plan – aimed at tackling the province's poverty, unemployment and inequality over a ten-year period in a radical policy overhaul. Drawing on the author's first-hand engagement with the planning process, *Development Planning in South Africa* is an empirically rich study that utilises a strategic-relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state. The first work of its kind, the book provides an indispensable micro-level study with profound implications for how state power is understood to be organised and expressed in state policy. Relevant beyond South Africa to policy implementation in both developing and developed states globally, the book is essential reading for students and scholars of government studies, political economy, development, policy studies and social movements.

*A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands* Rodney Moffett,2021-04-19 This bibliography includes scientific articles on the Drakensberg, Maloti and Adjacent Lowlands published between 1808 and 2019. Although focusing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished, yet traceable, reports, documents, presentations and dissertations, these are also included. The bibliography has two parts – a complete list arranged alphabetically, and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries, to Rock Art with 502 entries.

**Mammals of Africa: Volume IV** Jonathan Kingdon,2014-11-20 *Mammals of Africa (MoA)* is a series of six volumes which describes, in detail, every currently recognized species of African land mammal. This is the first time that such

extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution (including reference to fossil and molecular data) of Africa's mammals. With more than 1,160 species and 16-18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format, with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned, as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina, and written by more than 350 authors, all experts in their fields, *Mammals of Africa* is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume IV, edited by Meredith Happold and David Happold, contains profiles of 156 species of insectivores, comprising the hedgehogs and shrews. The rest of the volume is devoted to the 224 species of African bats. The latter are divided into nine families, namely fruit bats, horseshoe bats, leaf-nosed bats, false vampire bats, mouse-tailed bats, sheath-tailed bats, slit-faced bats, free-tailed bats and vesper bats.

[The Politics and Governance of Basic Education](#) Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-08-24 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford

Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning.

**Revaluation and Preservation of Indigenous Knowledge Systems in Modern Society** Tlou Masenya, Monicca Bhuda, 2025 The overall objective of this book is to present scholarly perspectives, ideas and recommendations in addition to publishing excellent articles that explore the role and importance of indigenous knowledge in the modern society--

*Managing for Healthy Ecosystems* David J. Rapport, Bill L. Lasley, Dennis E. Rolston, N. Ole Nielsen, Calvin O. Qualset, Ardeshir B. Damania, 2002-10-29 One of the critical issues of our time is the dwindling capacity of the planet to provide life support for a large and growing human population. Based on a symposium on ecosystem health, *Managing for Healthy Ecosystems* identifies key issues that must be resolved if there is to be progress in this complex area, such as: Evolving methods for regional ecosystem health assessment employing complex adaptive systems coupled with adaptive technologies to permit accurate determination of changes in regional and global environments Issues and methods for assessing, monitoring, and managing diversity and its impact on human health in the context of climate change, agroecosystems, restoration of forests, politics, culture, and tradition. Leading thinkers in the field provide a coherent synthesis and a benchmark for the practice of this emerging field worldwide. The more than 100 peer-reviewed papers are grouped into three major parts. The first, *Emerging Concepts*, explores the diverse meanings of ecosystem health within ecological, socio-economic, and human health perspectives, and the linkages to related concepts such as ecological integrity, sustainable development, and ecological footprints. The second part, *Issues and Methods*, introduces methods for assessing and monitoring ecosystem health, including strategies for gaining political and stakeholder input and support for science-based ecosystem management. The final part, *Case Studies*, reports experiences of interdisciplinary teams grappling with specific issues in a variety of aquatic and terrestrial ecosystems.

**Exploring Effective Municipal Planning and Implementation** Munzhedzi, Pandelani Harry, Mathebula, Erasmus, Makamu, Ntsako Idris, 2024-07-31 Among municipalities in developing nations, systemic issues such as corruption,

mismanagement, and limited accountability plague local governance, impeding development efforts and hindering effective service delivery. This perpetual cycle of failure undermines the aspirations outlined in municipal plans, erodes public trust, and perpetuates socio-economic disparities. Despite recognizing these challenges, tangible solutions remain elusive, leaving communities trapped in a cycle of underdevelopment and frustration. Exploring Effective Municipal Planning and Implementation offers a comprehensive exploration of these pressing issues, and consolidates expertise and insights of academics and practitioners. Through rigorous analysis and innovative approaches, this book dissects the root causes of municipal failures, and identifies practical mechanisms for improvement. Delving into municipal planning, budgeting, and governance, this book equips readers with the knowledge and tools needed to drive meaningful change in local governance practices. This book focuses on transforming struggling municipalities into entities of effective governance and sustainable development. Harness the collective wisdom of experts from around the globe with this book, and discover the hope you have been seeking for your community to break free from cycle of municipal hardship.

