Eastern Orthodox Christianity and Animal Suffering Christine Nellist, 2018-10-25 This book is the first academic work in Eastern Orthodox theological literature on the subject of animal suffering and human soteriology. It represents a natural progression of the contemporary Eastern Orthodox academic debate on the environment, and will be of interest not only to academic scholars in theology, religion, philosophy and ethics, but also to the wider Christian and secular communities. Using Biblical and Patristic teachings, together with new social science research and contemporary science, it presents arguments that animal suffering is against God's Will, and that the abuse or misuse of animals or indifference to animal suffering will result in negative consequences for human salvation. The book posits a revisionist interpretation of the Noahic narrative when addressing the challenging question of why God allows the dispensation of animals as food, and offers compelling arguments on why the contemporary animal food production industries and animal testing model should be rejected.

Animal Rights Christie Ritter, 2008 Explores the controversy surrounding animal rights, discussing the treatment of animals throughout history; the role of important players in the debate; and the use of animals as food, in scientific research, and in education.

Corporal Compassion Ralph R. Acampora, 2019-11-21 Most approaches to animal ethics ground the moral standing of nonhumans in some appeal to their capacities for intelligent autonomy or mental sentience. *Corporal Compassion* emphasizes the phenomenal and somatic commonality of living beings; a philosophy of body that seeks to displace any notion of anthropomorphic empathy in viewing the moral experiences of nonhuman living beings. Ralph R. Acampora employs phenomenology, hermeneutics, existentialism and deconstruction to connect and contest analytic treatments of animal rights and liberation theory. In doing so, he focuses on issues of being and value, and posits a felt nexus of bodily being, termed symphysis, to devise an interspecies ethos. Acampora uses this broad-based bioethic to engage in dialogue with other strains of environmental ethics and ecophilosophy. *Corporal Compassion* examines the practical applications of the somatic ethos in contexts such as laboratory experimentation and zoological exhibition and challenges practitioners to move past recent reforms and look to a future beyond exploitation or total noninterference—a posthumanist culture that advocates caring in a participatory approach.

The Great Compassion Norm Phelps, 2004 Buddhism ought to be an animal rights religion par excellence. It has long

held that all life forms are sacred and considers kindness and compassion the highest virtues. Moreover, Buddhism explicitly includes animals in its moral universe. Buddhist rules of conduct - including the first precept, Do not kill - apply to our treatment of animals as well as to our treatment of other human beings. Consequently, we would expect Buddhism to oppose all forms of animal exploitation, and there is, in fact, wide agreement that most forms of animal exploitation are contrary to Buddhist teaching. Yet many Buddhists eat meat - although many do not - and monks, priests, and scholars sometimes defend meat-eating as consistent with Buddhist teaching. The Great Compassion studies the various strains of Buddhism and the sutras that command respect for all life. Norm Phelps, a longtime student of Buddhism and an acquaintance of His Holiness the Dalai Lama, answers the central questions of whether Buddhism demands vegetarianism and whether the Buddha ate meat. He is not afraid to examine anti-animal statements in Buddhist lore - particularly the issues of whether Buddhists in non-historically Buddhist countries need to keep or to jettison the practices of their historical homelands.

The Strongest Animals in the World Are Herbivores Paul E. Widmayer, 2014-03-04 This book contains a bit of science, philosophy, nature, and beauty. It provides some concepts of life involving the source of all energy - the sun - and how its energy is utilized through basic chemistry to form various food sources from vegetation. From these various forms of vegetation the most abundant food source available on earth - all life is able to flourish. Numerous animals including aquatics, fowl, and a wide variety of mammals are able to utilize this vegetation to sustain life, give beauty to the world, and live in harmony with nature. The book lists a number of great men who were visionaries and understood the natural laws of the universe. These visionaries of centuries past shared their ideas on vegetarianism, respect for animals, and life in general. The book alludes to an interconnectedness of life and tries to convey that our world can become a better place when there is care and concern for all creatures capable of sensation.

Animal People Adam Reed, 2025-01-15 *Animal People* introduces readers to the professionalized world of animal protection from the perspective of those who consider themselves to be moderate activists. Adam Reed explores the interrelationships between moral cause and organizational culture, including the ways in which expert roles such as investigator and lobbyist inform the practice and outlook of animal protection. This book examines not only connections between forms of professionalism and everyday advocacy but also how those working to improve the welfare of animals can come to possess an expertise in public or mainstream ethics. Reed explores these issues through the example of a Scottish-based animal protection organization. *Animal People* makes a distinctive contribution to anthropological debate and discussion relating to human and nonhuman animal interactions, activism, and the attributions and imperatives of moral action.

John Galsworthy's Compassion Jill Felicity Durey, 2022-01-01 This book discusses John Galsworthy's compassion for people and animals, in his fiction, non-fiction and drama. Initial chapters explore compassion in *The Forsyte Saga* and *The*

Modern Comedy, and his parents' influence. Other chapters examine his works helping prison reform, men and children disabled during the First World War, and people whose relatives were interned as war-time alien enemies. Two chapters focus on slum clearance and labour unrest during the twentieth century's first three decades. Another two concentrate on animal welfare and vivisection. The final chapter attempts to appraise Galsworthy as a writer by looking at what commentators past and present have said, and at what constitutes literature.

