Achieving sustainable cultivation of cassava Volume 1 Dr Clair H. Hershey, 2017-07-31 Discusses the growing importance of cassava as a global crop; Reviews trends and challenges in cassava cultivation in Asia, Africa and Latin America; Summarises current best practice in cassava agronomy, including seed systems, soil and nutrient management, crop rotations and intercropping, and postharvest management

Cassava Research and Development in Asia: Exploring New Opportunities for an Ancient Crop. ,

Sustainable Agricultural Value Chain Habtamu Alem, Pradyot Ranjan Jena, 2022-11-23 The book discusses scientific, technical, and sociological aspects of sustainable agricultural value chains, focusing on coffee and tea production. The book advocates a value-chain strategy and highlights the importance of tracking the effects of climate change. Increasing the amount of value-added products via irrigation is critical to combating climate change and achieving sustainable development. Furthermore, blockchain technology has the potential to transform agricultural business models and supply chain networks.

World Food Alfred R. Conklin, Thomas Stilwell, 2007-10-26 A comprehensive look at food production and consumption worldwide This global overview of agriculture discusses all of the primary aspects of food production and relates that information to human nutritional needs. It covers everything from food crop production to food preparation. Beginning with a detailed description of representative farms in different climates, *World Food: Production and Use*: Describes how and where food is produced and who produces it Compares and contrasts different farming systems and describes how local culture and

environment influence food production and use Contains detailed information on human nutrition Features specific information on: grain crops; vegetables; root crops; fruits, berries and nuts; and farm animals and fish Discusses factors that impact food production, including weather, soil, fertility, and water Includes a chapter on increasing food supplies Addresses some of the issues surrounding Genetically-Modified Organisms (GMOs) Complete with a CD-ROM with color graphs, tables, and pictures, this is an ideal textbook for courses on world food systems in agriculture, agronomy, crop science, and food science programs. It is also an excellent resource for professionals working in agricultural or international development, relief agencies, or volunteer organizations such as the Peace Corps. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Biotechnology of Food Crops in Developing Countries T. Hohn,K.M. Leisinger,2012-12-06 Recent advances in gene technology, plant transformation, and the growing knowledge of DNA sequences of plants as well as of their most important parasites and symbionts offer many interesting prospects for the breeding of new crop varieties. This was not only recognized by the major seed companies, but also by the governments of developing countries and by worldwide foundations supporting their agriculture. The know-how gained by the seed companies on crops important for the agricultural industry in developed countries could easily be provided for free to the international and national organizations dedicated to development of crops important in the third world. Results obtained worldwide become easily available to everybody through the scientific literature. Likewise, agricultural research in, e.g., the USA or Europe profits from the natural plant gene pool available in the third world. All this definitely provides for the possibility of fast change, new prosperity and security of food supply in the whole world, if properly applied. The fast development also asks for ethical and sociopolitical considerations, whereby not doing the right can be as much a mistake as doing the wrong.

Food Safety and Quality Systems in Developing Countries André Gordon,2020-04-16 Food Safety and Quality Systems in Developing Countries: Volume III: Technical and Market Considerations is a practical resource for companies seeking to supply food products from developing countries to developed country markets or to transnational business located in developing countries. It explores practical approaches to complying with food safety and quality systems requirements, backed by the science-based approaches used in the major markets applied in a developing country context. It explores the topic from the perspective of agribusiness value chains and includes deconstructions of regulatory and market channel-specific technical requirements in North America, Europe, and other major markets. Volume III builds on the platforms laid

by the previous two volumes, providing guidance from industry-leading experts on addressing regulatory and market-specific microbiological, chemical, packaging and labelling, supply chain, and systems-related food safety and quality compliance requirements. This book addresses technical and market-determined standards that value chain participants in developing countries face supplying developed country markets or transnational firms, including hotels, major multiples, and quick serve restaurant brands.

The Palgrave Handbook of Agricultural and Rural Development in Africa Evans S. Osabuohien, 2020-07-06 This handbook examines agricultural and rural development in Africa from theoretical, empirical and policy stand points. It discusses the challenges of the United Nations Sustainable Development Goals (SDGs) and assesses how poverty and other development concerns can be addressed in rural communities through agricultural transformation. Additionally, the handbook extends the Post-2015 Development Agenda and it emphasizes the importance of the agricultural sector as it is closely related to the issues of food sustainability, poverty reduction, and employment creation. The contributors suggest multiple evidence-based policies to develop the rural areas through the transformation of the agricultural sector which can significantly benefit the African continent.

Medical Toxicology Pınar Erkekoglu, Tomohisa Ogawa, 2021-02-03 Medical toxicology is a sub-branch of toxicology concerned with the diagnosis, management, and prevention of poisoning and other adverse effects of drugs, cosmetics, personal care products, occupational and environmental toxicants, and biological agents. Poisoning with drugs, herbs, venoms, and toxins is a significant global public health problem. Medical toxicologists are involved in the assessment and treatment of acute or chronic poisoning, substance abuse, adverse drug reactions, drug overdoses, envenomation, industrial accidents, and other chemical exposures. As such, there is a pressing need for safe and specific antidotes, as many antidotes currently in use have a relatively low margin of safety or therapeutic index. This book focuses on poisonings with drugs, venoms, toxins, interaction in clinics, antidotes, and forensics. It provides qualified scientific knowledge on different aspects of medical toxicology, drug and substance abuse, clinical interactions between drugs and herbs, antidotes, antidote networks, and forensic toxicology.