Children in South African Families Nene Ernest Khalema, Monde Makiwane, Mzikazi Nduna, 2016-09-23 This book presents a comprehensive overview of African children's lives in times of transition, transformation, and change some twenty-two years after political emancipation in South Africa. With diverse family formations, non-marital childbearing, and diverse parenting situations prevalent in South Africa, the book covers both the conceptual and theoretical questions that explore the context of children's experiences. It uses examples from a range of primary and secondary data sources to illustrate how resilience in children faced with adversity could be nurtured, demonstrating the links between theory and practice, and critically commenting on questions of epistemology by drawing on research with children within different African social and cultural contexts. While the volume affirms the complexities of explaining child adversity or privilege, it stresses the diversity of South African children's experiences and the importance of adopting both children's rights and Afro-centric perspectives to account for the commonality and diversity of childhood and children's empowerment in diverse family systems. The contributions also provide recommendations on how to respond and intervene in children's issues, from both practical and policy levels, in a dedicated manner to ensure that children are protected from harm, nurtured to succeed, and assisted during and after traumatic experiences. This volume represents a valuable resource for scholars and students in the fields of humanities, social science, development studies and public health, as well as policy makers, child practitioners, and child rights advocates.

*Land Management and Food/Nutrition (In)Security In Mixed Farming Systems* Ermias Teferi Demessie, Karuturi Venkata Suryabagavan, Tibebu Kassawmar, Matebu Tadesse, Abebe Shiferaw Dakka, Gizaw Desta, Mirgissa Kaba, 2025-03-21 The need to increase agricultural productivity due to the high demand of animal feeding and to provide food for growing global population has placed intense pressure on the agriculture landscape causing land degradation. This issue has heavy

consequences on smallholder farmers, which constitute the majority of the global agricultural community, making the access to sustainable nutrition ambitious for many communities. Reducing land degradation, understanding the process, causes and effects, and improving the management of natural resources became among the targets of Sustainable Development Goals. Nowadays, the implementation of context specific and innovative land management practices is a widely recognized solutions to ending land degradation (Hurni et al., 2010). Despite this, it has never been implemented as widely as intended and little is known about their effectiveness in terms of restoring landscapes, and boosting food and nutrition security. The lack of long-term observations and actions contributed to the limited knowledge available about the role of land management practices in food security. To this end, assessing and documenting the role and effectiveness of land management practices in food security is a relevant and critical research issue that requires appropriate attention. This Research Topic aims to collect articles to address: i) best land management practices in effectively transforming degraded landscapes to food producing landscapes; and ii) documenting success and failure stories of land management practices in addressing food and nutrition security.

**African Local Knowledge & Livestock Health** William Beinart, Karen Brown, 2013 A much needed examination of contemporary approaches to animal healing in South Africa, informed by a strong understanding of history.

The Archaeology of Southern Africa Peter Mitchell, 2024-06-06 This revised and updated edition provides a comprehensive synthesis of Southern Africa's archaeology over more than 3 million years.

The Ixodid Ticks (Acari: Ixodidae) of Southern Africa Ivan G. Horak, Heloise Heyne, Roy Williams, G. James Gallivan, Arthur M. Spickett, J. Dürr Bezuidenhout, Agustín Estrada-Peña, 2018-02-14 This is a comprehensive work summarizing the current state of knowledge of the biology of the hard ticks (Acari: Ixodidae) of Southern Africa (South Africa, Namibia, Botswana, Swaziland, Lesotho and Maputo Province, Mozambique). It provides an overview of the history of tick research in Southern Africa and the evolution of our knowledge of the ticks' distribution and biology, as well as the methods used to determine tick distribution, abundance and host preference. The morphologies of most of the tick species known to occur in Southern Africa are described and illustrated, and their distributions are described and mapped in relation to the biomes of the region. The known hosts for each tick species are listed, and the tick's host preferences are discussed. Information on most species life cycle in the laboratory and the field, and their seasonal occurrence, is summarized. The diseases of animals and humans transmitted or caused by each tick species are summarized in relation to tick ecology. Aspects of the biology of the major hosts relevant to tick infestations are described, and extensive tick/host and host/tick lists are provided for each country.