The Emotional Lives of Animals (revised) Marc Bekoff, 2024-04-09 A seminal exploration of animal emotion, sentience, and cognition, revised and expanded to incorporate a surge of new science When award-winning scientist Marc Bekoff penned the first edition of this book in 2007, he predicted that over time our understanding of animal cognition and emotion would grow "richer, more accurate, and possibly different." Since then, not only has the field seen an explosion of new and startling research, but the popular interest in the subject has grown as well, spawning countless podcasts, articles, and bestselling books. Bekoff skillfully blends extraordinary stories of animal joy, empathy, grief, embarrassment, anger, and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied. Filled with light humor and compassion, *The Emotional Lives of Animals* is a clarion call for reassessing both how we view and how we treat animals.

Hearts and Minds Julian McAllister Groves, 1997 Living in a university town that is a center of biomedical research, Groves found he could not ignore the intense opposition to research using animals. He began to analyze the formation and activities of local protest groups, attending meetings and talking to activists about their beliefs. To his surprise, many activists emphasized rational and scientific justifications for their commitment to the movement. Conversely, scientists

frequently discussed their use of lab animals in the context of their attachment to pets or other animals and their concern for the environment. Groves seeks to understand these positions in connection with popular beliefs about the place of emotions in public life. *Hearts and Minds* looks past the placards and sound-bites to people's intellectual and psychological explanations for their positions. It discards worn generalizations and offers a nuanced portrait of people who are seriously engaged in reconciling their ethics and their behavior.

Perspectives on Human-Animal Communication Emily Plec, 2013-01-04 Despite its inherent interdisciplinarity, the Communication discipline has remained an almost entirely anthropocentric enterprise. This book represents early and prominent forays into the subject of human-animal communication from a Communication Studies perspective, an effort that brings a discipline too long defined by that fallacy of division, human or nonhuman, into conversation with animal studies, biosemiotics, and environmental communication, as well as other recent intellectual and activist movements for reconceptualizing relationships and interactions in the biosphere. This book is a much-needed point of entry for future scholarship on animal-human communication, as well as the whole range of communication possibilities among the more-than-human world. It offers a groundbreaking transformation of higher education by charting new directions for communication research, policy formation, and personal and professional practices involving animals.

The Routledge Handbook of Animal Ethics Bob Fischer, 2019-12-06 There isn't one conversation about animal ethics. Instead, there are several important ones that are scattered across many disciplines. This volume both surveys the field of animal ethics and draws professional philosophers, graduate students, and undergraduates more deeply into the discussions that are happening outside of philosophy departments. To that end, the volume contains more nonphilosophers than philosophers, explicitly inviting scholars from other fields—such as animal science, ecology, economics, psychology, law, environmental science, and applied biology, among others—to bring their own disciplinary resources to bear on matters that affect animals. The Routledge Handbook of Animal Ethics is composed of 44 chapters, all appearing in print here for the first time, and organized into the following six sections: I. Thinking About Animals II. Animal Agriculture and Hunting III. Animal Research and Genetic Engineering IV. Companion Animals V. Wild Animals: Conservation, Management, and Ethics VI. Animal Activism The chapters are brief, and they have been written in a way that is accessible to serious undergraduate students, regardless of their field of study. The volume covers everything from animal cognition to the state of current fisheries, from genetic modification to intersection animal activism. It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals.

Muhammad: His Character and Conduct Adil Salahi, 2014-08-18 Muslims all over the world see Muhammad as God's last messenger to mankind. Through his actions, he showed the way to live a life that provides for all the needs of body, mind, and soul, and elevates man's aspirations towards a sublime ideal in a very simple, direct, and truthful manner. He built

a state that was dedicated to truth and justice and to the liberation of man throughout the world. He wrote to emperors, kings, and rulers, calling on them to believe in God and to follow His message, yet, at the same time, he lived a life of poverty, leaving aside the riches that were offered to him. At a time when the Prophet is much maligned by writers, cartoonists, and various other detractors, this book aims to show Muhammad's true character in detail, both in its most everyday and most extraordinary moments. Adil Salahi's writings include the acclaimed *Muhammad: Man and Prophet* and *Pioneers of Islamic Scholarship*, and the English translation of the eighteen-volume *In the Shade of the Qur'an*. His main career has been in radio and print journalism, and for over thirty years he was editor of *Islam in Perspective*, a twice-weekly full-page column in the *Arab News*, a Saudi daily newspaper.

Dogs Demystified Marc Bekoff, 2023-06-06 An all-encompassing and fun reference from an award-winning scientist and dog lover Dr. Marc Bekoff is an expert at turning cutting-edge science into practical, reader-friendly information. The encyclopedic entries in this book cover everything related to dog care, dog-human relationships, and dog behavior, cognition, and emotions, making this the accessible book that every dog lover should have. In concise, readable A-through-Z entries, Bekoff covers it all, from aggression to pack formation to zoomies, and explores why dogs do what they do; exactly how to meet any dog eye-to-eye, nose-to-nose, and ear-to-ear to understand their world better; and how tuning in to a dog's unique personality leads to happier dogs and happier human companions.

Worship and Ethics Max Kadushin, 2001 Describes how Halakah, or Jewish Law, enables the individual to achieve religious experience.

Captured: The Animal within Culture M. Boyde, 2013-11-20 In 2008 the youtube video documenting the emotional reunion between two men and Christian the Lion became a worldwide sensation. Key themes of the essays in *Captured: the Animal within Culture* are encapsulated in Christian's story: the implications of the physical and cultural capture of animals.
