The Coming of Neo-Feudalism Joel Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and

opportunity, we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property, reduced upward mobility, demographic stagnation, and increased dogmatism. If the last seventy years saw a massive expansion of the middle class, not only in America but in much of the developed world, today that class is declining and a new, more hierarchical society is emerging. The new class structure resembles that of Medieval times. At the apex of the new order are two classes—a reborn clerical elite, the clerisy, which dominates the upper part of the professional ranks, universities, media and culture, and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information. These two classes correspond to the old French First and Second Estates. Below these two classes lies what was once called the Third Estate. This includes the yeomanry, which is made up largely of small businesspeople, minor property owners, skilled workers and private-sector oriented professionals. Ascendant for much of modern history, this class is in decline while those below them, the new Serfs, grow in numbers—a vast, expanding property-less population. The trends are mounting, but we can still reverse them—if people understand what is actually occurring and have the capability to oppose them.

Transfiction and Bordering Approaches to Theorizing Translation D. M. Spitzer, Paulo Oliveira, 2022-08-23 This collection seeks to expand the centers from which scholars theorize translation, building on themes in Rosemary Arrojo's pioneering work on transfiction and the influence of bordering disciplines in investigating and elucidating questions central to the field of translation studies. Chapters by scholars around the world theorize translation from diverse perspectives, drawing on a wide range of literatures, genres, and media, including fiction, philosophy, drama, and film. Half the chapters explore the influence of Rosemary Arrojo's work on transfiction and the ways in which fictional representations of translators and translation can shed new light on theoretical concerns. The other chapters look to fields outside translation studies, such as linguistics, media studies, and philosophy, to demonstrate the ways in which the key thinkers and theories that have influenced Arrojo's work can be seen in other disciplines and in turn, encourage further cross-disciplinary research interrogating key questions in the field. The collection makes the case for a multi-layered approach to theorizing translation, one which accounts for the rich possibilities in revisiting existing work and thinking outside disciplinary boundaries in order to advance the field. This book will be of interest to students and scholars in translation studies and comparative literature.

The Korean Myths Heinz Insu Fenkl, 2024-09-12 Korean myths are a living and evolving part of society, in both the North and South. With the export of Korean film across the globe, K-pop, fashion, K-dramas, literature and comics there is a growing desire to understand the folklore and mythical underpinnings of contemporary Korean Culture. Insu and Bella Fenkl

bring together a wealth of knowledge of both the new and the old, the traditional and the modern to guide the reader through this fascinating history and help understand the people, their traditions and culture. From the Changsega (Song of Creation) sung by shamans, to the gods, goddesses and monsters who inhabit the cosmos, including the god Mireuk, creator of the world, and the giant Grandma Mago, who was able to create mountains from the mud on her skirt, these myths have been disseminated for centuries and continue to resonate in popular culture today.

The Novel Cure Ella Berthoud, Susan Elderkin, 2014-12-30 Delightful... elegant prose and discussions that span the history of 2,000 years of literature.—Publisher's Weekly A novel is a story transmitted from the novelist to the reader. It offers distraction, entertainment, and an opportunity to unwind or focus. But it can also be something more powerful—a way to learn about how to live. Read at the right moment in your life, a novel can—quite literally—change it. *The Novel Cure* is a reminder of that power. To create this apothecary, the authors have trawled two thousand years of literature for novels that effectively promote happiness, health, and sanity, written by brilliant minds who knew what it meant to be human and wrote their life lessons into their fiction. Structured like a reference book, readers simply look up their ailment, be it agoraphobia, boredom, or a midlife crisis, and are given a novel to read as the antidote. Bibliotherapy does not discriminate between pains of the body and pains of the head (or heart). Aware that you've been cowardly? Pick up *To Kill a Mockingbird* for an injection of courage. Experiencing a sudden, acute fear of death? Read *One Hundred Years of Solitude* for some perspective on the larger cycle of life. Nervous about throwing a dinner party? Ali Smith's *There but for The* will convince you that yours could never go that wrong. Whatever your condition, the prescription is simple: a novel (or two), to be read at regular intervals and in nice long chunks until you finish. Some treatments will lead to a complete cure. Others will offer solace, showing that you're not the first to experience these emotions. *The Novel Cure* is also peppered with useful lists and sidebars recommending the best novels to read when you're stuck in traffic or can't fall asleep, the most important novels to read during every decade of life, and many more. Brilliant in concept and deeply satisfying in execution, *The Novel Cure* belongs on everyone's bookshelf and in every medicine cabinet. It will make even the most well-read fiction aficionado pick up a novel he's never heard of, and see familiar ones with new eyes. Mostly, it will reaffirm literature's ability to distract and transport, to resonate and reassure, to change the way we see the world and our place in it. This appealing and helpful read is guaranteed to double the length of a to-read list and become a go-to reference for those unsure of their reading identities or who are overwhelmed by the sheer number of books in the world.—Library Journal