Mycotoxins in Plants and Plant Products Martin Weidenböcker, 2017-05-10 This book provides detailed data and information about the cereals and cereal products that are affected by mycotoxins, and gives a basic overview of mycotoxins in these foodstuffs. Mycotoxin contamination of food occurs as a result of crop invasion by field fungi such as *Fusarium* spp.

and *Alternaria* spp., or storage fungi such as *Aspergillus* spp. and *Penicillium* spp., which can grow on/in stored commodities and are able to produce mycotoxins. In the worst case, these fungi produce secondary metabolites called mycotoxins, which can be very harmful to humans and animals when, for example, they are consumed through food due to their various negative effects on several organs in both humans and animals. *Mycotoxins in Plants and Plant Products: Cereals and Cereal Products* lists the predisposition of a foodstuff for mycotoxin contamination, as well as the degree of contamination, concentration, and country of detection/origin for each case of mycotoxin contamination of this kind of foodstuff. It includes both alphabetical and numerical lists of literature.

**Performative Inter-Actions in African Theatre 1** Kene Igweonu, Osita Okagbue, 2014-01-14 This book is part of a three-volume book-set published under the general title of *Performative Inter-Actions in African Theatre*. Each of the three books in the set has a unique subtitle that works to better focus its content, and differentiates it from the other two volumes. The contributors' backgrounds and global spread adequately reflect the international focus of the three books that make up the collection. The contributions, in their various ways, demonstrate the many advances and ingenious solutions adopted by African theatre practitioners in tackling some of the challenges arising from the adverse colonial experience, as well as the "one-sided" advance of globalisation. The contributions attest to the thriving nature of African theatre and performance, which in the face of these challenges, has managed to retain its distinctiveness, while at the same time acknowledging, contesting, and appropriating influences from elsewhere into an aesthetic that is identifiably African. Consequently, the three books are presented as a comprehensive exploration of the current state of African theatre and performance, both on the continent and diaspora. *Performative Inter-Actions in African Theatre 1: Diaspora Representations and the Interweaving of Cultures* explores the idea that, in and from their various locations around the world, the plays of the African diaspora acknowledge and pay homage to the cultures of home, while simultaneously articulating a sense of their Africanness in their various inter-actions with their host cultures. Contributions in *Diaspora Representations and the Interweaving of Cultures* equally attest to the notion that the diaspora – as we see it – is not solely located outside of the African continent itself, but can be found in those performances in the continent that engage performatively with the West and other parts of the world in that process of articulating identity.

**The Increasing Risk of Floods and Tornadoes in Southern Africa** Godwell Nhamo, Lazarus Chapungu, 2021-08-03 This volume discusses the increasing occurrence of floods and tornadoes in Southern Africa over the last few years. The book discusses existing flood and tornado management protocols, indigenous approaches to mitigate disaster risk, urban and peri-urban flooding, tornado-induced flooding and windstorms, and the challenges and vulnerabilities associated with rural and transboundary floods. The book offers planning and recovery strategies to minimise impacts from these events through sustainable means. Such means include sustainable drainage systems, waste management in harbors and beaches,

community engagement in flood-prone areas, and improved food security measures in urban poor households.

**Biological Treatment of Solid Waste** Elena C. Rada,2015-09-04 This title includes a number of Open Access chapters. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, Biological Treatment of Solid Waste: Enhancing Sustainability reviews several technologies that help communities manage solid waste sustainably, while at the same time gen

**Agriculture and Ecosystem Resilience in Sub Saharan Africa** Yazidhi Bamutaze,Samuel Kyamanywa,Bal Ram Singh,Gorettie Nabanoga,Rattan Lal,2019-05-22 This volume discusses emerging contexts of agricultural and ecosystem resilience in Sub Saharan Africa, as well as contemporary technological advances that have influenced African livelihoods. In six sections, the book addresses the sustainable development goals to mitigate the negative impacts on agricultural productivity brought about by climate change in Africa. Some of the challenges assessed include soil degradation, land use changes, natural resource mismanagement, declining crop productivity, and economic stagnation. This book will be of interest to researchers, NGOs, and development organizations. Section 1 focuses on climate risk management in tropical Africa. Section 2 addresses the water-ecosystem-agriculture nexus, and identifies the best strategies for sustainable water use. Section 3 introduces Information Communication Technology (ICT), and how it can be used for ecosystem and human resilience to improve quality of life in communities. Section 4 discusses the science and policies of transformative agriculture, including challenges facing crop production and management. Section 5 addresses landscape processes, human security, and governance of agro-ecosystems. Section 6 concludes the book with chapters uniquely covering the gender dynamics of agricultural, ecosystem, and livelihood resilience.