Nutritional and Health Aspects of Food in Western Africa Ogugua Charles Aworh, Patricia Gyaa Owusu-Darko, 2024-07-10 Nutritional and Health Aspects of Native West African Foods is part of an ongoing series that continues to build out Elsevier's Nutritional and Health Aspects of Traditional and Ethnic Foods series. Written by a gender diverse team of experts, this book explores native and wild West African foods from Cameroon, Ghana, and Nigeria where 60% of West Africa live. Through valorization trials, the book analyzes nutritional components and the processing and safety of native plants and botanicals and shows how indigenous foods such as grains, fruits, tubers, fungi and cheese make a global impact on diet-related health claims and disease. From handling and processing methods to regulatory issues and sustainable

farming, this book presents a framework to discover the influence of historical eating habits on today's diets. • Promotes global availability and insight into native West African foods available in Cameroon, Ghana and Nigeria • Reviews the safety, processing and health benefits of these foods • Explores both scientific and anecdotal diet-related health claims • Analyzes nutritional components of native plants through valorization trials for global market • Presents framework to determine if these foods meet local and international regulatory requirements and presents strategies to remedy non-compliance

Plant Breeding Reviews, Volume 36 Jules Janick, 2012-09-17 Plant Breeding Reviews presents state-of-the-art reviews on plant genetics and the breeding of all types of crops by both traditional means and molecular methods. Many of the crops widely grown today stem from a very narrow genetic base; understanding and preserving crop genetic resources is vital to the security of food systems worldwide. The emphasis of the series is on methodology, a fundamental understanding of crop genetics, and applications to major crops. It is a serial title that appears in the form of one or two volumes per year.

Handbook of Vegetables and Vegetable Processing Muhammad Siddiq, Mark A. Uebersax, 2018-02-14 Handbook of Vegetables and Vegetable Processing, Second Edition is the most comprehensive guide on vegetable technology for processors, producers, and users of vegetables in food manufacturing. This complete handbook contains 42 chapters across two volumes, contributed by field experts from across the world. It provides contemporary information that brings together current knowledge and practices in the value-chain of vegetables from production through consumption. The book is unique in the sense that it includes coverage of production and postharvest technologies, innovative processing technologies, packaging, and quality management. Handbook of Vegetables and Vegetable Processing, Second Edition covers recent developments in the areas of vegetable breeding and production, postharvest physiology and storage, packaging and shelf life extension, and traditional and novel processing technologies (high-pressure processing, pulse-electric field, membrane separation, and ohmic heating). It also offers in-depth coverage of processing, packaging, and the nutritional quality of vegetables as well as information on a broader spectrum of vegetable production and processing science and technology. Coverage includes biology and classification, physiology, biochemistry, flavor and sensory properties, microbial safety and HACCP principles, nutrient and bioactive properties. In-depth descriptions of key processes including, minimal processing, freezing, pasteurization and aseptic processing, fermentation, drying, packaging, and application of new technologies. Entire chapters devoted to important aspects of over 20 major commercial vegetables including avocado, table olives, and textured vegetable proteins. This important book will appeal to anyone studying or involved in food technology, food science, food packaging, applied nutrition, biosystems and agricultural engineering, biotechnology, horticulture, food biochemistry, plant biology, and postharvest physiology.

Foods of Plant Origin Michael E. Netzel, Yasmina Sultanbawa, 2020-04-02 It is now well accepted that the consumption of plant-based foods is beneficial to human health. Fruits, vegetables, grains, and derived products can be excellent sources

of minerals, vitamins, and fiber and usually have a favorable nutrient-to-energy ratio. Furthermore, plant foods are also a rich source of phytochemicals such as polyphenols, carotenoids, and betalains, with potential health benefits for humans. Many epidemiological studies have made a direct link between the consumption of plant foods and health. Human intervention studies have also shown that higher intake/consumption of plant foods can reduce the incidence of metabolic syndrome and other chronic diseases, especially in at-risk populations such as obese people. In addition to its health benefits, plant foods are also used as functional ingredients in food applications such as antioxidants, antimicrobials, and natural colorants. The Special Issue “Foods of Plant Origin” covers biodiscovery, functionality, the effect of different cooking/preparation methods on bioactive (plant food) ingredients, and strategies to improve the nutritional quality of plant foods by adding other food components using novel/alternative food sources or applying non-conventional preparation techniques.

Achieving a nutrition revolution for Africa Hendriks, Sheryl L., 2016-10-17 Focusing the 2015 Annual Trends and Outlook Report (ATOR) on nutrition will contribute to a broader understanding of the critical role of nutrition in achieving international, continental, and national economic growth targets through agriculture, food security, and nutrition. This report presents information and analysis in support of evidence-based policy making that should inform the second generation of CAADP national investment plans now being developed. This is an important moment for shaping the region’s future and ensuring that the much-needed agriculture-led growth and development agenda can simultaneously deliver on improving nutrition, saving lives, improving productivity and health, and curbing nutrition-related diseases and the associated public health expenditures. These investment plans should address not only the usual elements of undernutrition but also widespread micronutrient deficiencies (termed “hidden hunger”) and the growing problem of overweight and obesity that is associated with economic growth.

Biochar Mattia Bartoli, Mauro Giorcelli, Alberto Tagliaferro, 2023-01-25 Biochar is the carbonaceous residue produced from the pyrolytic conversion of biomass. It is generally used for agricultural applications as a soil amendment but has far wider potential. This book presents the use of biochar as a platform for the development of new intriguing solutions in several cutting-edge fields. The book is a useful reference volume for any reader with a strong scientific and technological background, ranging from scientific advisors in private companies to academic researchers promoting the spread of knowledge about biochar to anyone not already working with it.