Reading Architecture Angeliki Sioli, Yoonchun Jung, 2018-04-09 Why write instead of draw when it comes to architecture? Why rely on literary pieces instead of architectural treatises and writings when it comes to the study of buildings and urban environments? Why rely on literary techniques and accounts instead of architectural practices and analysis when it comes to academic research and educational projects? Why trust authors and writers instead of sociologists or scientists when it comes to planning for the future of cities? This book builds on the existing interdisciplinary bibliography on architecture and literature, but prioritizes literature's capacity to talk about the lived experience of place and the premise that literary language can often express the inexpressible. It sheds light on the importance of a literary instead of a pictorial imagination for architects and it looks into four contemporary architectural subjects through a wide variety of literary works. Drawing on novels that engage cities from around the world, the book reveals aspects of urban space to which other means of architectural representation are blind. Whether through novels that employ historical buildings or sites interpreted through specific literary methods, it suggests a range of methodologies for contemporary architectural academic research. By exploring the power of narrative language in conveying the experience of lived space, it discusses its potential for architectural design and pedagogy. Questioning the massive architectural production of today's globalized capital-driven world, it turns to literature for ways to understand, resist or suggest alternative paths for architectural practice. Despite literature's fictional character, the essays of this volume reveal true dimensions of and for places beyond their historical, social and political reality; dimensions of utmost importance for architects, urban planners, historians and theoreticians nowadays.

Chinatown Oh Jung-hee, 2025-07-17 A selection of the best short stories by Oh Jung-hee, one of South Korea's most influential writers. In this emblematic selection of her stories, Oh Jung-hee probes beneath the surface of seemingly quotidian lives to expose nightmarish family configurations warped by desertion, psychosis, and death. In 'Chinatown' a young girl living on the edge of the city's Chinese community comes of age among mundane violences, collisions with adult sexuality and the American occupation; in 'The Garden Party' a woman grapples with her conflicting identities of wife, mother and writer at an alcohol-fuelled gathering. Throughout a career spanning six decades, Oh Jung-hee has drawn comparisons to Alice Munro, Virginia Woolf, and Joyce Carol Oates, and is assuredly a trailblazing writer.

A History of European Literature Walter Cohen, 2017-01-19 Walter Cohen argues that the history of European literature and each of its standard periods can be illuminated by comparative consideration of the different literary languages within Europe and by the ties of European literature to world literature. World literature is marked by recurrent, systematic features, outcomes of the way that language and literature are at once the products of major change and its agents. Cohen tracks these features from ancient times to the present, distinguishing five main overlapping stages. Within that framework, he shows that European literatures' ongoing internal and external relationships are most visible at the level of form rather than of thematic statement or mimetic representation. European literature emerges from world literature before the birth of Europe -- during antiquity, whose Classical languages are the heirs to the complex heritage of Afro-Eurasia. This legacy is later transmitted by Latin to the various vernaculars. The uniqueness of the process lies in the gradual displacement of the learned language by the vernacular, long dominated by Romance literatures. That development subsequently informs the second crucial differentiating dimension of European literature: the multicontinental expansion of its languages and characteristic genres, especially the novel, beginning in the Renaissance. This expansion ultimately results in the reintegration of European literature into world literature and thus in the creation of today's global literary system. The distinctiveness of European literature is to be found in these interrelated trajectories.

Flash Fiction International James Thomas, Robert Shapard, Christopher Merrill, 2025-04-25 A dazzling new anthology of the very best very short fiction from around the world. What is a flash fiction called in other countries? In Latin America it is a micro, in Denmark kortprosa, in Bulgaria mikro razkaz. These short shorts, usually no more than 750 words, range from linear narratives to the more unusual: stories based on mathematical forms, a paragraph-length novel, a scientific report on volcanic fireflies that proliferate in nightclubs. Flash has always—and everywhere—been a form of experiment, of possibility. A new entry in the lauded Flash and Sudden Fiction anthologies, this collection includes 86 of the most beautiful, provocative, and moving narratives by authors from six continents, including best-selling writer Etgar Keret, Zimbabwean writer Petina Gappah, Korean screenwriter Kim Young-ha, Nobel Prize winner Czeslaw Milosz, and Argentinian Queen of the Microstory Ana María Shua, among many others. These brilliantly chosen stories challenge readers to widen their vision and celebrate both the local and the universal.

Understanding Hallyu Hyesu Park, 2020-12-10 This book sheds light on aspects of the Korean Wave and Korean media products that are less discussed—Korean literature, webtoon, and mukbang. It explores the making of these Korean popular cultural products and how they work and engage media recipients regardless of their different national, cultural, and geographical backgrounds. Drawing on narrative theory and cultural studies, the book makes a compelling argument about how to analyze the production and consumption of Korean media within and beyond its national boundary with critical eyes. The author shows how transmedial narrative studies (narrative studies across media) offers analytical and theoretical lenses through which one can interpret new and emerging media forms and contents. Furthermore, she explores how these forms and contents can be better understood when they are contextualized within specific time and place using the cultural, social, and political concepts and precepts of the region. The volume will be of great interest to scholars and researchers of Asian Studies, popular culture, contemporary cyberculture, media and culture studies, and literary theory.
